Bore measurement with a BROWN & SHARPE INTRIMIK inside micrometer

Measurement of difference between two inductive probes

Squareness verification with inductive probe and TWIN-T10 display

Dear Customers and Partners,

*In this catalog we present our full offering of precision measuring instruments. Best known under flagship brand names TESA and Brown & Sharpe, we draw upon our solid roots in precision metrology while following the trend of the times by introducing cutting-edge technologies. Today as yesterday, our precision measuring instruments and solutions help customers improve their quality control and increase their productivity.*

*TESA has become over the years the home for many brands such as Brown & Sharpe, COMPAC, MERCER, ROCH, ETALON and INTERAPID. All these brands have added a great value and shaped what our products today stand for: a unique blend of high excellence metrology tools with strong reputation for quality, reliability and durability. In this catalog edition we proudly give a particular focus to our Brown & Sharpe products, our first choice for products with imperial scale.*

*TESA is today part of Hexagon Manufacturing Intelligence. As a leading, metrology and manufacturing solution specialist, the company's mission is to give customers the confidence to increase production speed and accelerate productivity while enhancing product quality. All the products in the Hexagon Manufacturing Intelligence portfolio support this objective in three areas – sensing, thinking and acting. Sensing: generating large quantities of accurate measurement data. Thinking: transforming that data into actionable information. Acting: applying corrections to the manufacturing process based on this information.*

*Going beyond the boundaries of traditional gauging tasks, TESA products smoothly integrate into the complete manufacturing solutions offered by Hexagon through advanced connectivity systems and software interfaces. They enable better use of data through integration with analytic systems like statistical process control (SPC) software and can help business to embrace Industry 4.0 principles.*

*We hope that this catalogue will inspire you to find new and better solutions to your measurements challenges.*

Stefan Ruh

Managing Director TESA  
Hexagon Manufacturing Intelligence

## TESA – MORE THAN 75 YEARS OF TECHNOLOGY

1941

2016

Since its foundation 75 years ago, TESA has distinguished itself through its unique expertise in micromechanics, precision machining and dimensional metrology. Having its roots and headquarters in Renens – Switzerland, a region well known for watchmaking, precision engineering and research, TESA have always been dedicated to precision, quality and the sustainability of its products.

Brown & Sharpe precision hand tools date back to an even longer metrology tradition. Both brands have been integrated under the “TESA umbrella” by the Hexagon Manufacturing Intelligence division, the world’s largest metrology product provider.

Today TESA as part of Hexagon Manufacturing Intelligence, stands for a modern firm with an international footprint operating on all continents. Our measuring instruments help each day customers around the world to find solutions for their metrology challenges improving their quality control and increasing their productivity

## PASSION FOR PRECISION

*Renowned flagship products, like CCMA and DIAL-CAL dial calipers, the UNIMASTER large dimension gauge, BESTEST/TESATAST level indicators, the Brown & Sharpe INTRIMIK internal micrometer and our 1D probes – just to name a few – are a reference in workshops for decades.*

*With the evolution of digital communication, TESA made the next step and introduced TESA Link Connector (TLC) and wireless module. This allows today's TWIN-CAL caliper to be equipped with a unique TLC, as easily as replacing the battery cap of the device, enabling bidirectional communication between the instrument and the computer. Data can be sent directly to software, turning single data-points into actionable information.*

*TESA Height Gages are world market leaders in their class. With their versatility and accuracy, they are in many cases an easy to use and cost efficient alternative to coordinate measurement machines (CMMs).*

*TESA is also a manufacturer of tactile and non-contact probing solutions for CMMs. Available through the worldwide sales network of Hexagon Manufacturing Intelligence, these products represent the high end of technical capabilities in sensing.*

*To maintain the value of our customer's investments, TESA pays great care to customer support services. Our offering includes the core services of calibration, maintenance and repair. An SCS certified calibration lab, qualified for measurement uncertainties down to 0,02 µm, provides certification for measurement tools where accuracy and reliability matters.*

*Understanding that precision is not only a result of the right tool but also of environmental influences, we offer technical assistance for applications, product selection and installation as well as training from basic metrology up to specialist measurement tasks.*

*Our product customization offering will help you to find solutions that go beyond the capabilities of standard tools.*

# QUANTITIES AND UNITS

## International System of Units (SI)

F: Système international d'unités (SI)

D: Internationales Einheitensystem (SI)

## Derived units (of measurement)

F: Unités dérivées

D: Abgeleitete Einheiten

Quantity	SI base unit	
	Name	Symbol
length	metre	m
mass	kilogram	kg
time	second	s
electric current	ampere	A
thermodynamic temperature	kelvin	K
amount of substance	mole	mol
luminous intensity	candela	cd

Quantity	Unit		Relationship to SI base unit
	Name	Symbol	
plane angle	radian	rad	1 rad = 1 mm 1 rad = 57,295 779 51°
frequency	hertz	Hz	1 Hz = 1 s <sup>-1</sup>
force	newton	N	1 N = 1 m kg s <sup>-2</sup>
pressure	pascal	Pa	1 Pa = 1 m <sup>-1</sup> kg s <sup>-3</sup>
power	watt	W	1 W = 1 m <sup>2</sup> kg s <sup>-3</sup>
electrical potential	volt	V	1 V = 1 m <sup>2</sup> kg s <sup>-3</sup> A <sup>-1</sup>

## Decimal multiples and submultiples of the base unit "metre"

Unit	Symbol	m	cm	mm	µm	nm
kilometre	km	10 <sup>3</sup> m	1000 m		1 000 000 mm	
<b>Metre</b>	<b>m</b>	<b>1 m</b>	<b>1 m</b>	<b>100 cm</b>	<b>1 000 mm</b>	<b>1 000 000 µm</b>
decimetre	dm	10 <sup>-1</sup> m	0,1 m	10 cm	100 mm	100 000 µm
centimetre	cm	10 <sup>-2</sup> m	0,01 m	1 cm	10 mm	10 000 µm
<b>Millimetre</b>	<b>mm</b>	<b>10<sup>-3</sup> m</b>	<b>0,001 m</b>	<b>0,1 cm</b>	<b>1 mm</b>	<b>1 000 µm</b>
tenth millimetre		10 <sup>-4</sup> m	0,000 1 m		0,1 mm	100 µm
hundredth millimetre		10 <sup>-5</sup> m	0,000 01 m		0,01 mm	10 µm
<b>Micrometre</b>	<b>µm</b>	<b>10<sup>-6</sup> m</b>	<b>0,000 001 m</b>		<b>0,001 mm</b>	<b>1 µm</b>
tenth micrometre		10 <sup>-7</sup> m	0,000 000 1 m		0,000 1 mm	0,1 µm
hundredth micrometre		10 <sup>-8</sup> m	0,000 000 01 m		0,000 01 mm	0,01 µm
<b>Nanometre</b>	<b>nm</b>	<b>10<sup>-9</sup> m</b>	<b>0,000 000 001 m</b>		<b>0,000 001 mm</b>	<b>0,001 µm</b>
						<b>1 nm</b>

Note: Conversion from inches to millimeters (ins. X 25,4) is exact. Conversion from millimeters to inches (mm X 0,04) is approximate; (mm X 0,0393701) is accurate to six significant figures for mm/ in. Converted units should be rounded off to values consistent with the original accuracy.

## Definition of the metre

F: Définition du mètre – D: Meterdefinition

"The metre is defined as the distance travelled by light in vacuum during a time of 1/299 792 458 of a second."

17th General Conference on Weights and Measures, 1983.

## Reference temperature

F: Température de référence

D: Bezugstemperatur

For measuring instruments and workpieces, ISO R1 assesses this temperature is 20°C.

The temperature of 20°C is assumed to be valid for any size, material measure, measurement result etc., unless otherwise specified.

# MEASUREMENT TASKS

## Inspecting

F: Contrôler – D: Prüfen

Determining whether a test object complies with specified requirements (e.g. as regards both dimensions and form).

## Measuring

F: Mesurer – D: Messen

Obtaining a value (e.g. length value) measured by comparison against a master standard (e.g. material measure).

## Calibrating

F: Etalonner – D: Kalibrieren

Establishing the actual deviation of a measuring instrument from desired value.

This is usually done through measurement operations. The result of a calibration is documented in the form of a calibration certificate and can be used later on for adjustment purposes, for instance.

## INDICATION RELATED DEFINITIONS

### Indication

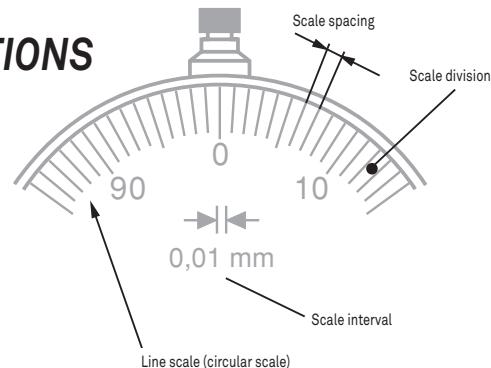

F: Indication – D: Anzeige

*The indication, which provides the information about the measured value, is directly perceptible by human senses. It may be optical, acoustic or based on any other output feature.*

*Displaying devices may either have a digital, analogue or any other special indication.*

*For material measures, the indication matches displayed value.*

Note: According to the standards, the terms "analogue" and "digital" are only used to differentiate the methods of measurement. Therefore, they should not be used for the definition of the indications.

### Scale indication

F: Indication de l'échelle – D: Skalenanzeige

*Scale indication is the readable position of a scale mark.*

### Line scale

F: Echelle à traits – D: Strichskale

*A line scale is the successive number of graduation (scale marks) on a scale.*

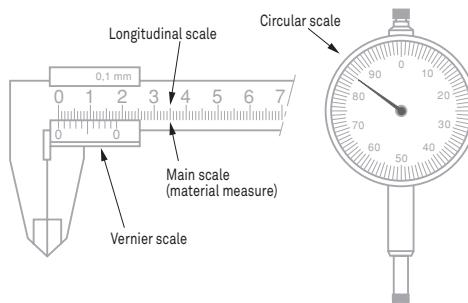

### Scale spacing

F: Longueur d'une division (d'échelle)

D: Teilstrichabstand

*Scale spacing is expressed in length units as the distance between two successive scale marks measured along the same line by a marker (e.g. the end of a pointer).*

Line scales

### Scale division

F: Division d'échelon (échelon) – D: Skalenteil

*Part of a scale between two successive scale marks.*

### Scale interval

F: Echelon, valeur d'une division (d'échelle)

D: Skalenteilungswert

*The scale interval is the difference between the values matching two successive scale marks. This characteristic is expressed in the units marked on the scale.*

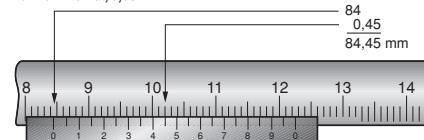

### Vernier interval

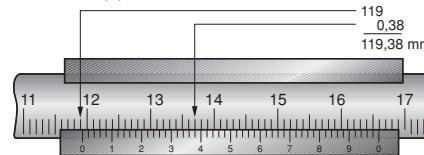

F: Valeur du vernier – D: Noniuswert

*The vernier interval is the alteration of the value of a measurand, which in turn changes the indication by one scale division of the vernier scale.*

Vernier interval, 0,05 mm

Vernier interval, 0,02 mm

### Numerical (digital) indication

F: Indication numérique

D: Ziffernanzeige

*The numerical indication is shown in the form of a digit (succession of digits).*

### Numerical scale

F: Echelle numérique – D: Zifferskale

*A numerical scale is a succession of digits (usually 0 to 9). On a multi-scale, the single numerical scales are arranged side by side in a decimal fraction.*

### Numerical division

F: Pas (échelon) numérique – D: Zifferschritt

*The numerical division is the difference between two successive digits from their last position on a numerical scale.*

### Numerical interval

F: Valeur du pas (échelon) numérique

D: Zifferschrittwert

*The numerical interval is the alteration by one numerical value of the indication. This characteristic, which matches the scale interval, is expressed in the units of the measurand.*

# METROLOGICAL DEFINITIONS

## Range of indication

F: Etendue d'indication – D: Anzeigebereich  
*The range of indication lies between the highest and lowest display values of a measuring instrument.*

## Measuring range

F: Etendue de mesure – D: Messbereich  
*The measuring range of an indicating device is the range within which the measured values cannot exceed the maximum permissible errors. For tools having several measuring ranges, these errors may vary from a range to another. The measuring range may well be contained within the related whole range of indication.*

## Measuring span

F: Champ de mesure – D: Messspanne  
*This span equals the difference between both first and last values of the measuring range as specified.*

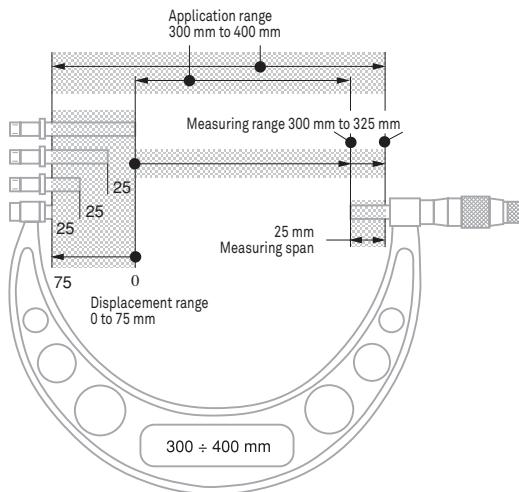

## Displacement range

F: Etendue de déplacement – D: Verstellbereich  
*Measurand related extent within which the measuring range can be moved.*

## Application range

F: Etendue d'application  
 D: Anwendungsbereich  
*The application range is equal to the sum of both displacement and measuring ranges.*  
 Note: The first and last values make each range different from one another.

## Measurand

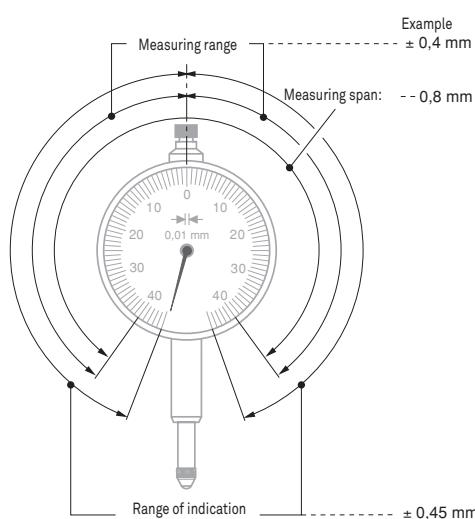

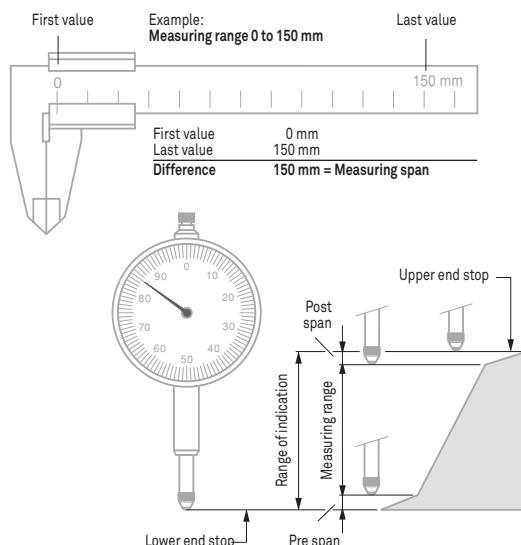

F: Mesurande – D: Messgröße  
*Physical quantity of a measurement. In other words, the measurand is the length or the angle as measured or to be measured.*

## Measured value

F: Valeur mesurée – D: Messwert  
*Any measured value expresses the result of a measurement. Therefore, this value is directly associated with the measurand and further allocated to the output feature (e.g. display) of a measuring instrument or device.  
 A measured value is expressed as the product of both numerical value and unit.  
 The measured value includes the true value plus the random and systematic errors of the relevant tool.*

## Result of measurement

F: Résultat de mesure – D: Messergebnis  
*Product of a measured value once corrected on the basis of the known systematic errors. This result is further increased by the uncertainty of measurement, which includes the random as well as any unknown systematic error.*

### **Permissible limits of a metrological characteristic MPL**

F: Limites tolérées d'une caractéristique métrologique MPL

D: Grenzwerte eines Messtechnischen Merkmals MPL

Extreme permissible values of a metrological characteristic of a given measuring equipment, according to specifications or standards of the manufacturer or others.

### **Maximum permissible errors for a metrological characteristic MPE**

F: Erreurs maximales tolérées d'une caractéristique métrologique MPE

D: Grenzwerte für Messabweichungen für ein messtechnisches Merkmal MPE

Extreme values of the permissible error for a metrological characteristic of a given measuring equipment, according to specifications or standards of the manufacturer or others.

### **Repeatability**

F: Fidélité (répétabilité)

D: Wiederholpräzision

Ability of a measuring instrument to repeat the results obtained from the same measurand successively measured in the same direction, also under the same conditions.

Repeatability, which delivers important information for the assessment of the uncertainty of measurement, is quantitatively expressed as standard deviation of dispersion values.

### **Repeatability limit**

F: Fidélité (répétabilité) limite

D: Wiederholgrenze

Extreme value for repeatability.

### **Maximum permissible errors G**

F: Erreurs maximales tolérées G

D: Fehlergrenzen G

These errors are assimilated to the "Permissible limits of a metrological characteristic MPL".

Being related to both upper and lower highest deviations of a measuring instrument, they are usually symmetrical in practical metrology and, therefore, stated as single value, without any sign.

### **Deviation span of indication**

F: Champ d'erreur d'indication

D: Abweichungsspanne

This deviation span matches the distance from the highest to the lowest point of a coordinate as shown on the relevant diagram. The value obtained is either applicable to whole or the local measuring span or measuring range.

All required measurements are carried out in one direction (without reversal of the measuring force) – i.e. with upward plunger movement for a dial gauge. For those needed to establish the whole deviation span, they are performed in both directions (with reversal of the measuring force) – i.e. with upward and downward movement of the plunger for a dial gauge.

### **Hysteresis**

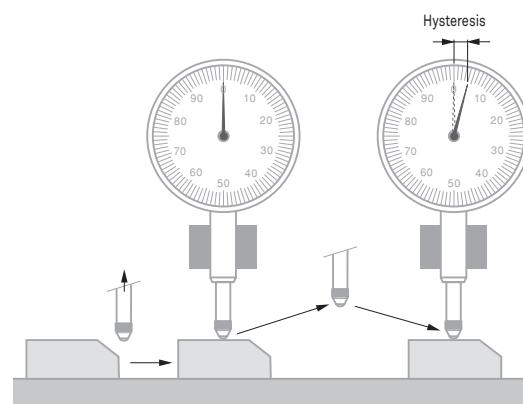

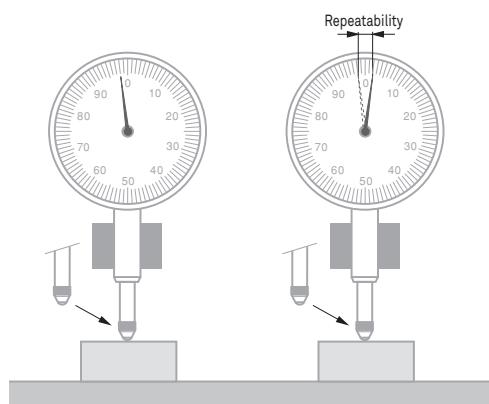

F: Hystérésis

D: (Messwert-) Umkehrspanne

Hysteresis expresses the difference between various indications of a measuring instrument.

This value is achieved through measurements of the increasing/decreasing value of the same measurand, taken under the same conditions.

Hysteresis, which is quantitatively stated as standard deviation of value dispersion, can be determined anywhere within the measuring span or range. Its amount can also be obtained from the diagram of the deviation span as a whole.

# DECISION RULES FOR PROVING CONFORMITY OR NONCONFORMITY WITH SPECIFICATIONS

## Relationship with the uncertainty of measurement

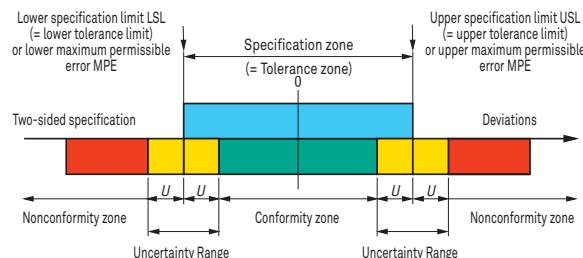

ISO 14253-1, which is a part of "Geometrical Product Specification GPS", provides "Rules for establishing the conformity or nonconformity with specifications". These rules are valid for "Inspection by measurements of workpieces and measuring equipment".

This ISO standard makes allowances for the uncertainty of measurement – or more precisely for the true uncertainty of any measurement whenever the conformity or nonconformity with a given specification must be proved. So, for a workpiece, the specification matches a preset tolerance while being equal to the maximum permissible errors for a metrological characteristic (MPE) for a measuring instrument.

Any given specification is a constant, whereas the measurement uncertainty is a variable which is affected by many components. Therefore, the zone of conformity or nonconformity depends on the size of the effective expanded uncertainty  $U$ .

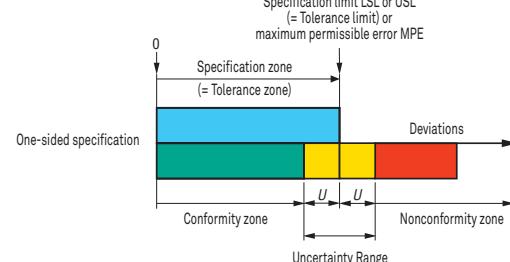

## Rule for proving conformity

Conformity is proved when the **measurement result  $y$  is lying within the specification zone, reduced on either side by the expanded uncertainty  $U$** . Consequently, workpieces or measuring instruments can be accepted as far as their conformity with the specification is proved by the manufacturer (supplier).

## Rule for proving nonconformity

Nonconformity is proved when the **measurement result  $y$  is lying beyond the specification zone, increased on either side by the expanded uncertainty  $U$** . In such a case, the relevant measuring instruments can be rejected if the purchaser (customer) gives evidence of its non-conformance.

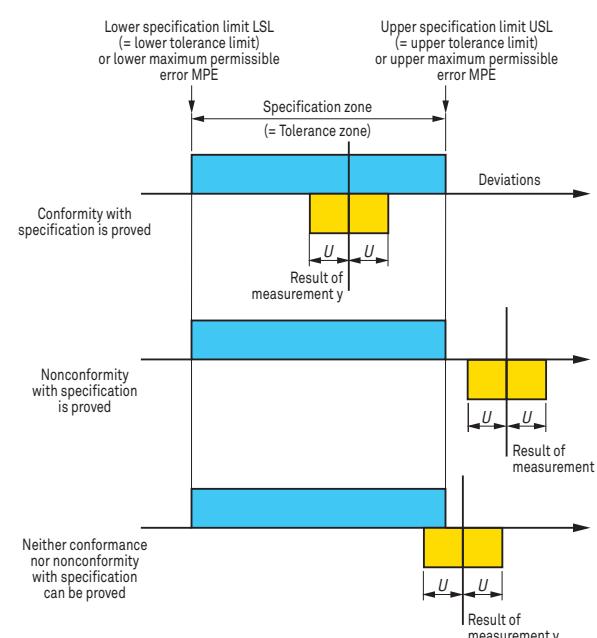

## Neither conformity nor nonconformity can be proven

This often happens when the **measurement result  $y$  associated with the expanded uncertainty  $U$  includes either of the LSL or USL specification limits**. As a result, workpieces or measuring instruments can neither be automatically accepted nor rejected.

For such "dead end cases", it is advisable to follow the rule below.

- Repeat all measurements based on a reduced uncertainty, so that conformity or nonconformity can clearly be demonstrated. Usually, proceeding in this way benefits to the party that's able to provide the needed proof.
- Come to a mutual agreement providing the procedure to be applied if such cases arise.

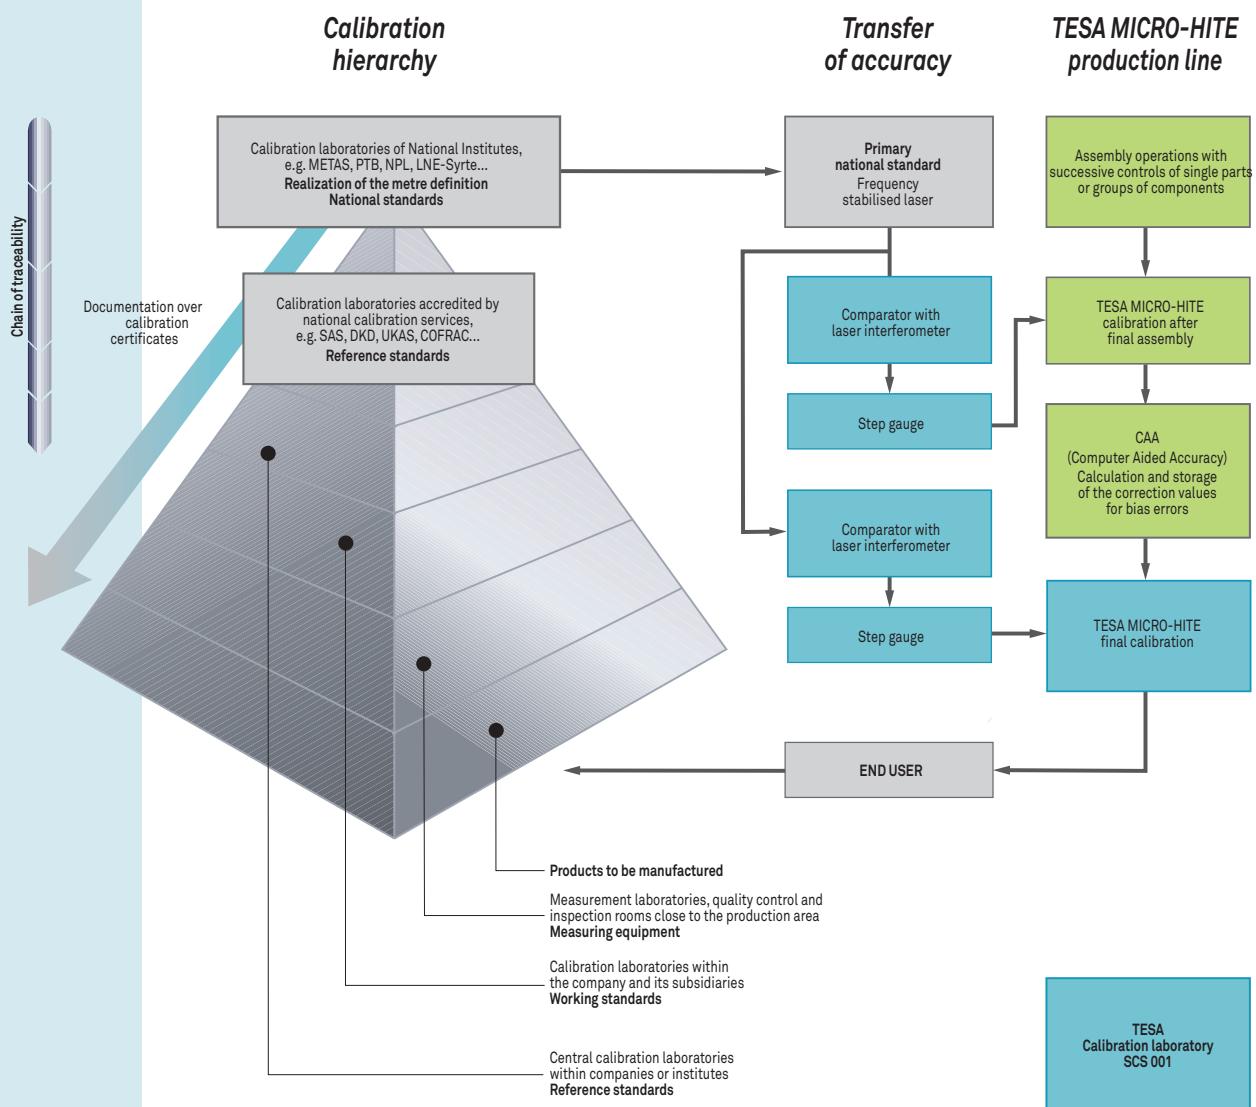

# TRACEABILITY TO NATIONAL STANDARDS

All measuring equipment consistently used on our production site is traceable to national standards or reference fixtures through our quality management system.

Traceability is established by recalibration at regular intervals with documentary evidence as specified in the standards.

The illustration that follows shows the hierarchy of calibrations within the chain of traceability. The example set for the transfer of accuracy to our MICRO-HITE height gauges also shows how they are calibrated. Each feature is supplied with a free SCS calibration certificate issued by our laboratory, which is officially accredited by the Swiss Calibration Service.

## DIGITAL CALIPERS

## TWIN-CAL IP67

Welcome to the next generation of Brown & Sharpe electronic calipers, with the highest degree of protection ever offered. Resistant to the penetration of liquids and particles of metal or other materials. The TWIN-CAL IP67 are all equipped with the unique integral data output TLC (TESA Link Connector), providing the opportunity to upgrade at any time.

-  Slider with locking screw
-  Patented shock-proof design

## DIAL-CAL

The DIAL-CAL dial caliper is the favorite instrument of many professionals working in mechanics, as it is an ideal tool for the workshop.

The dial integrated into a robust metal housing enables a quick and clear reading. All DIAL-CAL calipers use the original shockproof technology developed and patented in 1970 by TESA, pioneer of this technology.

Thanks to the shockproof system inserted between the mobile measuring element and the mechanism of the dial pointer, this patent guarantees reliable measurements even in case of a shock to the instrument.

## MICROMASTER Electronic Micrometers with Digital Display

Equipped with the "capa  $\mu$  system"- That's Brown & Sharpe's patented measuring system, which provides absolute and comparative measurement.

- Sleek, ergonomic design.
- Large, easy-to-read digital display.

### Models:

- Basic with a single function key
- IP54 with water spray protection as well as IP54 RS with added RS-232 interface

## Convertible Thimble Chrome Frame Micrometers

The Original - and still the best - Silky-smooth, precise operation and functional design combine to continue the tradition of the Brown & Sharpe micrometer as the basic tool of choice for quality-minded individuals. Carbide measuring faces, - convertible friction to feel thimble sleeves, easy- reading satin-Chrome finish and spindle locks are standard on all the micrometers listed.

Decimal equivalent references clearly etched onto the micrometer frame.

## Micrometers with Spherical Measuring Faces

Brown & Sharpe model with spherical anvil and flat measuring spindle makes this micrometer ideal for measuring convex curves directly without having to subtract the diameter of a ball. Measure wall thickness of tubing with inside diameters as small as 3/8". Straight/line barrel graduations and glare-free satin-chrome finish virtually eliminate .025" reading errors. Convertible "fixed/friction" thimble for a choice in measuring action and ring lock. Graduations in .0001"

## MICROMETERS WITH ANALOGUE DISPLAY

### Screw Thread Comparator Micrometers

A micrometer that will give you a quick check for cut or cashed threads. It has been designed for comparison measurements. Tapered contacting points on the micrometer are lapped flat to .015" for accurate thread comparision. This micrometer meets government specification GGG-C-105c.

#### Features:

- Satin-chrome thimble.
- .001" readings.
- Straight/line graduations.
- Black enamel frame.
- Spindle lock.
- Fixed/friction thimble.

## Depth Micrometers

Micrometer Depth Gages are available in both inch and metric models. Both feature a hardened, precision base. Bases are available in lengths of 2.5" / 63.5 mm and 4" / 100 mm to satisfy a wide range of measuring applications. Base width is 1/2".

All micrometer depth gages feature a satin-chrome finish for glare-free reading and a friction thimble for uniform measurements. All models on this page are supplied complete in a fitted mahogany case.

## Micrometer Ball Attachments

Converts any micrometer with standard spindle and anvil diameters listed below to an accurate tool for measuring tubing wall thickness as well as other curved surfaces. Hardened and lapped chrome steel ball in neoprene retainer fits on either anvil or spindle of the micrometer. To measure, simply subtract the ball diameter from the micrometer reading to compensate for the size of the ball.

## INTRIMIK with Analog Indication - Inch Models

### Features:

- INTRIMIK's measuring arms move at right angles to the spindle.
- Analog reading, with graduations as shown in the table.
- Instruments in the range .275" to 4.00" have hardened steel measuring points (770 HV).
- Instruments in the range 4.00" to 12.00" have tungsten carbide inserts in the measuring points (1300 HV).

Adheres to the ABBE principle

## ALESOMETER "capa $\mu$ system" with Digital Display

Fitted with a TESA patented capacitive measuring system.

Internal micrometers with 3-line contact. All TESA ALESOMETER are specially suited for through and blind bores, as well as short centring shoulders, except for the models covering the application range from .236 ÷ .397 in (6 ÷ 10 mm).

## INTERNAL MEASUREMENT

## ALESOMETER "capa µ system" with Digital Display - Partial Sets and Components

Fitted with TESA patented capacitive measuring system Models that cover the application range from .236 to .3970 mm can only measure through bores – All other partial sets also allow blind bores as well as short centring shoulders to be inspected.

DIN 863 T4.  
Style C1  
for models  
.2362 to .3970" or  
style C2 for  
all other models

.001 mm

Measuring inserts  
for application range  
.236" to .394" =  
steel, hardened to  
HV30 550  
.394" to 11.81" =  
tungsten carbide  
tipped, HRC ≥ 7.

## Interchangeable Rod Inside Micrometers

A versatile and flexible tool for precise micrometer measurement of inside dimensions ranging from 1.5" to 12.5" on a variety of parts. Sets include a micrometer head, specified rods and spacing collars, along with a handle and wrench in a wooden case. With the handle, the tool can be used at depths either beyond reach or otherwise inaccessible.

### Features:

- Spindle lock.
- Sizes marked on interchangeable extension rods for easy identification.
- Handle included for hard-to-reach places.
- Satin-chrome finish for easy reading.
- Includes wooden case (264 and 265 only).

## UNIMASTER Universal Measuring Instrument

TESA UNIMASTER Universal Measuring Instrument's durable construction is designed for the direct measurement of especially large internal and external dimensions. It is an accurate easy-to-handle instrument that can be positioned horizontally or vertically while maintaining a constant measuring force. An integrated makes it easy to view the culmination point.

## UNITEST Internal Micrometer

The Unitest Internal Micrometer measures along the Instrument axis with two-point contact on the work piece. It is a precise, easy to handle Instrument that can be positioned horizontally or vertically while measuring a constant measuring force. An integrated dial Indicator makes it easy to view the culmination point.

The Unitest provides direct measurement of Internal and External dimensions from 8"(200mm) to 56"(1400mm). The Instrument consists of the measuring head with fixed anvil and the measuring plunger a set of extensions with integral gage rod, and positioning accessories.

For the direct measurement of Internal and External dimensions from 8"(200mm) to 56"(1400mm) similar to the Unimaster, but lighter constructions with extension only 1" diameter (26mm dia).

**INOTEST Comparative Measuring Instrument**

Allows for comparative measurement of large internal or external dimensions. Consists of a measuring element with interchangeable inserts as well as a set of extensions. Since there is no material measure, the indication is set using a separate standard that can either be a gauge block, setting ring or horizontal measuring bench.

## LEVER-TYPE DIAL TEST INDICATORS

074111370

**INTERAPID 312 - inch regular models**

These dial test indicators have particularly large measuring spans:

- Robust construction
- Mounting through dovetail clamp and Ø 4 mm swivelling shank
- Bidirectional measuring
- Continuous clockwise pointer rotation

No	EDP	in	in	Ø in	in	in
074111370	42774	.060	.0005	1-1/2	0 ÷ 15 ÷ 0	.65
074111371	86150	.060	.0005	1-1/5	0 ÷ 15 ÷ 0	.65

074111373	41681	.016	.0001	1-1/5	0 ÷ 4 ÷ 0	.65

- Lever system with friction drive to prevent overload
- Declaration of conformity
- Rotating dial
- Accuracy: see table on page G-7
- Very low measuring force see table on page G-3
- Supplied in a plastic case with:  
1 with a Ø 2mm insert in hardened steel.  
1 stylus key No. 01860307

074111377

## INTERRAPID Magnetic stands

Permanent magnet base holders have become the favorite holder for setup and checking work-in-process among machinists, toolmakers and inspectors.

Featuring articulating arm and dovetail clamp with fine adjustment, these bases provide precise setting of gage, widely used for high accuracy measuring with high resolution indicators and electronic gages.

## MEASURING STANDS

**Medium Size Magnetic Bases - Series 7746 MAGNICATOR**

599-7746

## Designation

599-7746-1	45396	Magnicator with swivel upright
599-7746-2	44908	Magnicator with fixed upright

**Medium Size Magnetic Bases - Omnibase Permanent Magnetic Base Indicator Holder**

Magnetic base, multipurpose indicator holder. Attaches and adheres securely to any shape or contour. May be used with coolant systems, lamps and other suitable devices. 70 steel segments conform simply and precisely to any shape or contour. Cam-lock mechanism provides for easy and accurate fine adjustment of the steel segments.

With a 599-7052 Dovetail Attachment (included) the unit accommodates AGD and BesTest Indicators for all your fixturing needs.

## Designation

599-7720	51945	Omnibase permanent magnetic base

adjustment of steel  
segments.

Includes 599-7052  
Dovetail attachment  
to accommodate  
AGD and BesTest  
Indicators

7764, 7765  
Channel in base for use on round or flat surfaces.  
Fingertip release for easy positioning and removal.  
7762, 7763, 7760,  
7761  
Vee base for round or flat surfaces.

## Small Size Magnetic Bases - MITI-MITE Series

599-7765

599-7761

599-7762

			Description	Base, in: L x W x H	Post Type
599-7764	44918		Heavy Duty	4 x 1.25 x .75	Ball & Socket
599-7765	44919		Heavy Duty with Fine Adjust.	4 x 1.25 x .75	Ball & Socket
599-7762	44916		Medium Duty	1.25 x 1.25 x 1.75	Fixed Upright
599-7763	44917		Medium Duty with Fine Adjust.	1.25 x 1.25 x 1.75	Fixed Upright
599-7760	44914		Medium Duty	1.25 x 1.25 x 1.75	Ball & Socket
599-7761	44915		Medium Duty with Fine Adjust.	1.25 x 1.25 x 1.75	Ball & Socket

Indicator includes automatic reversal and swiveling contact point. Monobloc (precision watch) body design. Universal dovetail mounting from top, bottom, and end.

Plastic case.

Base has Ball and Socket to increase reach and orientation. Fine adjustment simplifies setup. Threaded post segments are easily interchanged to suit and application.

Base includes three posts:  
.219" dia. x 1.5" long  
.219" dia. x 4.375" long  
.312" dia. x 1.5" long  
Indicator: 1" diameter dial and .5" long carbide tip with .080" dia. ball tip.

## Small Size Magnetic Bases - MITI-MITE Magnetic Base with BesTest® Indicator Set

MITI-MITE's permanent magnet "V" base is only 1.25" square x 1.75" high and attaches solidly to rounded as well as flat surfaces. Ball and socket action provides reach and orientation not possible with fixed post holders. A fine adjustment simplifies setup. Threaded post segments are easily changed to suit the application.

### **Combination Squares - Depth Gage Protractor**

Semicircular Protractor graduated from 0 to 180 degrees in opposite directions to facilitate checking and setting angles.

599-618

### **Combination Squares - No. 615 Rule Depth Gage**

Range 0 to 5" with 6" rule. Rules are graduated in 32nds and 64ths. Head is hardened steel 2-1/2" long, 1/8" wide.

599-615-1

## Combination Squares

### No. 555 Adjustable Double Squares

Chrome finished blade, hardened and ground square head provide means for laying out and measuring with a single tool. Blade locks securely in set position in head.

599-555-1

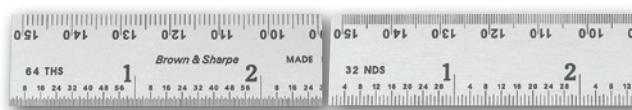

<b>No</b>	<b>EDP</b>		Blade length, in	in	mm

## Magnetic Rules

High powered magnets set into rules for hands-free use.

- Set consists of 6", 12" and 24" Brown & Sharpe chrome-plated tempered steel rules with magnet inserts in wooden storage case.

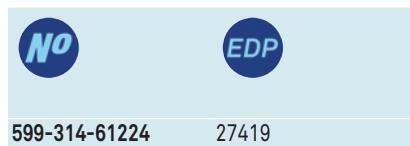

599-314-61224M

## Pre-Certified Rule Sets

For ISO/QS 9000 requirements.

- Set consists of 6", 12" and 24" Brown & Sharpe chrome-plated tempered steel rules, NIST certification, and wooden storage case.
- Certified for ISO applications.

## Value-Line Sine Bar

The VALUE-LINE 5" Sine Bar is a must for all machinist tool boxes for quickly measuring the desired angles in machine setups.

- Hardened and precision ground.
- Body size 1".
- 5" distance between centers of rolls within .0003".
- Supplied with back plate.

Also available in a Set, including:

- 1 sine bar
- 18 risers with a range of 1/2° to 15° resulting angle, including 2 risers providing "taper-per-foot" of 1/4° and 1/2°.
- Custom fitted molded case.

598-291-500

598-291-600

No	EDP	=	Designation
598-291-500	26986		Value-Line sine bar
598-291-600	27264		Value-Line sine bar set with risers

- Hardened alloy steel
- Removable front stop
- 5 µm / .0003 in.

## Precision Adjustable Angle Block Set

Precision ground angle block -- ideal for drilling, milling, grinding and setup tasks

- 3-3/4" wide by 1-3/4" thick by 2" high
- Approximately 1-3/4" work capacity
- Angle accuracy  $\pm 10'$ ; squareness within .0002"
- Hardened to 50-55 RC
- Includes fitted wooden case.

599-750-25

599-750-25	27397	Designation Adjustable angle block set

## Ultra Precision 17-Piece Angle Block Set

Complete with a protective wood case.

- Made from hardened steel.
- Ideal for grinding and milling machine applications.
- Furnished in custom wooden case.

599-921-17

599-921-17	26893	Designation 17 piece angle block set

**TESA MICRO-HITE 350 / 600 / 900**

For more details about TESA MICRO-HITE Gages, see the TESA catalog chapter N.

All MICRO-HITE models feature a fine adjust, located on the measuring wheel.

600: 38 kg  
900: 45 kg
- 11,5 x 10-6 K-1
- Fixed zero

## HITE-CHEK Jr. Height

The HITE-CHEK Jr. Height Transfer/Squareness Gage is built to handle a wide variety of surface plate jobs. Its low-center-of-gravity base virtually eliminates vibration in the upright post. The location of the post on the base permits maximum extension of the indicator with sufficient rigidity to assure accurate readings, even for hard-to-reach features.

A swivel clamp anchors the swivel and indicator mounting for added precision

The fine adjustment control knob, located in the base, has a large diameter for precise control.

For checking squareness, the rear surface of the gage is designed with a reference surface that can be squared against a master with an optional BESTEST® indicator.

The base of the HITE-CHEK Jr. Height Transfer/Squareness Gage is 3.5" x 2.5" x 1.300" high.

Includes 4" long, straight indicator rod and clamp. Indicator mounting has rod .22" diameter on one end and a .25" on the other.

HITE-CHEK Jr.  
checks squareness

599-585-1

599-585-1

27547

HITE-CHEK Jr. height transfer/squareness gage

## Universal Surface Gages

Rod adjusts quickly and locks at any angle. Fine adjustment by small knurled nut. Hardened base has V-groove for cylindrical work and two gage pins for use against edge of surface plate or T-slot of machine table.

When used with optional dial holding rod 599-7048 and BESTEST® dial indicator numbers 621 and 622, surface gages reach places inaccessible to large dial indicators.

No	EDP	$\emptyset$	Upright Diameter, in	Base Dimensions, in	Length of Uprights, in

## TESA AXIAL PROBES, 8 MM DIAMETER

**GT 21 / GT22 Standard probes,  $\pm 1 \text{ mm}$ , 4.3 mm travel ()**

Universal probes for common but constraining applications.

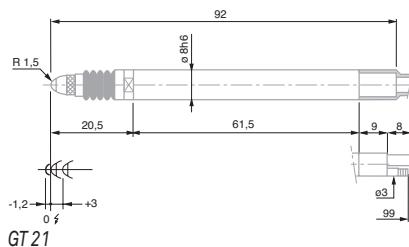

- 8 mm diameter probe housing. Can be clamped over its entire length.
  - Measuring bolt mounted on a ball bearing.
  - Both the probe housing and ball-bearing guide are separate from one another, so that the measuring bolt moves easily even if the probe is not clamped appropriately.
  - Degree of protection IP65 according to IEC 60529.
  - Wide range of accessories including measuring inserts, spring sets, etc.
- For more information, please see the TESA corresponding products.

\* to 0 electric (N) ± 25% deviation limit. Available in vertical mounting position, facing down, and static measuring rod.

\*\* For a range of 10% to the last value of the measuring range.

\*\*\* Distance from Electrical zero.

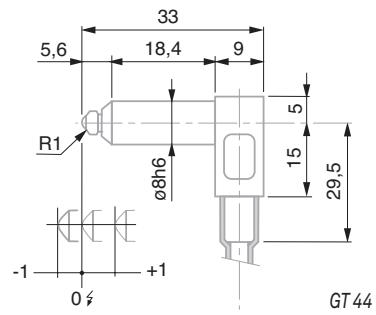

## GT 44 minaiture probes, ± 1.0 mm, 2.1 mm range

TESA Axial Miniature Probes Standard probes.

Compact probes specially designed for use where there's no room for longer probes – Possible assembly on measuring heads for bore measurement and the like.

## GT31 Lever type probes $\pm 0,3 \text{ mm}$ , $0,7 \text{ mm}$ measuring travel, inclinable lever

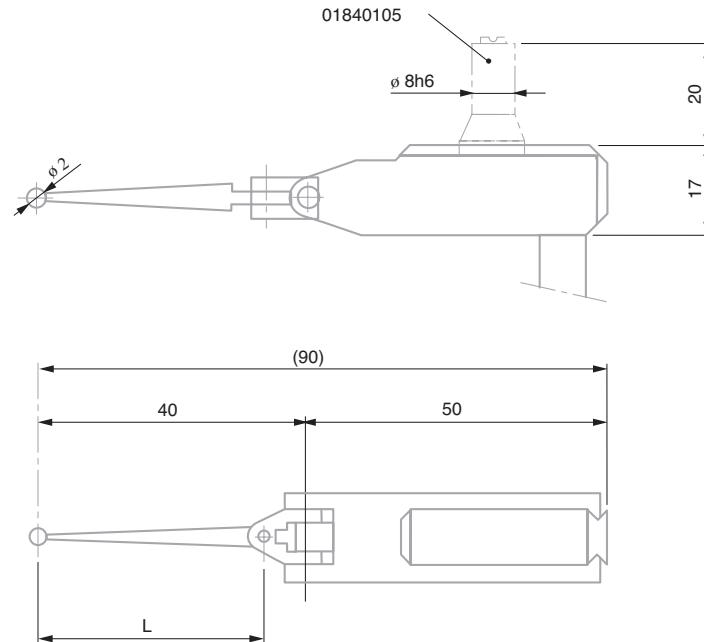

### TESA GT 31 Lever Probes

Models with inclinable probe insert for measuring in two directions – Well suited for use where probes with measuring bolt moving lengthwise can not be conveniently operated.

- Ball-bearing balanced lever.
- Interchangeable probe insert fitted with a tungsten carbide ball tip, inclinable through to  $180^\circ$ .
- Automatic reversal of the probing direction while that of the indication remains unchanged.
- Protected against shocks by 2 safety clutches.
- One-piece housing provided with 2 dovetails.

\*\*\* Distance from Electrical zero.

- DIN 32876 Part 1
- All-metal housing, matt-chromium finish
- 13 kHz ( $\pm 5\%$ ) drive frequency. Highest mechanical frequency to 25 Hz.
- 5°C to 60°C
- IP40 (IEC 60529)
- Declaration of conformity
- 2 dovetail attachments. Both lower and upper stops are fixed.  
Probe inserts with removable stainless steel shaft. Also with a 2 mm carbide ball tip. For all other inserts, see under optional accessories on next pages. 2 m long cable. 5-pin DIN 45322 connector.
- Moved mass 12 g

## Telescoping Gages - Series 591 Telescoping Individual Gages

Satin-chrome finished. Individual gages are completely assembled with handle. Knurled lock maintains the setting of the measuring arms to permit sizing with a micrometer, Dial-Cal or vernier caliper.

Available individually or in sets of 4 or 6 gages.

## Ultra Precision Wavy Parallel Set

Reliable and precise vertical positioning of workpieces.

- Parallel within  $\pm 0002"$  - paired  $\pm 0002"$ .
- Made of high quality spring steel, hardened, stress relieved and precision ground.
- Includes 9 pairs 4-1/4" in length, with the following heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2".
- Shims can be compressed, which proves useful in the holding of thin parts.

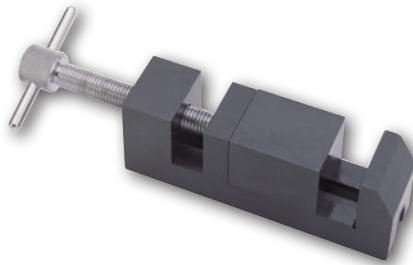

599-921-25

27279

Wavy parallel set supplied in fitted wooden case

### Toolmaker's - Vice

Handy for use in drilling, fitting and laying out work on surface plates. Tongue on large jaw slides in groove in base and is held in place by a strap that prevents jaw from lifting. 1-15/16" capacity. Furnished with two steel jaws as shown.

599-752-3

51852

Designation  
Toolmaker's Vise

### Toolmaker's - Clamps

Steel, case hardened. Ends of jaws chamfered for clamping under shoulder or in recess. Clip holds loose jaw in position when clamp screw is released, a convenient and original Brown & Sharpe feature.

## Universal 1-2-3 Blocks Set

Consisting of a matched pair of 1" x 2" x 3" blocks, five plated 5/16" - 18" socket head cap screws and a hex key wrench.

- Each block is precision ground and case hardened on all 6 surfaces.
- Surface finish 6 to 16 micro-inches.
- Squareness on all sides to .0001".
- There are a total of 11 holes on three faces. Five 5/16" - 18" tapped holes arranged for holding down and for conversion to an angle plate. Six holes drilled through with deep recesses for easy clamping.
- Blocks are oversized to allow for normal lapping to .0003".

599-750-50

27396

Designation  
Complete set supplied in "shop-hardened" molded case

## Precision Ground "1-2-3" Positioning Block Set

Supplied in custom molded case. Ideal for precision layout and setup.

- Each block is ground and case hardened on all six surfaces
- Surface finish 6 to 16 microinches
- Squareness on all sides to .0001" per inch
- 23 holes: 5 tapped 3/8-16
- Oversized to allow for normal tapping .0001" - .0003"
- Case hardened to 50-60 HRC
- Set consists of a pair of 1 x 2 x 3 inches blocks, five 3/8 - 16 stainless steel socket head cap screws and key wrench

Hardened steel, 55 to 60 HRC

Each block has 18 through bores each 9.53 mm diameter, and also 5 x M10 threaded bores

2.5 µm for all 6 faces

Supplied with five M10 socket head screws and one 8 mm socket wrench

7 µm for each pair

599-750-10

26764

Designation  
Complet set supplied in custom molded case

	Hardened steel
	Resting and vee faces both with ground finish.
	Not available as single components

## Ultra Wee-Vee Blocks

Unique universal holding tool for small, miniature or intricate parts. Ideal holding fixture for grinding / indexing punches and pins, drilling, milling, EDM, and inspection on optical comparators.

### Features:

- Capacity .30" to 9/32".
- Furnished with bridges to straddle long workpieces, allowing top hold-down screw of V-block clamp to be used.
- Sides and ends are square within .0005".
- V's of pairs central and parallel within .0003".
- Set contains 2 90° Ultra Wee-Vee Blocks, size A .30" -5/32 capacity and size B .050" -9/32" capacity; Bridge A and B; 5 Upper Prisms 1/8", 5/32" and 3/16" capacity; two clamps; in a fitted case.

599-749-101	88128	Complete set Extra Clamp

## V-Block and Clamps No. 745 - V-block and clamp

Versatile tool for grinding, milling or drilling. Can be used on its base, end or sides. Case hardened and ground. Two V's, four tapped holes 3/8 in - 16 UNC.

Central hole in "V" for removing pins or drilling. Forged clamp has adjustable side screw to support the block and prevent tilting.

Work Capacity: 1-5/16" (33mm) approximate diameter.

Dimensions: 1-7/8" (48mm) sq. 3-5/8" (92mm) long.

Accuracy: All surfaces (except V's) parallel and square within .0002". Long V-groove is central, parallel and square with all surfaces within .0003". Half inch V-groove is central, parallel and square with all surface within .00015". V's are 90° + .000°/- .0003".

 No	 EDP	=

599-9745-10	45206	One block and clamp Clamp only

## V-Block and Clamps No. 749-1 - V-blocks Clamp

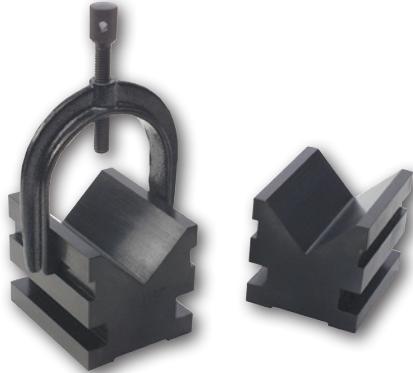

For larger and heavier work. Made in numbered pairs from mild steel. Set consists of two blocks and one clamp. Blocks feature two clamping grooves. Lower grooves permit blocks to be clamped to table.

Dimensions: 2-1/2" (64mm) square. 3" (76mm) long.

Work capacity is approximatively 1/2" to 2-1/2" (13mm to 64mm) diameter.

Accuracy: Sides are square with each other within .003". Ends are square with sides within .003". V-groove is parallel and central with sides within .002".

V-groove is 90° +/- 1/2°. V's of pairs are central and parallel to each other within .004".

## Tungsten Carbide Point

Interchangeable point for Style 1 Scriber (599-778-1) for scribing lines on glass and hard surfaces

<b>No</b>	<b>EDP</b>
599-9778-12	45217

### **Combination Scriber/ Magnet**

Carbide Scriber end marks anything from aluminum to glass or hardened steel. Permanent magnet end picks up small parts. Cap with pocket clip fits either end.

599-766 (sold in units of 10)

<b>No</b>	<b>EDP</b>
599-776	44583

### **Retractable Carbide Point Scriber**

Fine line Carbide Scriber with replaceable point. Works like a pen to retract point and save pockets. Satin anodized aluminum body.

599-777 (sold in units of 12)

<b>No</b>	<b>EDP</b>	<b>=</b>	Designation
599-777	44584		Retractable Carbide Point Scriber
599-777-1	44585		Replacement point for 599-777

### Carbide Point Double-End Scriber

Fixed, non-replaceable carbide points provide rigidity and long life. Pencil grip permits comfortable manipulation, using either the straight or right-angle point. Complete with non-replaceable straight and right-angle points.

**No**      **EDP**

599-779-4      45370

### Replaceable Point Double-End Scriber

Improved for easier handling. Permits fast, easy replacement of straight and right-angle points for crisp marking of a wide range of materials. Replaces 599-779-3.

**No**      **EDP**

Designation

599-779-5      46391      Replaceable Point Double-End Scriber

599-779-23      46425      Replacement point for 599-779-5

### Right-Angle Point

**No**      **EDP**

Designation

599-779-34      46477      Right-Angle Point      Supplied with straight and right-angle points with an 8-32" thread size

## Pocket Tool Set

Set contains indispensable tools for scribing, marking, locating, and removing chips. Supplied in convenient pocket protector case, with extra room for your pen, 6" scale and other frequently used tools.

## Carbide Point Scriber:

Scribes fine, clean lines for layouts. Point retracts like a pen and is easily replaced if damaged. Clips in pocket saver. Satin anodized aluminum body is pen-sized for comfort and dexterity.

## Automatic Center Punch:

Adjustable impact for use with many materials. Repeats. Compression adjusts by turning knurled cap for light or heavy impact. Corrosion-resistant blue anodized body is pen-sized for easy handling.

## Plunger Release Magnet:

Removes chips and ferrous dust from holes and slots as small as 1/4". Red anodized body with pocket clip. For locating screws or pins in recesses, inserting small parts, bearings, and other hard-to-handle components in awkward positions.

brown &amp; sharpe

## Edge Finders

Locate round or flat work easily within .0005". Fully hardened and precision ground. Rated up to 1,000 RPM. To use, just place in a standard 1/2" diameter collet or chuck. As the collet or chuck rotates and approaches the edge of the work, the head moves sideways about 1/32", and the center of the finder is exactly one-half of the head diameter away from the edge of the work.

## Audible Edge Finders

Audible Edge Finders help assure accuracy by releasing an audible click when the tip jumps.

This allows the operator to listen as well as watch the tool.

- Available in three sizes: 1/2 in, 3/8 in, and 10 mm.
- Hardened and ground on all working surfaces.

## Tap Guide

Adjustable spring tensioned tap guide with 1/2" body. Case hardened and knurled with male and female points. Supplied in a black plastic case.

<b>No</b>	<b>EDP</b>
599-792-30	27051

## Magnetic Toolmaker's Knee

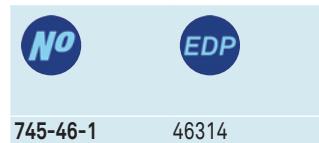

Designed to hold work magnetically for inspection and layout work. Very useful for holding odd-shaped parts for grinding.

Accuracy:

- Parallelism within .0002" (.005 mm)
- Squareness: .00005" per inch (.5 µm per cm)  
for the three working faces

Size:

- Overall size: 4.25" x 6.5" x 4.75"
- Magnetic surface: 4.25" x 6.5"

## No. 255 Permanent Magnet Block

Fine-pole top plate is specially designed for holding small work. Working surface and base of block are ground parallel. Back end is square with the working surface. One side and one end stop plate are furnished.

### No. 750-4 Permanent Magnet Block

Holds work in contact with the V faces. Block is accurately ground and faces of V-groove are hardened. Removable stop plate furnished for back end of block."V" takes round stock to 1-3/4" diameter. Sides and bottom are parallel to vee to .001" and vee is central within .001".

## Chuck Parallels

Available in finished and semi-finished models. Both hold work which cannot be held easily on a magnetic chuck due to projecting surfaces. Readily trued, eliminates the delay of truing a large chuck surface. For use on Permanent Magnet chucks and electro-magnetic chucks.

Finished Chuck parallels are ground parallel on opposite sides and at right angles on adjacent sides. Can be used on all four sides but not on their ends. Available only in numbered matched pairs.

Semi-finished chuck parallels are specially suited for manufacturers who wish to finish parallels to conform to their specific holding requirements. Similar to finished chuck parallels described above, except they are not ground to such close tolerances.

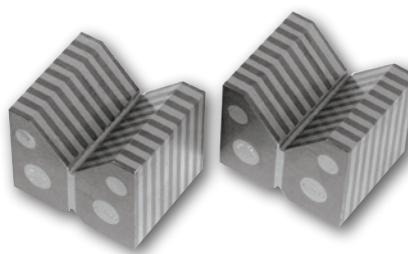

The lamination pitch is .136".

No	EDP	Dimensions, in	lb(s)
745-124-2	26968	1 x 2 x 4	4
745-125-2	26969	1 x 2 x 3-15/16	3

## Chuck V-Blocks

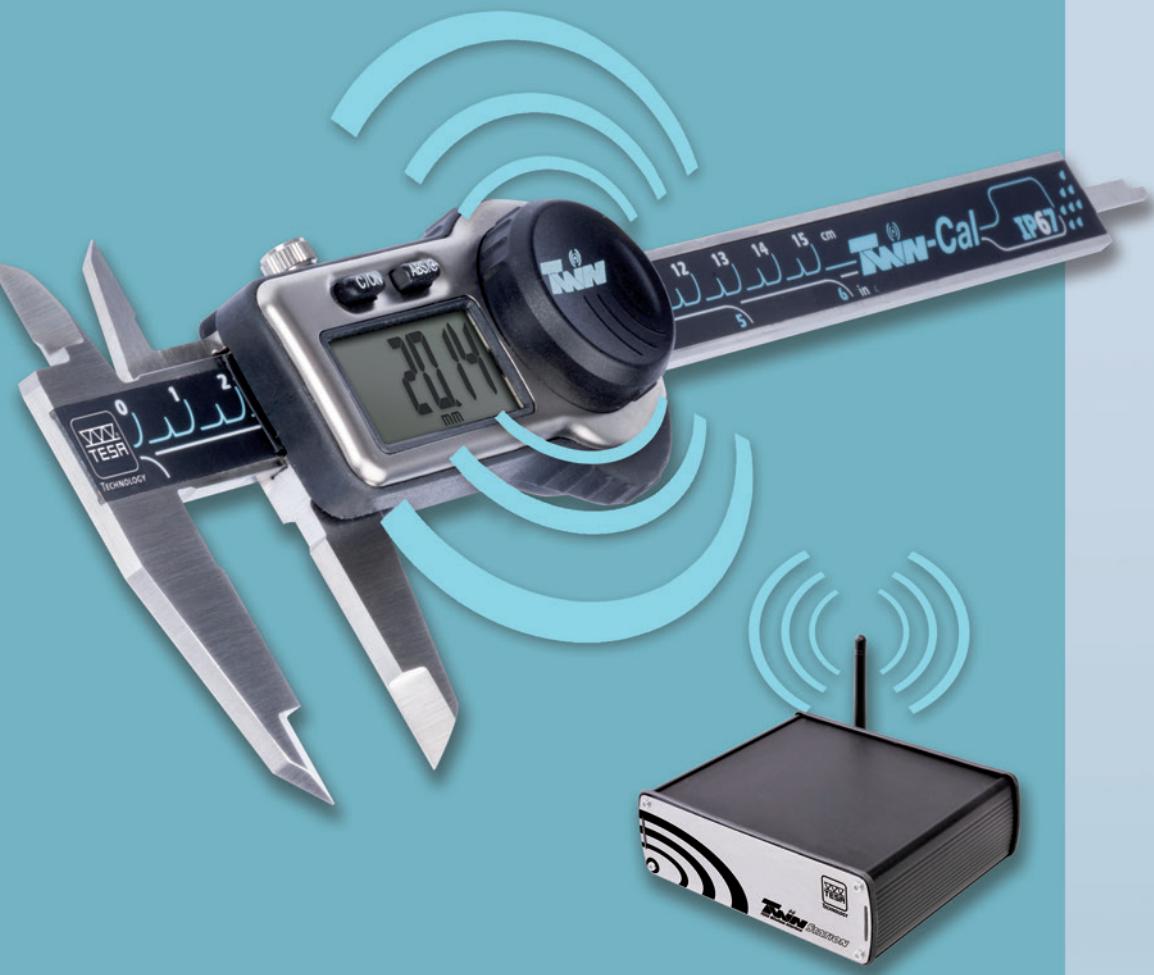

Made of alternating steel and non-magnetic spacing strips. For use on Permanent Magnet and electromagnetic chucks. Used individually or in pairs. Blocks have a 90° V-slot accurately ground along its 2" length to .0005" central parallel and square with all surfaces except ends. Sides parallel to .0003" adjacent sides square to .0003". Lamination pitch is .136".

No	EDP	Dimensions, in	lb(s)
745-755-2	26966	Single V-block	2-3/8 x 1-7/8 x 2
745-756-2	26967	Pair of V-blocks	2-3/8 x 1-7/8 x 2

# Connectivity

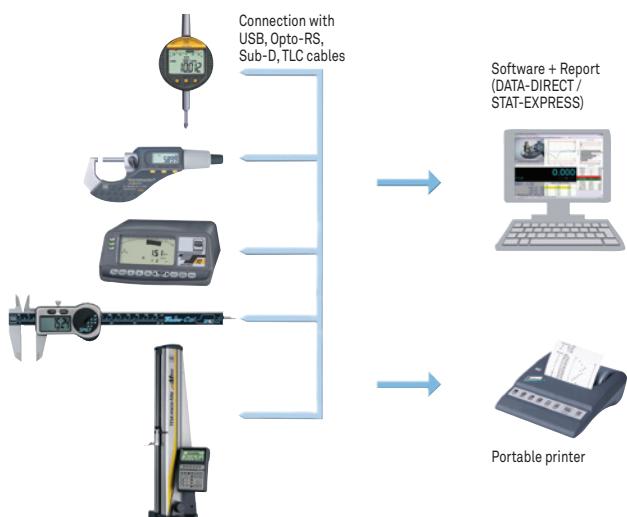

# TESA SOFTWARE, CABLES AND LINKS FOR THE TRANSFER OF MEASURING RESULTS.

*Inspection, traceability and cost reduction have a growing significance in all industrial sectors. This requires not only high quality metrology instruments, but also software suitable for evaluation and further analysis of the measurements carried out.*

PRODUCTION	INSPECTION	EVALUATION	ARCHIVING	
				<b>TESA DATA-DIRECT</b> List of measurements, archiving, customised results calculations, traceability, statistics.
				<b>TESA STAT-EXPRESS</b> Statistical analysis of measurements, control charts, traceability and sharing of results.
				<b>TESA PRINTER SPC</b> Simple statistics, without the need for a PC, documented traceability.
	Measuring instrument	Software or portable printer	Database Printed report	Electronic file (PDF)

*TESA offers various types of connection between measuring instruments and a PC as well as software for the management of results so that the production process can be optimised, quality improved and documents for traceability can be created.*

## DATA-DIRECT Software

DATA-DIRECT software is an easy way to collect and report results in real time from the majority of the measuring instruments in the TESA range that have a data output.

DATA-DIRECT is supplied not only with serial input/output drivers specially configured for TESA's products, but also for those purchased from other manufacturers. It works effectively to give data transfer for your data sheets, database, statistical modules or any other Windows-based applications.

With this user-friendly software you will be able to create your own reports for component inspection.

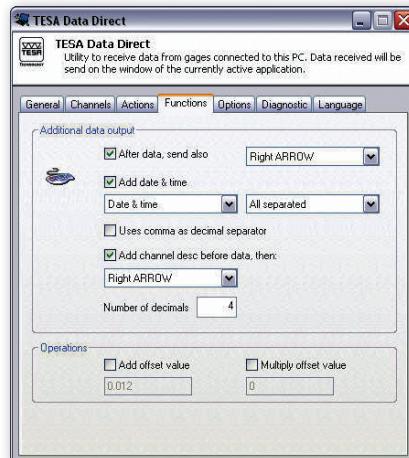

Minimum system requirements to run DATA-DIRECT:

- Pentium 4 or equivalent
- 512 MB RAM (live memory)
- 10 GB HD
- Windows XP, Windows 7 (32 or 64 bits) or Windows 8 (32 or 64 bits)

Please contact your TESA representative or an authorised distributor for a 30-day demo version.

### TESA DATA-DIRECT Software

TESA Instruments compatible with DATA-DIRECT	Opto-RS Cables – Opto-USB Cables – Height gauges (TESA-HITE, MICRO-HITE) – USB probes – Surface roughness gauges RUGOSURF 10 / 20 / 10G / 90G – TPS presetting bench – BPX probe interface – TWIN-STATION wireless probe interface – TESA wireless systems – TLC-TWIN wireless transceiver
Other instruments compatible with DATA-DIRECT	Custom made instruments with RS232 output – Instruments from other makers: Mitutoyo: DMX3 - DMX8 – Steinwald single 6 – Etc.
Functions	Export of results to .csv file – ASCII commands – Real time display of measured results on a PC (except for models using the Rf-USB receiver)

## STAT-EXPRESS Software

STAT-EXPRESS is a dedicated software package that enables the application of quality assurance into your manufacturing processes. It allows the downloading, reporting, transfer and storage of your quality-oriented control charts.

STAT-EXPRESS is compatible with all TESA's products – from calipers through to CMM or Vision machines. As an integrated software tool, STAT-EXPRESS provides the flexibility required for easy data transfer from most of the electronic gauges currently available on the market.

STAT-EXPRESS offers the ability to create reports including measured values obtained from a single instrument or several handtools, assign tolerances, calculate statistics, print out various measurement reports, compute XR control charts, and much more.

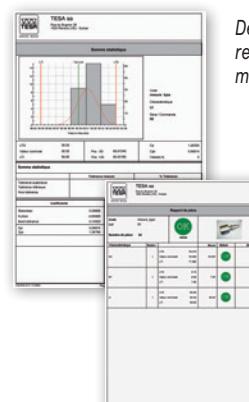

*Measuring display with the option of adding operational instructions, accompanied with a photo or drawing*

**Minimum system requirements to run STAT-EXPRESS:**

- Pentium 4 or equivalent
- 512 MB RAM (live memory)
- 10 GB HD
- Windows XP, Windows 7 (32 or 64 bits) or Windows 8 (32 or 64 bits)

Please contact your TESA representative or an authorised distributor for a 30-day demo version.

*Detailed measuring report for each feature measured*

*Detailed measuring report for each part measured, together with serial number*

## TESA Portable SPC PRINTER

TESA portable intelligent printer designed for the inspection of finished parts or incoming goods – Provides SPC statistics and prints out measurement results with graphical representations.

The TESA SPC PRINTER can be connected not only to TESA measuring instruments, but also to those provided with a DIGIMATIC output – Your TESA SPC PRINTER is capable of recognising the plug in tool and will execute the appropriate configuration automatically.

TESA SPC Printer

- Memory capacity : 9999 single values for one feature per sample.
- Two operating modes: "Normal" and "Tolerance".
- Limits of size quickly set on the display of the connected instrument with subsequent transfer to TESA PRINTER SPC.
- Output of statistical values printed out with graphical representations.
- Output of reports with headings to be filled in by the operator.
- Hardcopies printed in preferred language (English, German, French, Italian or Spanish).
- Battery-powered (6 V) printer unit for use on the move (optional).

**06430000** SPC PRINTER EU  
Portable. With memory, SPC, value classification and graphs. RS232 interface

*DELIVERED WITH THE FOLLOWING ACCESSORIES:*

## Wireless Connection for TWIN-STATION Receiver

The ultimate in flexibility and freedom of movement.

TESA TLC-TWIN wireless technology offers the flexibility of a hand tool thanks to bidirectional communication made possible by an instrument equipped with a TLC (TESA Link Connector) also compatible with the:

- TLC-TWIN-emitter/receiver station
- TLC-USB connecting cable
- TLC-Digimatic connecting cable.

\*\*\* The sale of the TLC-TWIN is currently restricted to EU countries, Switzerland USA and Canada  
 \*\*\* Please contact TESA for further information.

Up to 48 instruments can be managed by the TWIN-STATION receiver over a maximum range of 12 m.

The IP67 degree of protection of an instrument is preserved, even when the TLC-TWIN is connected.

When a visual check that the measured result has been sent to the computer is not possible, an indication on the display of the instrument enables the user to confirm that the result has been sent and received.

## TWIN-STATION Receiver

TWIN-STATION: Receiver for wireless TLC-TWIN emitter-receiver units

Receives input signals from wireless TLC-TWIN emitter-receiver units

Output signals – digital, RS232

- Direct connection to a PC via the USB port.
- Optimal use for your measuring tasks as up to 48 instruments equipped with TLC-TWIN can be connected to this unit.
- Great reliability.

\*\*\* the sale of TWIN-STATION is currently limited to EU countries, Switzerland, USA and Canada

\*\*\* Please contact TESA for further details.

05030012	TWIN-STATION for TLC-TWIN wireless data transmission	48			Power supply via: - USB port of the PC - connected USB hub - USB hub of the BPX interface	0,85

## Transfer of Results with TESA LINK CONNECTOR TLC

TESA presents its new connectivity concept: the TLC connector that allows freedom of movement, flexibility, and ease of use, all combined.

Once an instrument is equipped with a TLC connector:

- 1) There is no longer any need to choose between a model with or without data output.
- 2) There is inbuilt compatibility for both cable and wireless connectivity.
- 3) A TLC connector can also be used for connection to a USB interface, a DIGIMATIC interface or for wireless connection, using a suitable cable or emitter-receiver unit, see table below:

Instrument equipped with a TLC connector. For example, TESA TWIN-CAL IP67 caliper

Wireless connection

Cable connection

TLC-TWIN  
Two way wireless emitter-receiver unit

TLC-USB  
Two way communication cable

TLC-DIGIMATIC  
Two way communication cable

+

TWIN-STATION receiver base station for signals from the wireless TLC emitter-receiver unit

+

Interface with USB port

+

DIGIMATIC\* interface

Personal computer

\* Please check with TESA for the list of equipment and instruments compatible with TESA-DIGIMATIC

Housing case in aluminium

Power supply via the connection of the USB cable: - directly to the PC (USB Port) to a mains powered USB hub

IP 40 (IEC 60529) (DIN 40050)

IEC/EN 61326-1 U.S. 47 CFR part 15, subpart B, Class B digital device

Data transfer delay from digital serial output (USB): depends on the operating system of the computer.

RS232

55 x 172 x 155 mm (H x W x D)

USB Cable 1,80 m

For a temperature of 20° C and a relative humidity of ≤ 50%: Digital output: ± (0,05 + 0,15% of the measuring range)

## OPTO AND SUB-D CONNECTION

### Standard Opto Connection

Any connecting cable is defined by each of the connectors fitted at either end of the cable principally to suit the computer, and the measuring instrument being used. To achieve highest compatibility levels, TESA uses only standardized and proven connectors.

Examples of instruments with type Opto connector:

TESA-CAL IP67 / IP65 – TESA MICROMASTER – TESA IMICRO –  
 TESA ALESOMETRE – TESA DIGICO 10 / 11 / 205 / 305 / 400 / 500 / 600 / 705 –  
 TESATRONIC TT20 / TT60 / TT80 / TT90 – INTERAPID - Light

No	=	L, m	Connection (to instrument)	Connection (to PC or system)

# Calipers

## THE ESSENTIALS

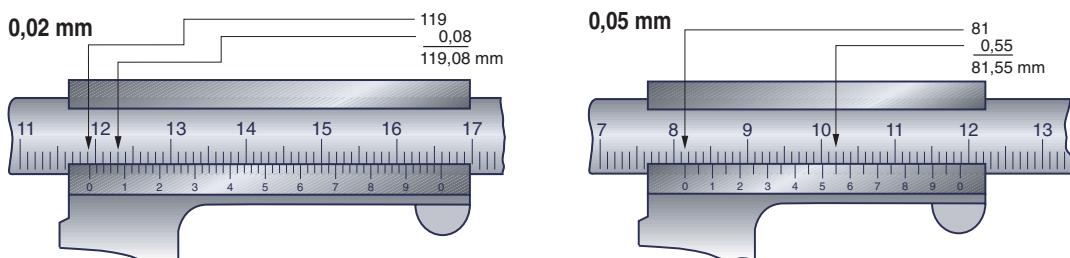

Calipers are the most popular length measuring instruments used worldwide. Owing to their simple construction, ease of handling and quick operation, they are a favourite for dimensional measurement. The wide variety of models available with specialised measuring faces make them universal hand-held tools.

All TESA, ETALON, INTERAPID branded calipers are recognised for their superior quality – and guarantee you precise measurement.

The flawless guide of the slider on the beam ensures silky-smooth operation whilst also preventing the measuring jaws from tilting.

The choice of material, subjected to precisely defined heat treatment as well as a robust design result in further distinctive advantages such as wear and corrosion resistance.

For quick and easy reading of measured values – one of the essential conditions for the assurance of your measurements – we offer conventional vernier models as well as dial models for easy reading and digital models for error-free reading.

			0,1 mm 0,05 mm		0,02 mm		0,01 mm
Chosen Length L mm			μm		μm		μm
50			50		20		20
100			50		20		20
150			50		30		30
300			50		30		30
400			60		30		30
500			70		30		30
600			80		30		30
700			90		40		40
800			100		40		40
900			110		40		40
1000			120		40		40
1200			140		50		
1400			160		50		
1600			180		60		
1800			200		60		
2000			220		60		

The max. permissible errors ( $G$ ) are expressed by the equation given below, where the values should be rounded down to two decimal fractions (0,01 mm). These errors apply for measurements taken under the same measuring force. For all other measurements, including those performed with use of the depth foot, the values obtained have to be increased by 20 μm.  
 Calipers with dial or vernier reading to 0,1 or 0,05 mm :  

$$G = (20 + l / 10 \text{ mm}) \mu\text{m} \geq 50 \mu\text{m}$$
  
 Calipers with analogue indication (scale or vernier reading to 0,02 mm) or digital indication :  

$$G = (22 + l / 50 \text{ mm}) \mu\text{m}$$

## TWIN-CAL IP67

Welcome to the new generation of TESA electronic calipers, with the highest degree of protection ever offered.

The TWIN-CAL IP67 are all equipped with TLC (TESA Link Connector), the unique integral data output facility, providing the opportunity to upgrade your caliper at any time.

No	mm	in	Drive system / Thumb Roller	A mm	B mm	C mm	g	Depth rod

## TESA VALUELINES IP67

TESA Valueline is designed to meet customer demand for affordable products that don't compromise on the expertise associated with TESA.

With TESA technology at their core, these products are of guaranteed quality.

No.	mm	in	Drive system/ thumb roller	A mm	B mm	C mm	g	Depth rod

00539393	300	12	With	64	22	106	280	Square

### OPTIONAL ACCESSORIES:

01961000   Lithium battery, 3V, CR2032

00560013   Depth foot for calipers up to 150 mm

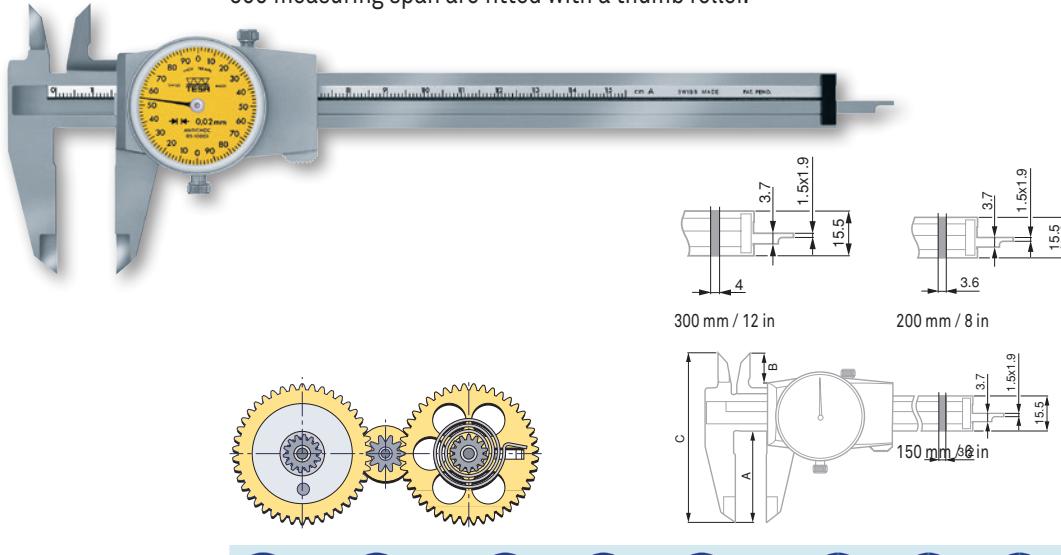

## DIAL CALIPERS

The dial caliper is the favourite instrument of many professionals working in mechanics, as it is an ideal tool for the workshop.

All dial calipers use the original shockproof technology developed and patented in 1970 by TESA, pioneer of this technology. Thanks to the shockproof system inserted between the mobile measuring element and the mechanism of the dial pointer, this patent guarantees reliable measurements even in case of a shock to the instrument.

### Models TESA CCMA-M

Easy-to-read dial calipers – Slider with metal dial housing – Models with a 200 or 300 measuring span are fitted with a thumb roller.

					Thumb roller	A mm	B mm	C mm

0051610365 Magnetic magnifying glass, 3x magnification

## WORKSHOP DIGITAL CALIPERS

Large-dimension calipers are equipped with a very precise measuring system and flawless guide of the slider on the beam. This know-how makes them the most accurate calipers available on the market.

The range of IP67 calipers guarantees the highest level of protection against the penetration of dust and liquids. The TLC (TESA Link Connector) system built into all the TwinCal calipers provides the connection of these instruments to a PC for the easy acquisition of measurement data. The unique display housing, protected by a steel plate surrounded with a rubber seal guarantees durability and offers fine sensitivity during measurement.

### TWIN-CAL IP67 – Models with Rounded Measuring Faces for Internal Dimensions

- Complete IP67 protection against the penetration of dust and liquids, even when the cable is connected.
- Unique TWIN connectivity concept allowing for upgrade across the range.

## DIGITAL DEPTH CALIPERS

The range of IP67 calipers guarantees the highest level of protection against the penetration of dust and liquids. The TLC (TESA Link Connector) system built into all the TWIN-CAL calipers provides the connection of these instruments to a PC for the easy acquisition of measurement data. The unique display housing, protected by a steel plate surrounded with a rubber seal guarantees durability and offers fine sensitivity during measurement.

## SCALE UNITS

The IP67 scale units assure the highest degree of protection against the penetration of dust and liquids.

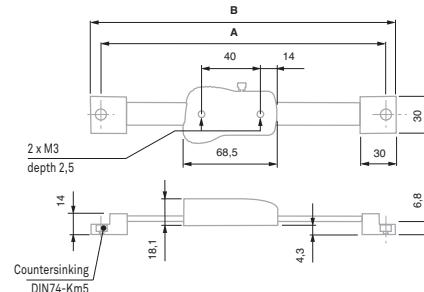

The integral TLC (TESA Link Connector) connectivity system common to all the TWIN-CAL range allows the connection of all these instruments to a PC for easy data acquisition.

The unique display module, protected by a steel plate surrounded by rubber seal guarantees optimal durability and sensitivity during measurement.

### TWIN-CAL IP67 Horizontal Scale Unit

- Complete IP67 protection against the penetration of dust and liquids, even when the cable is connected
- Unique TWIN connectivity concept allowing for upgrade across the range

# External Micrometers

## PRECISION MEASUREMENT

Precision measurement requires the use of micrometers. In 1848, the first measuring tool of this type was patented by the French inventor Jean Laurent Palmer as "calibre à vis et à vernier circulaire" (screw caliper with a circular vernier). Today, we continue to make external micrometers with these typical features. The introduction of the micrometer to the mechanical world came about due to the visit of the two American engineers, Joseph R. Brown and Lucian Sharpe to the Paris Exhibition in 1867. At that time, their attention was drawn to Palmer's invention, which greatly interested them. After some improvements of Palmer's design, the product was manufactured on a large scale and marketed successfully by the two partners. History repeated itself years later as TESA SA decided to manufacture external micrometers, making them the first products produced by the company.

Whether for internal or external measurement, TESA micrometers are distinguishable for their construction and quality. All our models respect the ABBE principle with the exception of the models with large mearing anvils for the measurement of gear teeth for example.

Max. permissible errors

\* Including the errors of the measuring element as well as any deviations in the flatness and parallelism of the measuring faces, plus any errors due to the flexing of the frame.

State of the art machining techniques are used for grinding the micrometer spindles, to ensure extreme accuracy and a true reproduction of the thread with negligible pitch deviations. For this reason we can guarantee a very low measuring uncertainty to our instrument users. TESA micrometers are designed to meet the most exacting demands. They are robust and ergonomically designed.

We offer an extensive range of micrometers, from a classic model through to micrometers for special applications, and also micrometer heads, complete sets, accessories and all items needed for calibration. They are available in analogue or digital versions, and also digital versions with results output.

## MICRO-ETALON 225 - Precision Micrometers with a Dial Indicator

Feature a mobile anvil along with a built-in dial indicator. Ideal for comparative measurements on small part series. The nominal dimension is set on the micrometer while deviations are read on the dial indicator. Retractable anvil by means of a push-button. Rotating dial for fine adjustment, also with adjustable tolerance markers.

	mm	
072108669	0 ÷ 25	Standard inserts

## ISOMASTER AS

### Micrometers with Prismatic Measuring Faces

The micrometer ISOMASTER AS is used for measuring test pieces with an odd number of grooves such as milling cutters, taps, drills and spline shafts as well as polygons. It can also determine roundness errors on cylindrical workpieces.

The aperture angle of the prism is designed for workpees having 3 or 5 flutes or their multiples.

Flank angle mm

00240601	55°	25
00240602	55°	50
00240603	55°	75

- Hardened steel
- Insulating sleeve marked with actual size

Steel wires,  
hardened

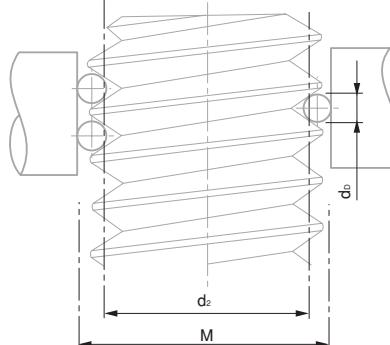

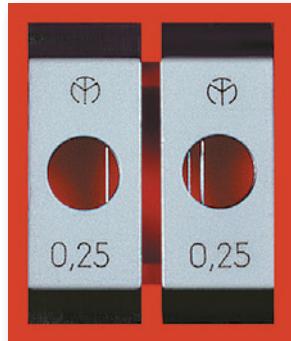

Single  
pairs are  
supplied in a  
plastic box,  
full set in a  
wooden case

Wires are  
mounted on  
holders:  
2-wire holder  
rests on  
anvil while the  
single wire  
holder is used  
on spindle side

## XB Wires for Screw Threads

For measuring pitch diameter of threads using the three-wire method. Actual flank diameter  $d_2$  can either be determined arithmetically or with the aid of the relevant tables based on the measured actual size M – Suitable for all standard micrometers with measuring faces of 6,5 mm diameter.

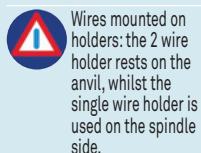

No		Diameter of the wires dD in mm	ISO metric threads Pitch in mm	Whitworth threads Number of threads per in	Unified inch-threads UN, UNC, UNF Number of threads per in

## ISOMASTER AB with Interchangeable Anvils

Lightweight, but rugged anvil micrometers. Set No. 00140101 includes 4 interchangeable anvils with increasing length in steps of 25 mm.

Anvils are adjusted and numbered in pairs, thus rendering any correction of the indication unnecessary whenever an anvil is exchanged.

No	mm	µm	µm
00111901	0 ÷ 100	6	3
00111902	100 ÷ 200	7	4,5

OPTIONAL ACCESSORIES:

00140301 Dial gauge element

Measuring range up to 1500 mm also available upon request.

## Interchangeable Anvils for ISOMASTER AB Series

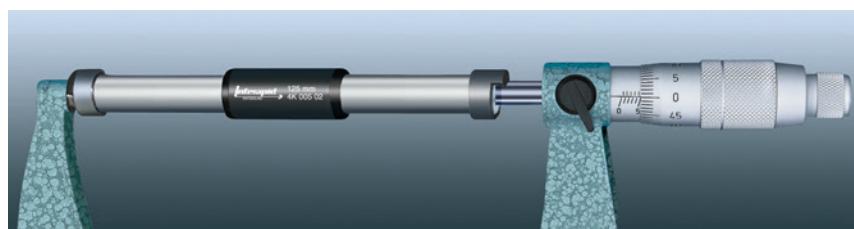

Set of 4 interchangeable anvils with increasing length in steps of 25 mm. The anvils are adjusted and numbered in pairs, thus eliminating the need for resetting the indication when exchanging either of them. Supplied as standard accessories with the AB series micrometers.

	
00140101	Interchangeable anvils AB

	DIN 863 T3 (Style D16) NFE 11-090

 $\geq 90 \text{ to } 120 \text{ mm} = 2,0 \mu\text{m}$   
 $\geq 130 \text{ mm} = 2,5 \mu\text{m}$

- Alloyed steel, hardened

- Diameters in steps of 5 mm ( $\leq 50 \text{ mm}$ ) or 10 mm ( $> 50 \text{ mm}$ ).

## Guide Collars for Setting Standards

Making the positioning of INTERAPID setting standards quick and easy.

		mm		mm
02140103	100 ÷ 175	8		
02140108	200 ÷ 1475	8		

## Micrometer Stands

For external micrometers up to 300 mm as well as many other hand-held tools.

00160201	TESA micrometer stand with clamp aperture 16 mm
072110123	ETALON micrometer stand with clamp aperture 20 mm

-  Length tolerance with reference to the nominal dimension:  $\pm 100 \mu\text{m}$
-  Each set is supplied in a wooden case
-  Flatness tolerances for optical parallels with lengths:  
 $\leq 27,335 \text{ mm}$   
 $= 0,15 \mu\text{m} \geq 52,00 \div 77,335 \text{ mm} = 0,2 \mu\text{m}$
-  Tolerances in parallelism for optical parallels with lengths:  
 $\leq 27,335 \text{ mm}: 0,4 \mu\text{m}$   
 $\geq 52,00 \div 77,335 \text{ mm}: 0,5 \mu\text{m}$
-  31 mm

## Optical Flats with Two Parallel Faces

Used for examining the flatness and parallelism of the measuring faces on external micrometers as well as other similar measuring instruments. The difference in length of the optical flats within a set matches a quarter or a third of the spindle pitch of 0,5 mm.

# Internal Measurement

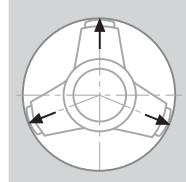

# THE CHALLENGES OF INTERNAL MEASUREMENT

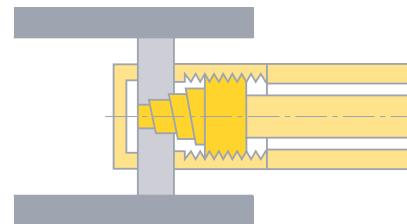

Bore measurement is more difficult than external measurement of components. Apart from the very tight tolerances specified, all measuring elements having a direct influence on the uncertainty of measurement must be designed in such a way that they can fit into the bore to be checked.

## 3-LINE CONTACT OFFERS A TRUE ADVANTAGE

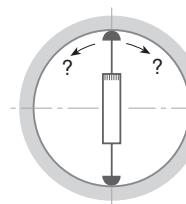

The near perfect auto-centering and auto alignment provided by TESA IMICRO, TESA TRI-O-BOR, ALESOMETER and ETALON INTALOMETER make bore measurement reliable, without the need for an operator to estimate.

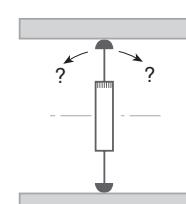

The three measuring bolts are spaced 120° apart, thus providing optimum self-centring.

The measuring bolts with 3-line contact allows the micrometer to align itself parallel to the contact surfaces.

2-point contact measuring instruments are not self-centring. To enable bore measurements, the use of auxiliary means are required.

2-point contact does not permit the tool to align itself in relation to the bore axis.

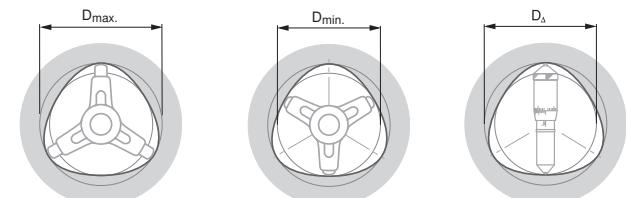

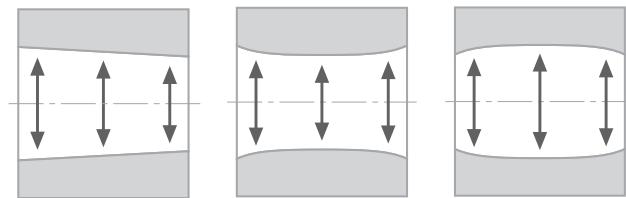

## A SINGLE TOOL CAN REPLACE HUNDREDS OF PLUG GAUGES

Unlike plug gauges that check only one toleranced size, a single tool can measure many diameters. Depending on the model that is being used, through holes and blind bores along with short centring shoulders can be inspected reliably.

## ESTABLISHING FORM ERRORS

Form errors are established through measurements taken at several points within a bore. Micrometers with 3-line contact determine run-out errors in a triangular way. Micrometers with 2-point contact measure medium-size diameters only. They do not allow users to see what makes diameters measured at various points different.

DIN 863 T4  
(Style C1)  
NF E 11-099

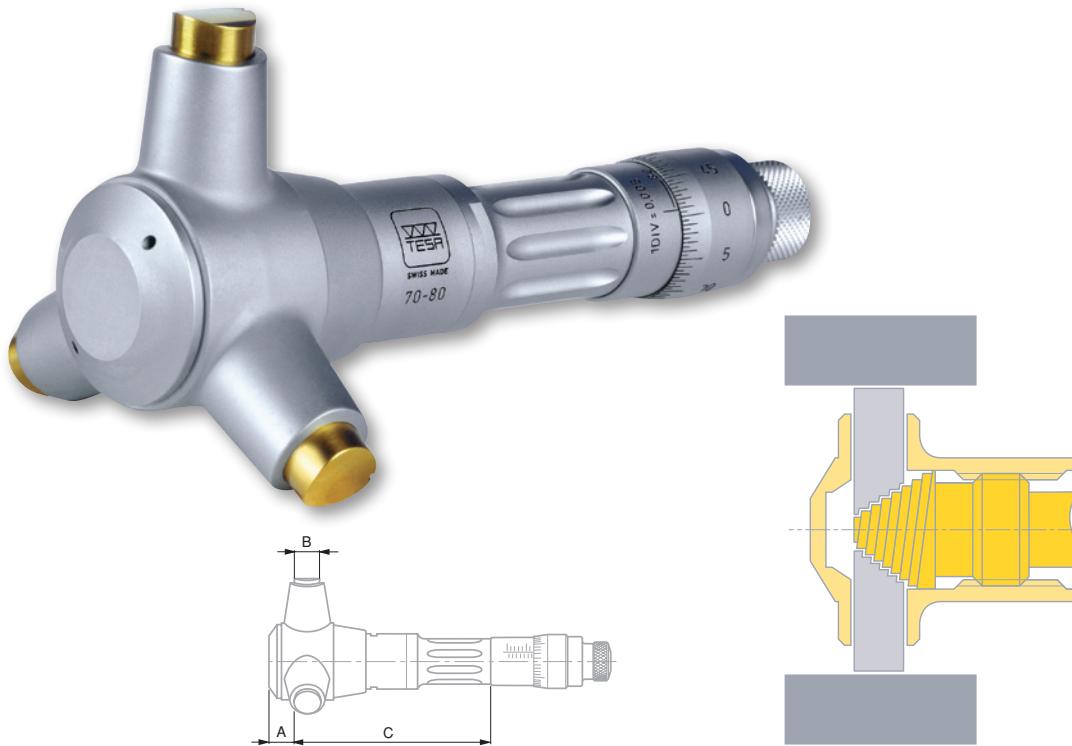

Measuring faces for application ranges from 3,5 to 12 mm:  
hardened steel (HV30 770)  
11 to 100 mm: TiN hard-coating (HV5 2300) 100 to 300 mm: carbide tipped (HV5 1300)

of conformity

## TESA IMICRO with Analogue Indication – Metric

Self-centring and self-aligning internal micrometers. The high-precision thread machined into the measuring cone, combined with the measuring bolts specially arranged to provide 3-line contact, make them the only micrometers in the world that respect the ABBE principle. Measure depth, reliably.

\* Making no allowance for a rim of 1 mm.

\*\* All listed values are determined through a 2-point measurement taken at half-height of the setting ring. The measuring direction is marked with 2 strokes. The measured actual dimension is engraved on every setting master.

# Measuring Instruments for Large Dimensions

## TESA – THE SPECIALISTS FOR LONG LENGTHS

For large dimensions from 250 mm up to several meters, TESA offers various types of measuring instruments that have long proven their value in practical use.

Whatever the sizes, from a simple distance between two surfaces parallel to one another measurement is always a challenge. Apart from the usual influences, which are proportional to the size whilst adding to your contributions in the uncertainty budget, those due to gravity play a key role in distortion.

Large sizes in mechanical engineering generally mean dimensions in excess of 500 mm. Various measurement procedures are brought into play, using such items as large internal and external micrometers with two-point contact, periphery tapes (for outside diameters), V-bases, rotating measuring disks (rolling-contact) optical systems (triangulation with theodolite), fixed gauges (inside caliper gauges), gauge blocks combinations or adjustable telescopic gauges.

There are other methods that often call for very simple techniques, such as fixed gauges (caliper gauges), combinations of gauge blocks, or even adjustable telescopic gauges.

Here's an example of a proportional relationship. With a bore of Ø 1200 H7, the tolerance area matches 0,1 mm. Reducing both values by a factor of 100 would give a manufacturing tolerance as low as 1 µm. Of course, things are not as simple, but this example gives some ideas about the proportions.

	DIN 863 T4 (Style B)
	Micrometer: 25 mm
	Dial gauge: $\pm 0,22$ mm
	Micrometer and dial gauge: 0,01 mm
	Micrometer: 0,1 mm
	8 $\mu$ m
	Measuring bolts: Spherical and for measuring in the micrometer axis. All inserts are interchangeable
	Extension: 1 spherical and 1 flat measuring face
	0,5 mm
	Tungsten carbide tipped
	0,7 to 1 N
	Extension: 26 mm dia. steel tube with snap-ring system. Also with built-in gauge rods.
	Wooden case
	Setting standard with identification number
	Calibration certificate: • per setting standard • per measuring element • per extension

## TESA UNITEST Internal Micrometer

Measures internal dimensions in the micrometer's axis with 2-point contact with the workpiece to be checked – Optional accessories are available for inspecting centring shoulders and blind bores along with auxiliary means for external measuring.

Extensions with built-in gauge rods can be mounted on the measuring element, thus allowing any dimension within the application range to be measured, directly.

			mm

01162301	Auxiliary elements for external measurement		Measuring depth: $\leq 10$	
01140801	Suspension device, complete		Measuring depth: $\leq 100$	

## TESA UNIMASTER Universal Measuring Instrument

TESA UNIMASTER Universal Measuring Instrument provides the features necessary for direct measurement of specially large internal and external dimensions.

TESA UNIMASTER is similar to internal micrometers with two-point contact with the workpiece being measured. Measures any dimension within the extended application range directly by simply adding the needed extensions with built-in gauge blocks to the measuring element.

Accurate, robust and easy-to-handle – Can be used either vertically or horizontally with a constant measuring force – Incorporates a lever-type dial test indicator that clearly shows the culmination point – Ensures stable measuring owing to both a negligible deflection and thermal protection on each extension.

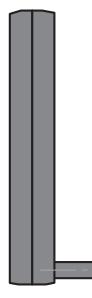

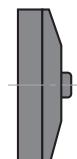

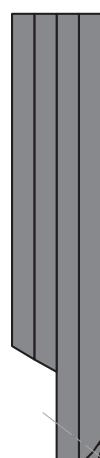

- DIN 863 T4

## TESA INOTEST Comparative Measuring Instrument

Allows for comparative measurement of large internal or external dimensions.

Consists of a measuring element with interchangeable inserts as well as a set of extensions. Since there is no material measure, the indication is set using a separate standard that can either be a gauge block, setting ring or horizontal measuring bench.

Measuring inserts for inspection in the tool axis, or offset inserts – Vertical or horizontal position of use – Integrated dial gauge to show the culmination point – Constant measuring force – Extensions with heat insulating grip.

- 10 mm
- 0,01 mm
- Measuring bold and extension: Tungsten carbide tipped
- 4 tp 7N. Reversible probing direction to allow both internal and external measuring.
- Watertight dial gauge No. 01470104 and 01480100
- Measuring bolts supplied in pairs:
  - No. 01131901 for internal measuring in the instrument axis.
  - No. 01131902 for internal/external measurement, measuring depth up to 30 mm from the lower edge of the tool
- Extension: 25 mm dia. steel tube. 19 mm dia telescopic tube that can be clamped
- Mobile ball-bearing anvil under spring pressure, 10 mm travel
- For additional technical data: see chapter Indicators
- Plastic case
- Dial gauge with serial number
- Dial gauge with inspection report

# Dial gauges – Electronic and Analogue

# EASY-TO-USE AND VERSATILE

For more than 50 years we have been producing and distributing a wide range of easy-to-use and versatile dial gauges. Our experience allows us to offer a wide choice of different models.

- Electronic indicators with combined analogue/digital display using the most up-to-date technology.
- Mechanical dial gauges equipped with high-precision movements and double-action shockproof mechanisms. Measuring spans up to 100 mm.

## CHOICE OF DIAL GAUGE OR ELECTRONIC INDICATOR

- Digital indication provides error-free reading of the measured value. There is no need to read fractions of scale divisions.
- Analogue indication offers the advantage of being able to smoothly adjust the increase or decrease of the dimension to be measured on the workpiece. This type of indication is best suited for dynamic measurements such as determining axial and radial runout errors.
- Electronic indicators provide many additional functions compared to the mechanical models. For more information, refer to the section on electronic indicators.
- The inspection of axial and radial runout errors frequently requires the use of instruments with the lowest hysteresis characteristic. Our electronic indicators, precision dial gauges and dial test indicators meet this requirement.
- In order to significantly reduce the effect of systematic errors, it is recommended to carry out comparative measurements. Only deviations from the nominal dimension will be displayed. High precision, small range electronic indicators are the ideal instruments for these types of measurements.
- These same instruments also enable avoiding major errors in reading millimetres.

## STANDARDS AND DEFINITIONS

The international ISO 463:2006 standard replaces national standards dealing with mechanical dial gauges. All the same, new definitions and standard requirements pertaining to measuring procedures, although valid, imply changes in design and metrological characteristics, which cannot be entirely indicated in this catalogue. This standard, is defined in the matrix "Product Specification (GPS) – dimensional measuring instruments". It only defines the requirements for the most important characteristics.

Therefore, all tolerance limits indicated in this catalogue which refer to metrological characteristics are based on our own internal standards.

Electronic indicators and short range precision indicators. Definitions used in this section:

Total permissible error in 1 measuring direction over the entire measuring range within the partial measuring range

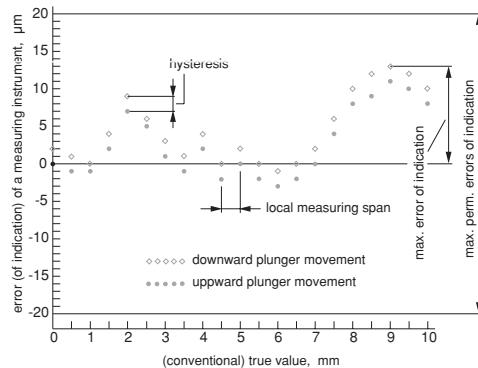

in the 2 measuring directions

Repeatability limit

Max. hysteresis

Mechanical dial gauges.

Definitions used in this section for the maximum permissible errors of a metrological characteristic (MPE):

Deviation span (error of indication within the measuring range)

Deviation span (error of indication) within the partial measuring range

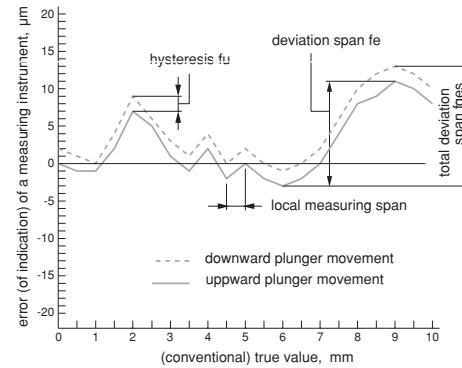

Total deviation span (error of indication within the measuring range)

Repeatability limit (reliability) of indication

Hysteresis of indication

	Resolution 0,01 mm = $\pm 0,25$ mm Resolution to 0,001 mm = $\pm 0,025$ mm

## TESA DIGICO 1 / 2

These two indicators are remarkable for their multiple simple functions, long measuring travel and high accuracy.

- Analogue/digital display combined with the possibility of orienting the analogue display in different positions.
- Zero setting at any point within the measuring span.
- Data input via the keypad.
- Counting direction reversible.
- Entry of limit values for classification through displayed symbols. Additional green, red or amber coloured background whenever the instrument is connected to mains.
- Storage of measured values through the functions: "Maximum value", "Minimum value" or "Maximum value minus minimum value".

## TESA DIGICO 12

Designed to operate in a rugged environment, resistant to spray of liquids (IP65)  
– 44 mm dial diameter – Provides the advantages of mechanical precision with digital reading

### TESA DIGICO 12 – Standard

- 44 mm dial casing diameter.
- Resistant against cutting oils and coolants (IP65).
- RS232 SIMPLEX data output combined with external power supply.
- Inductive measuring system, patented.
- Choice between absolute "ABS" and relative "REL" measuring modes.
- Digital display.
- Setting of PRESET value ( $\pm 130$  mm).
- Inverse measuring direction.
- Direct conversion of metric/inch units.
- Automatic shutdown.

- Digit height 6 mm
- 20 µm
- Repeatability: 5 µm
- 0,5 to 0,9 ( $\pm 0,15$ ) N
- Max. 2 m/sec
- Number of measurements per second: 7
- Zero setting of display
- RS232
- 3 V lithium battery, type CR 3032
- Battery life > 3500 hours
- Working temperature range: 5°C to 40°C
- Protection level: IP65 (CEI 629)
- EN 61326-1
- 70 g
- Supplied in transport packing with 1 lithium battery, type CR 2032 (No 01961000)
- Inspection report with a declaration of conformity

	LCD, 5 digits + sign
	Digit height: 6 mm
	Max. permissible error: 4 µm
	Repeatability limit: 2 µm
	0,4 to 0,75 ( $\pm 0,15$ ) N
	Max. 2 m/sec
	Number of measurements per second: 9
	Zero-setting of display
	RS232
	3 V lithium battery, type CR 2032
	Battery life: >4000 hours
	Working temperature range: 5°C to 40°C
	IP65 (CEI 529)
	EN 61326-1
	70 g
	Supplied in transport packing with 1 lithium battery, type CR 2032 (No 01961000)
	Inspection report with a declaration of conformity

## TESA DIGICO 12 – HP

- High precision measuring system.
- Resistant to cutting oils and coolants (IP65).
- Combined analogue/digital display.
- Analogue reading from  $\pm 0.025$  to  $\pm 1.25$  mm.
- NOR/MIN/MAX/MAX-MIN measuring modes.
- 44 mm dial casing diameter.
- RS 232 data output combined with external power supply.
- Inductive measuring system, patented.
- Zero-setting of display.
- Direct conversion of metric/inch units.
- Shut down: either automatic or blocked.

## Accessories for TESA DIGICO 12

03238013	Mounting lug
01961012	Upper lift lever
01960005	Bottom mounted lift lever
04761060	RS 232 cable with external power supply
01961000	Lithium battery, 3V, CR2032

**ETALON HP****High precision comparators****ETALON with short measuring travel**

The ultimate in high precision.

Remarkably reliable, even when constantly used for series inspection – Specially designed for comparative measurements requiring a very low measurement uncertainty – Measures axial and radial runouts with very low hysteresis.

- Shockproof movement. Lever and gear transmission system. Long dead travel.
- Non-reflecting dial for easy readout.
- Measuring travel limited to less than one revolution of pointer. No possibility of reading errors.
- Fine adjustment with protective knob to prevent accidental displacement of the pointer.

	DIN 879-1 Dimensions according to EN ISO 463
	Full-metal dial casing. Stainless steel plunger, hardened.
	$\approx 1\text{ N}$
	Measuring plunger on ball-bearings
	Adjustable tolerance markers. Coupling thread for retraction cable. M2,5 thread for measuring insert
	1 measuring insert already mounted, steel ball tip Ø 3.175 mm. 1 retraction cable.

-  Full-metal dial casing. Mounting shank and plunger in hardened stainless steel
-  With or without shockproof mechanism
-  Adjustable tolerance markers. Thread M2,5 for measuring insert
-  Measuring insert with 3 mm dia. ball tip already mounted
-  Inspection report with a declaration of conformity

## DIAL GAUGES - PREMIUM QUALITY

The TOP quality of our dial gauges guarantee the use of the best and most wear-resistant materials in order to ensure that the most demanding metrological criteria are respected along with a product life that exceeds all other dial gauges

### Dial Ø 40 mm – Reading 0,01 mm

Precision dial gauges

These precision dial gauges combine excellent metrological properties with extra-long life.

- Smooth and regular travel, entirely jewel-mounted movement.
- Full-metal dial casing and bezel.
- Shockproof mechanism in both directions of plunger movement.
- Non-reflecting dial.

# Lever-type Dial Test Indicators

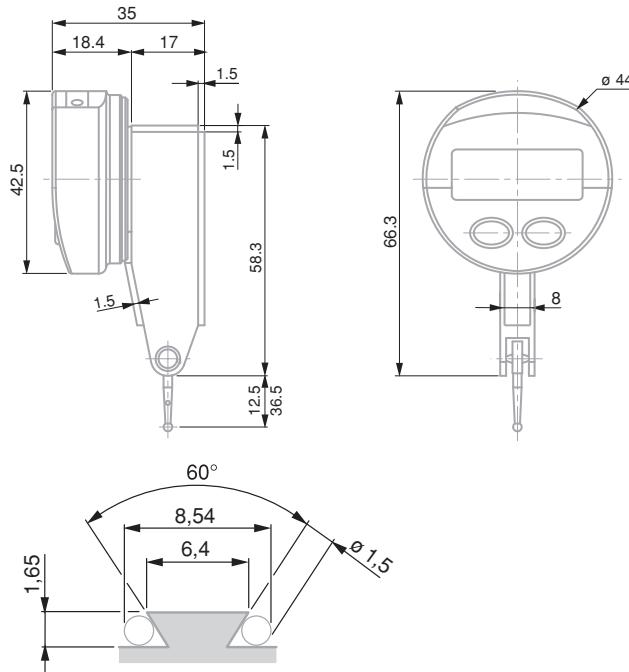

## TESA IP65 Electronic Dial Test Indicators

Provides the advantages of a mechanical test indicator with a digital reading.

- Inductive patented measuring system.
- Analogue and digital indication.
- Digital step of 0,01/0,001 mm.
- Selectable scale division: 10, 20, 50 µm/1, 2, 5 µm.
- Cutting oils and liquid coolant resistant (IP65).
- Metric/inch conversion.
- RS232 data output combined with external power supply.
- Displayed measuring modes (NOR/MIN/MAX/MAX-MIN).
- Automatic shut-down.
- Compatible with all TESATAST accessories.

NO	mm	mm	in	N ( $\pm 15\%$ )	Stem length, mm
01830001	0,8	0,01/0,001	0.0005/0.00005	0,13	12,5
01830002	0,5	0,01/0,001	0.0005/0.00005	0,07	36,5

### OPTIONAL ACCESSORIES:

01961000 Lithium battery, 3V, CR2032

04761060 RS 232 cable with external power supply

Compatible with all TESATAST measuring inserts and accessories

- LCD, 5 digits + unit
- Display digit height 6 mm
- Max. perm. errors:  
 $f_e = 10 \mu m$   
 $f_{ge} = 13 \mu m$   
Pre-span = 0,05 mm
- Repeatability:  
 $f_w = 1 \mu m$
- Hysteresis:  
 $f_v = 3 \mu m$
- L = 12,5 mm;  
max. 0,15 m/s  
L = 36,5 mm;  
max. 0,15 m/s
- Number of measurements per second: 9
- Zero-setting
- RS232
- 3 V lithium battery, type CR2032
- Battery life > 4000 hours
- Operating temperature range: +5°C to +40°C
- Degree of protection: IP65 (IEC 529)
- EN 61326-1
- 73 g (L = 12,5 mm)  
75 g (L = 36,5 mm)
- Supplied in a plastic case with:  
1 Insert with a 2 mm dia. (No. 01860202)  
1 Wrench (No. 01860307)  
1 Mounting rod 8 mm dia. (No. 01840105)

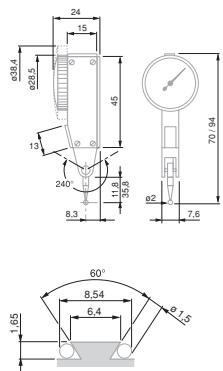

## TESATAST DIAL TEST INDICATORS

These lever-type dial test indicators are especially intended for use on the shop floor or in the inspection room – Ideally suited for comparative measurements on a surface plate, for instance – Determine form, shape and position deviations as well as axial and runout errors.

- Bidirectional measuring with automatic reversal inside the movement.
- Continuous clockwise pointer rotation providing error-free reading.
- Insensitive to magnetic fields.
- Jewelled movement with 7 rubies.
- Ball-bearing lever system. Measuring insert swivelling through to 240°.
- Very low measuring force.
- Exceptionally robust with full-metal construction.

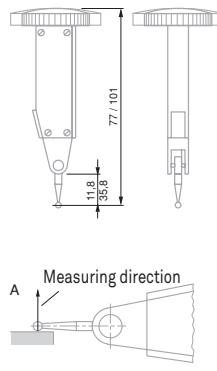

### Standard model

Well proven over thousands of times. The dial face is parallel to the axis of the measuring insert.

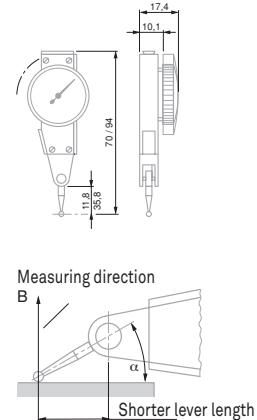

### Perpendicular model

Lever test indicator with dial face mounted at right angle to the axis of the measuring insert.

### Lateral Model

Dial test indicator with dial face mounted parallel to the axis of the measuring insert but on the flat side of the dial housing.

#### Note on the use of TESATAST dial test indicators

With the measuring insert lying parallel to the workpiece surface (Fig. A), these indicators give true reading due to the amplification factor to 1:1.

In another measuring position (angle  $\alpha$  in Fig. B), the effective lever length changes so that the read value needs to be corrected. With respect to this, also refer to the instruction manual.

#### Permissible limits of a metrological characteristic (MPE/MPL)

		0,02 mm	0,01 mm	0,001 mm / 0,002 mm
	Deviation span, $f_e$	27 µm	10 µm	2 µm
	Deviation span within the local measuring span, $f_t$	0,20 mm 0,10 mm 0,02 mm	12 µm 5 µm 1 µm	
	Total deviation span, $f_{ges}$	31 µm	13 µm	3,5 µm
	Repeatability limit, $f_w$	4 µm	3 µm	1 µm
	Max. hysteresis, $f_u$	4 µm	3 µm	1,5 µm
	Measuring force with insert:	Length 36,53 mm	12,53 mm 0,06 N	0,15 N 0,06 N

## INTERAPID 312 LEVER DIAL TEST INDICATORS

INTERAPID 312 Dial Test Indicators very large measuring span – Ideal for inspecting all significant size variations, e.g. on the surface plate – Measures position, form and shape errors.

- Safe reading thanks to secondary pointer totalling the number of revolutions made by the main pointer.
- Bidirectional measuring with automatic reversal within the movement.
- Pointer rotation direction is always constant due to automatic reversal effect.
- Jewelled movement with rubies.
- Ball-bearing lever system. Measuring insert swivelling through 210°.
- Particularly robust due to full-metal construction.
- Monobloc housing with mounting through dovetail clamping and a Ø 4 mm swivelling shank.

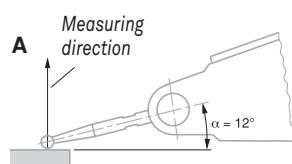

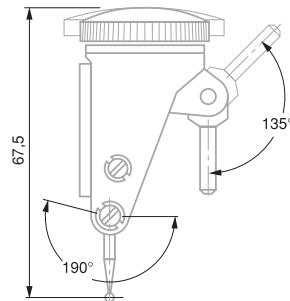

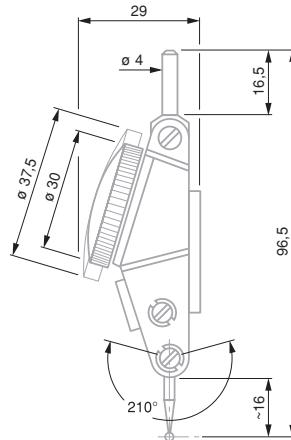

**Stylus insert with angular position of 12°**  
 All models INTERAPID 312 are designed to give a true reading when the angle between the stylus and the workpiece surface is 12° (Fig. A). In any other measuring position, including parallel position of the stylus against the workpiece surface, measured readings have to be corrected accordingly (Fig. B). Please consult the instruction manual on this subject.

### Standard Model

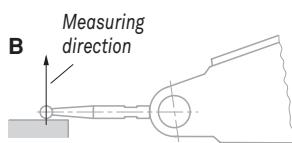

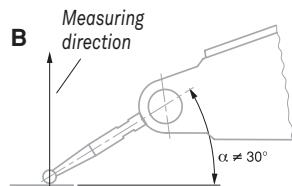

Time-tested dial test indicator. The dial face is mounted parallel to the axis of the insert.

### Perpendicular model

Dial test indicator with dial face mounted at right angle to the axis of the insert.

Permissible limits of a metrological characteristic (MPE/MPL)

	0,01 mm		0,002 mm	
	Pointer revolution	Pointer revolution	Pointer revolution	Pointer revolution

074108942

## COMPAC DIAL TEST INDICATORS

Essential for the workshop, but also in the inspection room or measuring laboratory – Ideal for comparative measurement on a surface plate – Detect form and position errors – Measure axial and radial runouts, especially.

### Technical Features

- Long measuring travel, up to 3 mm.
- Bidirectional measuring, without reversing lever.
- Same rotation direction of pointers in the two measuring directions (clockwise pointer direction).
- Swivelling probe through 180°.
- Main pivot on self-aligning angular bearings, dimensioned oversize.
- Dovetail mounting machined in the indicator housing.
- Dull chrome-plated bezel and housing.
- Rotating dial.
- Insensitive to magnetic fields generated in mechanical workshops.

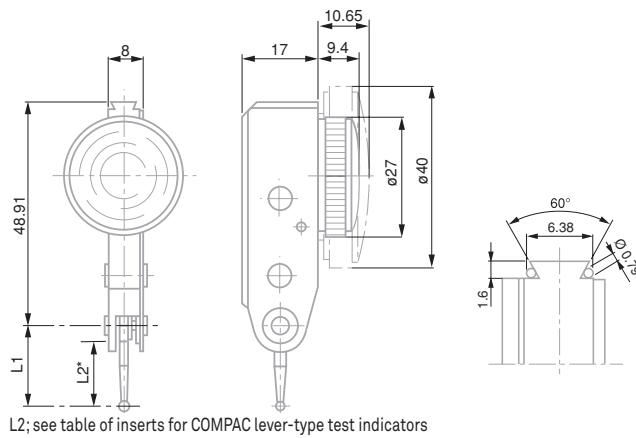

#### Note for use of COMPAC dial test indicators

With the measuring insert lying parallel to the workpiece surface (Fig. A), these dial test indicators give true reading due to the amplification factor of 1:1. In any other measuring position (angle  $\alpha$  in Fig. B), the effective lever length changes. The values indicated need be corrected. In this connection, please consult the instruction manual.

-  DIN 2270 and factory standard
-  Rotating dial
-  Contact points with tungsten carbide ball tips
-  Friction lever system to prevent overload
-  Supplied in a plastic case, including:  
1 contact point,  
2 mm dia.  
1 rigid stem 8 mm dia., L = 15 mm,  
No. 01840107  
1 rigid stem 4 mm dia., L = 15 mm,  
No. 01840109  
(except for series 220).
-  Inspection report with a declaration of conformity

# Comparative Measurement

## TESA TPS - Motorised setting benches

The TPS are designed for setting hand-held measuring instruments and replace a complete set of ring gauges.

The setting bench is typically used with comparative measuring instruments such as dial guages, lever-type dial test indicators or 2-point bore gauges.

TPS is very simple to use: enter the value and the mobile slide will automatically position itself at this value.

It can be used for checking internal as well as external dimensions of up to 1000 mm, according to the model.

Special adapters help to position the instrument, so that is very easy and quick to use and human errors can be avoided.

For versions with dimensions over 1000 mm, please contact TESA.

**CONSISTING OF:**

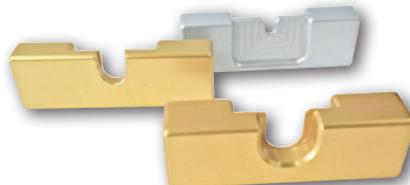

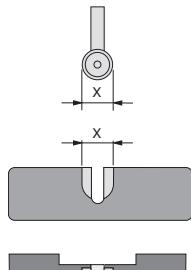

02160038	Power supply 80 ÷ 240 V, 50 ÷ 60 Hz
02160027	Mobile stop adapter

The maximum permissible errors indicated for a metrological characteristic (MPE) have been obtained at a temperature of  $20^\circ \pm 0,5^\circ\text{C}$  and relative humidity of  $50 \pm 5\%$ .

## Accessories for Bore Gauges

Accessories for TESA VERIBOR bore gauges with round foot are available for different application ranges of up to 50 mm.

They offer a perfect setting by blocking the X and Z axis' rotating movements to let only the Y axis moving to find the min. point.

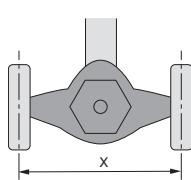

No	mm	X, mm
02160020	4,5 ÷ 6	Ø 4,5
02160021	6 ÷ 12,5	Ø 5,8
S21050003	12 ÷ 25	Ø 9,5
02160023	25 ÷ 50	Ø 17,5

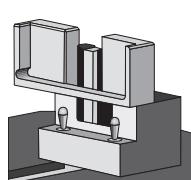

## Accessories for Bore Gauge

Accessories for TESA VERIBOR bore gauges with rectangular foot are available for different application ranges from 50 mm up to 550 mm.

02160027

02160024

No	mm	X, mm
02160024	50 ÷ 150	30 ÷ 55
02160025	150 ÷ 300	55 ÷ 90
02160026	240 ÷ 550	90 ÷ 125
02160043		120 ÷ 170
02160044		170 ÷ 220

Each TESA TPS bench is delivered with an adapter No. 02160027

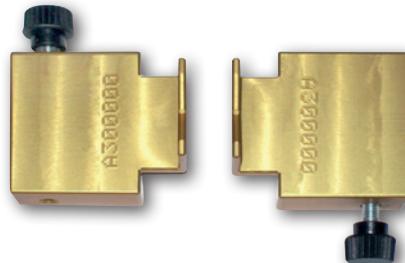

02160027 + 02160024 + TESA VERIBOR

## Accessory for External Micrometers

Set of accessories that allow horizontal alignment of the 2 measuring faces of the external micrometer.

Application range up to 150 mm = 1 piece required

Application range from 150 mm = 2 pieces required

02160029

	
mm	

02160029      40 ÷ 300 / 500 / 1000

Delivered individually

02160029 + TESA MICROMASTER

## Accessory for TESA YA Bore Gauges

TESA YA bore gauges accessory is an assembly of few parts that accept all measuring ranges and make the min. point much easier to find.

02160028 + TESA DIGICO

	
mm	

02160028      6 ÷ 12,5

Delivered with 3 adapter rings for Ø 8, 10 et 14 mm

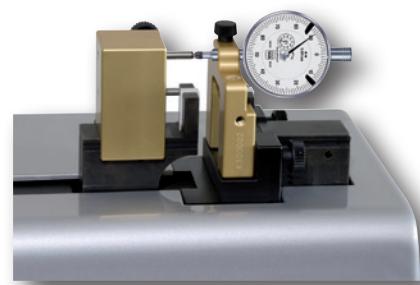

## Accessories for Dial Gauges

A composition of 2 parts for fixing dial gauges on the fixed part of the bench.

02160035

	
02160035	mm 10 ÷ 150

## Accessory for Internal Arm Comparator

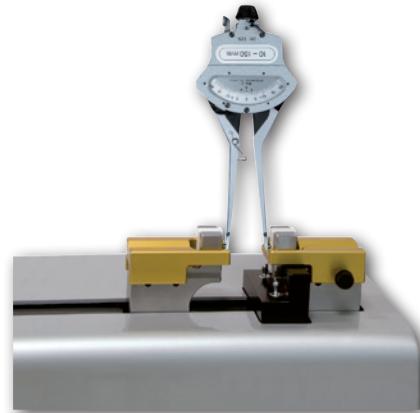

Set of accessories for horizontal alignment of the 2 measuring points, 2 items required.

02160030

	
02160030	mm 10 ÷ 150

Delivered individually

02160030 + TESA IRA 2

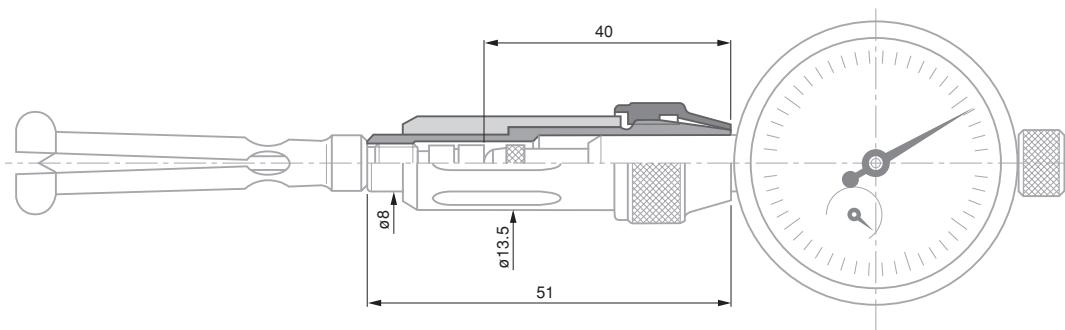

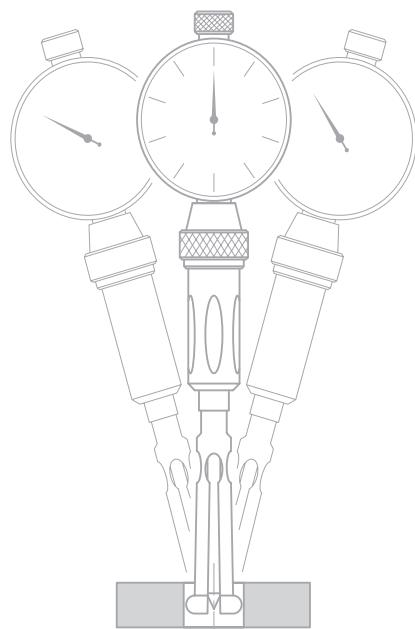

## TESA YA COMPLETE INSTRUMENT SETS

Specially designed for small bores from 0,47 up to 12,20 mm - Checking of dimension and bore form errors through 2-point measuring - Offers an excellent repeatability. The YA bore gauges consist of an interchangeable measuring head with a built-in needle and handle with a 8 mm diameter fixing bore for a dial gauge or any other type of sensor

- Measuring heads with spherical faces for through bores.
- Measuring heads for particularly deep bores.

Can be supplied on request:

- Measuring heads with carbide measuring faces.
- Measuring heads for special applications.
- Measuring heads for blind bores and particularly deep bores with other application ranges.
- Carbide measuring needles.
- Depth extensions 125, 250, 500, 750 and 1000 mm.

1 μm

Reliability of engraved dimension:  
 $\pm 2s = 1 \mu\text{m}$

Measuring head  
in hardened steel  
and carbide,  $\approx 1000$   
HV 25 Measuring  
needles in hardened

## Special Executions

Available upon request :

- Full instrument sets for measuring blind bores and short centering shoulders.
- Measuring heads with tungsten carbide tipped measuring faces.
- Measuring heads for special applications.
- Measuring heads for through bores, particularly deeper ones covering other application ranges.
- Tungsten carbide measuring needles.
- 125, 250, 500, 750 and 1000 mm depth extensions.

## Optional Accessories for TESA YA Bore Gauges

Measuring stand for stationary use.

01639009 INTERAPID UA 30 Support

MUST BE EQUIPPED WITH:

01610201 UK 25 sliding arm.  
Used with TESA YA for stationary bore measurement on UA30 support.

01640000 UAZ 10 depth stop plate for UA 30

## TESA VERIBOR

Proven design and reliability never questioned over decades – Instruments for 2-point measurements for bores from 4,5 up to 550 mm – Detects form errors – Gauge body with a 8 mm diameter clamping bore for a dial gauge, precision indicator or any other sensor.

- Excellent repeatability due to the circular element fixed on the instrument ensuring practically no play.
- Gauge body made of invar steel to neutralise the influence of the operator's hand warmth on the measuring result.
- Centring shoe for correct alignment of the instrument in the bore.
- Tungsten carbide ball tips for high resistance to wear.

4 µm

2 µm

Measuring bolts and anvils in hardened steel, hardness 60 ± 2 and 63 ± 3 HRC, respectively

Mounting for sensor with stem Ø 8h6

Set including  
1 single TESA VERIBOR Light.  
1 set of interchangeable fixed inserts covering the entire application range

## TESA VERIBOR Light

Instrument with 2 contact points for comparative measurement of bores and detection of form errors – Automatic self-centering in the bore – Can be used with a dial gauge, a precision indicator or a probe with Ø 8h6 clamping stem.

No	=		Measuring bolt travel, mm	mm	Measuring depth, mm
05710090	TESA VERIBOR light		1,30	18 ÷ 35	176

Sets delivered without dial gauge

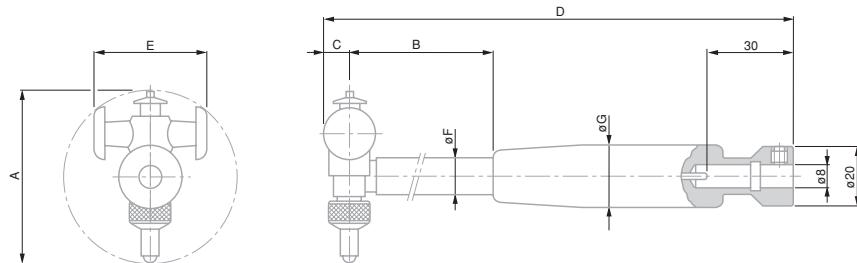

## TESA VERIBOR

- Only VERIBOR without dial gauge: 2 µm
- Only VERIBOR without dial gauge: ± 2s = 0,5 µm
- Measuring bolts and anvils fitted with carbide ball tips
- Mounting for sensor with stem Ø 8 h6 mm
- Set including
  - 1 single TESA VERIBOR.
  - 1 set of interchangeable fixed inserts covering the whole application range.

**Special Versions**

Available on request :

- TESA VERIBOR for blind bores and centring shoulders.
- TESA VERIBOR elbow-shaped for hard-to-reach bores.
- Handtools for measuring the distance between two plan-parallel surfaces.
- Handtools for inspecting gear pitch diameters.

## ACCESSORIES FOR TESA VERIBOR

### Set of Extensions

For extending the application range to Ø 300 mm for VERIBOR No. 05710016.

		
05740001	Set of extensions	Consisting of – 1 Centring shoe – 3 Extensions 50 mm

### Depth Extensions

To be mounted on the body of VERIBOR Ø ≥ 25 ≤ 550 mm for large measuring depths (dimension B in the technical drawing of the VERIBOR).

		
05760029	Extension	1000
05760027	Extension	500

### Dial Gauge Protection Guard

Protects the dial gauge against direct shocks and prevents the dial from being inadvertently rotated.

		
05760013	Protection guard	Ø 58

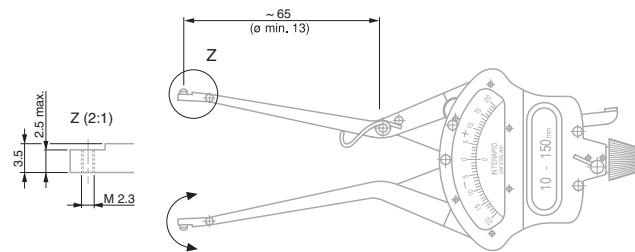

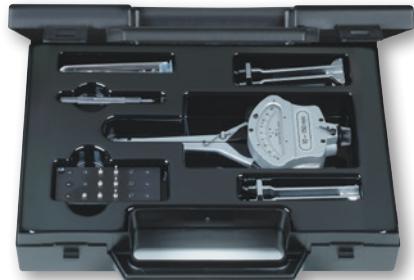

## ARM GAUGES

Very practical comparative measuring instrument – Measures at 2 or 3 points depending on the accessory used – Ideal for blind or through bores – also suited for measuring grooves, flutes as well as the internal measurement of parts with parallel faces.

### IRA 2 Comparative Gauge

- Large application range from 10 to 150 mm
- Easy to handle thanks to its light weight and ergonomic design
- Built-in indicator with 0,01 mm reading and fine setting
- Centering device for 2-point measurement

079105704	INTERAPID IRA 2	mm
079111401	INTERAPID IRA 2, carbide	mm

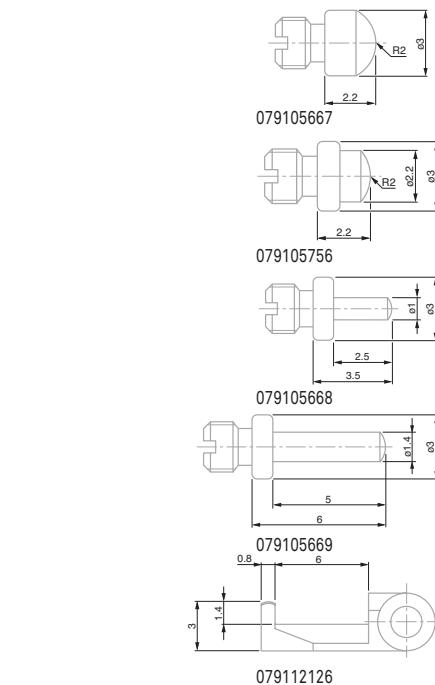

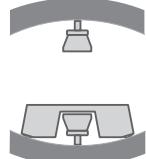

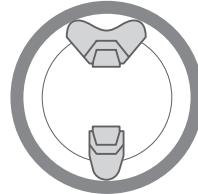

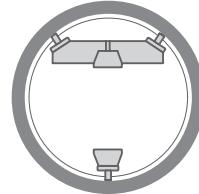

DELIVERED WITH THE FOLLOWING ACCESSORIES:

079105667	3 inserts, hardened steel (order number for 1 unit, with 079105704)
079105756	3 inserts, carbide (order number for 1 unit, with 079111401)
079105668	3 short inserts, hardened steel (order number for 1 unit)
079105669	3 long inserts in hardened steel (order number for 1 unit)
079112126	2 inserts, adjustable for internal dia. >6mm
079110110	Large insert holder for 3-point measurement
079108502	IRA centering arm, Ø 15-30 mm
079110111	Small insert holder for 3-point measurement
079105694	Special screwdriver for IRA set

### Optional Accessories for IRA-2 Comparative Gauge

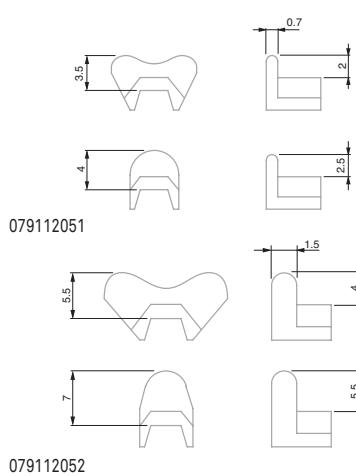

079112051	Small insert set for 3-point measurement
079112052	Long insert set pour 3-point measuring

-  Dial gauge: 5 µm
-  30 mm throat depth.  
Highly stable frame with heat insulating handle.
-  ≈ 2 N
-  Non-interchangeable measuring inserts. With device for retraction of inserts.

## THICKNESS GAUGES

Designed for the direct measurement of thickness of all types of materials:  
plastics, glass, wood, felt, paper, rubber, etc.  
Each gauge is equipped with a rotating dial for zero setting.

### Model for Sheets

				
074115664 Thickness gauge for sheets	mm	mm	Flat, mm	0 ÷ 1 0,001 Ø 6,35

-  Ø 57 mm
-  10 mm
-  Dial gauge: 40 µm
-  Interchangeable measuring inserts

### Models with Open Inserts When Not in Use

## INTERAPID SHE.30 & SHE.35 SMALL HORIZONTAL MEASURING BENCHES

Extremely practical and very precise, these measuring benches are mainly used for the inspection of batches of precision parts as used in the watch making and precision mechanical sectors – Rapid measuring and easy setting from one part to the other – Wide choice of measuring inserts specially designed for the most varied of metrology applications.

### INTERAPID SHE.30 for External Dimensions

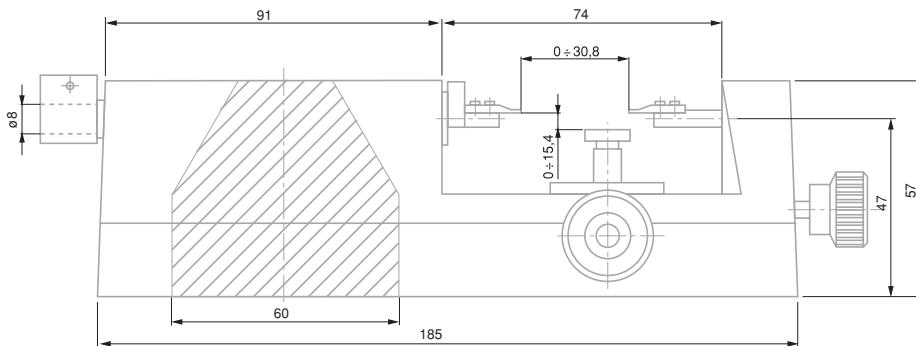

**03330004** INTERAPID SHE 30 small measuring horizontal bench for external dimensions (without measuring inserts)

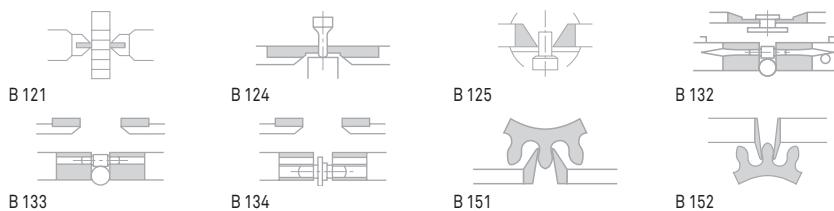

**OPTIONAL ACCESSORY:**

**03360300** Measuring inserts, carbide, length 3,5 mm, height 0,4 mm

Measuring inserts, either cylindrical or knife-edged are available on request.

### Pair of Measuring Inserts in Special Version

0 to 30 mm

Accuracy is usually influenced by the measuring instrument used as well as both flatness and parallelism of the measuring faces of inserts.

Holder precision:  
Flatness tolerance of two clamping faces: 0,05 mm.  
Axial positioning tolerance for the two indexing pins with respect to bolt axis: 0,05 mm. Tolerance for the parallelism of the table surface with respect to the bolt axis: 0,05 mm.  
See drawing

Main body in cast iron. Other parts in steel, hardened and ground

Produced by sensor used. The SHE.30 model is not spring-loaded.

Mobile measuring bolt: guided on a smooth bearing surface and equipped with a semi-circular disc for bolt retraction. Measuring inserts, assembled in pairs, and mounted on the measuring bolt and fixed anvil with a 1 mm diameter pin and 2 M1,4 screws. Support table with possibility of vertical and longitudinal adjustment: Surface 24 x 9,5 mm.

Adjustment range:  
vertical: 15 mm,  
longitudinal: 14 mm.  
With fixing screw.  
Sensor (not included in the supply for SHE 30 bench):  
electronic indicator,  
mechanical or precision dial gauge, axial analogue or digital probe with mounting shank of Ø 8 mm

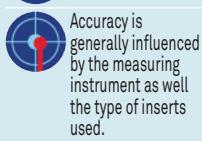

2,1 kg

30 mm

8 to 38 mm (standard accessory)

Accuracy is generally influenced by the measuring instrument as well as the type of inserts used.

Main body in cast iron. Other parts in hardened and ground steel. Inserts with carbide measuring faces.

Produced by sensor used. The SHE.35 bench is not equipped with a spring.

Mobile measuring bolt guided on a flat bearing surface, also fitted with a retracting ball-shaped handle. Interchangeable measuring inserts supplied in pairs. Fixing shaft Ø 4 mm. Height adjustable support table. Surface: 40 x 70 mm. Setting range: 8 mm. 1 tightening screw. Sensor (must be ordered separately), e.g. dial gauge, electronic or precision indicator, analogue or digital probe. Mounting Ø 8 mm.

2,3 kg

## INTERAPID SHE.35 for Internal Dimensions

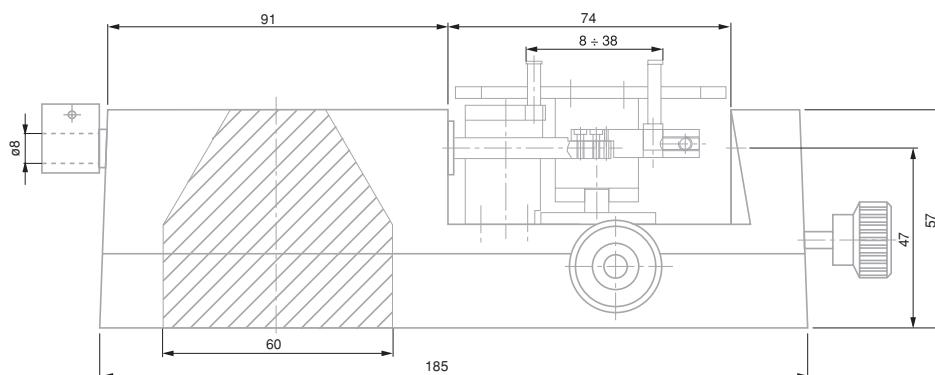

03330006

INTERAPID SHE 35 small horizontal measuring bench for internal dimensions  
(with measuring inserts)

8 ÷ 38 mm

Inserts with special design also available on request

# Measuring Supports and Auxiliary Equipment

TESA measuring supports have been designed to offer the best holding stability for instruments such as dial gauges, lever dial test indicators and probes. Stability is the prime requirement needed to reduce the related uncertainties in a measurement method or set-up.

 Base with vee recess and 1 magnetic flat face. Disengageable of magnet possible. Duralumin articulations.

 Dovetail clamp with a Ø 8 mm clamping bore

 0,4 kg

 Supplied without measuring instrument

## UNIVERSAL SUPPORTS

Magnetic measuring support with suction base or articulated arm.

### INTERAPID Magnetic Support with Articulated Arm (small)

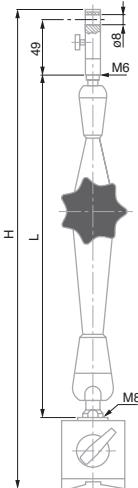

Magnetic support with articulated arm

No	=	N	H mm	L mm	Base mm	Consisting of:
01639025	Small magnetic measuring stand with articulated arm	≈ 170	205	120	30 x 30 x 30	<ul style="list-style-type: none"> <li>- 1 articulated arm length 120 mm</li> <li>- 1 dovetail clamp with fine adjustment</li> <li>- 1 magnetic base 30 x 30 x 30 (L x W x H)</li> </ul>

 Magnetic base has 1 prismatic and 2 flat faces. Articulations made from duralumin. Disengageable permanent magnet. Dovetail clamp with a Ø 8 mm clamping bore.

 Supplied without measuring instrument

### INTERAPID Magnetic Support with Articulated Arm

Simple and secure locking using a single rotating knob

- highly rigid arm and articulation.

Magnetic support with articulated arm

No	=	N	V-Base for Ø, mm	Fine adjust	H mm	L mm	Base mm	Mass kg	Consisting of:
01639022	INTERAPID magnetic support with articulated arm	≈ 800	30 ÷ 150	●	310	200	60 x 50 x 55	1,45	<ul style="list-style-type: none"> <li>- Articulated arm</li> <li>- Clamp</li> <li>- Magnetic base</li> </ul>
01639023	INTERAPID magnetic support with articulated arm	≈ 800	30 ÷ 150	●	390	280	60 x 50 x 55	1,85	<ul style="list-style-type: none"> <li>- Articulated arm</li> <li>- Clamp</li> <li>- Magnetic base</li> </ul>

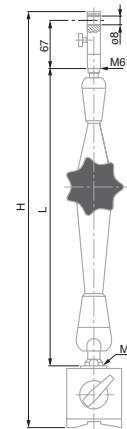

## INTERAPID Magnetic Support with High Precision Articulated Arm

Magnetic support with high precision articulated arm and fine adjustment for measurements that need repeatability in the range of  $\mu\text{m}$ .

Simple and secure locking with a two-position knob. Highly rigid arm and articulation.

Magnetic support with high precision articulated arm

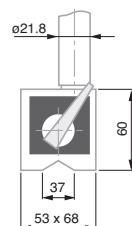

Magnetic base has 1 prismatic and 2 flat faces.  
Articulations made from duralumin.  
Disengageable permanent magnet.  
Dovetail clamp with a  $\varnothing 0.8$  mm clamping bore.

Supplied without measuring instrument

									Consisting of:
01639053	INTERAPID High Precision Magnetic Support with Articulated Arm	$\approx 1000$	30 $\div$ 150	●	440	320	73 x 50 x 55	- Articulated Arm - Clamp - Magnetic base	

## INTERAPID Magnetic Support with Flexible Arm

For measurements in hard to reach locations. Instant and reliable locking through lever control.

Holding force on a flat surface  $\approx 1000$  N

The magnetic base has 1 prismatic and 2 flat faces.  
Disengageable permanent magnet.  
Full length 350 mm.  
Dovetail clamp with a  $\varnothing 0.8$  mm clamping bore.

Supplied without measuring instrument

01639020	Magnetic Support with Flexible Arm	

-  Switchable magnet.  
Clamp with Ø 8 mm  
clamping bore  
 Supplied without  
measuring  
instrument

01639019	INTERAPID magnetic support with V-base, 1000 N	≈ 1000	70 ÷ 220	Strong magnetic holding force	●

## INTERAPID Support with Suction Base and Articulated Arm

Holds firmly on any smooth and flat surface

- Clamps instantly and reliably using a suction lever switch.
- Highly rigid articulated arm.
- Free from magnetic fields.

Round suction base made of aluminium ( $\varnothing$  88 mm, height 28 mm) with flat suction base.  
Articulations made from duralumin.  
Suction controlled by lever switch.  
Dovetail clamp with an  $\varnothing$  8 mm clamping bore.

1.1 kg

Supplied without measuring instrument

No	=	N	Fine ad-justment	H, mm	L, mm	Consisting of:
01639024	INTERAPID Measuring support with suction base and articulated arm	$\approx 400$	●	363	280	<ul style="list-style-type: none"> <li>- Articulated arm</li> <li>- Fine adjust clamp</li> <li>- Round suction base</li> </ul>

 Measuring table and column in hardened steel.

 Measuring arm with Ø 8 mm clamping bore, without fine adjustment.  
Measuring span: 48 mm.

 2,7 kg

 Supplied without measuring instrument

## INTERAPID Small Measuring Support and Table Ø 49 mm

Round steel measuring table

Application example with DIGICO indicator

 Cast iron base

 Base with front support face.  
Clamp for Ø 8 mm mounting rod or dial gauge  
with lug back. Model No 01639003 also with dovetail clamp.

 1,3 kg (01639003)  
4,35 kg (01639004)

 Supplied without measuring instrument

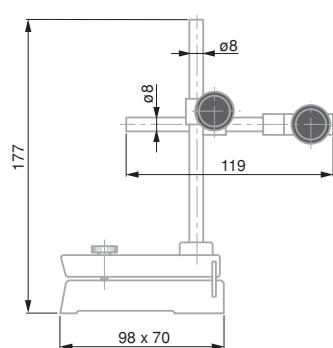

## INTERAPID Measuring Support with Inclinable Frontal Arm

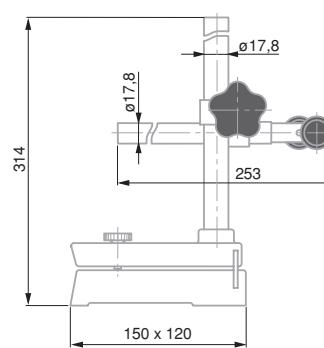

01639003

01639004

01939003

01939004

Used in conjunction with:

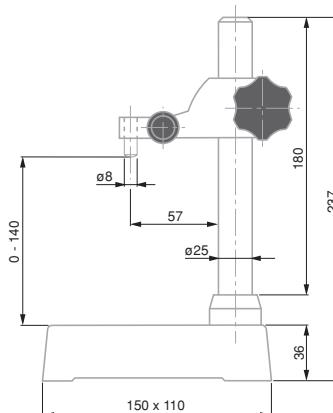

Lever dial test indicators, small dial gauges

Lever dial test indicators, small dial gauges, precision indicators, probes etc.

## INTERAPID UA 1 Table Measuring Support with Ground Table Surface

Basic model without fine adjustment

01639008    INTERAPID UA 1 measuring support with table    0 ÷ 140    100 x 100

Measuring table: cast iron. Column: chrome-plated steel. Arm: spheroidal graphite cast iron.

Mesuring surface of table: ground. Column: Can be dismantled. Measuring arm with Ø 8 mm clamp.

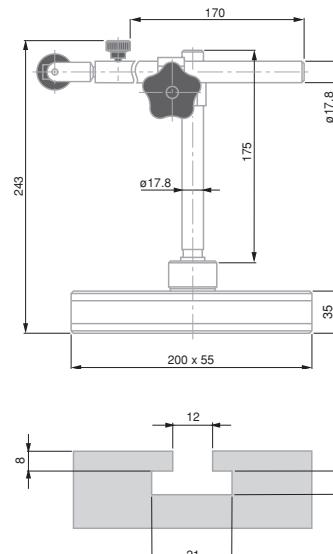

3 kg

Supplied without measuring instrument

## INTERAPID UD12 Support

Medium sized mobile measuring support for luse with ever type dial test indicators, dial gauges, precision indicators, electronic probes etc.

With fine adjustment mechanism.

01639000    UD 12 universal support

COMPOSÉ DE:

01840105    Tige de fixation à queue d'aronde Ø 8 mm

01640100    UDZ 3 Mounting rod and UDZ3 clamp Ø 8 mm clamp for UD 12

Cast iron base

Stand with lateral guiding faces. T-slot for vertical column. 2 rigid articulations

3.3 kg

Supplied without measuring instrument

3 µm in accordance with DIN 876 T1, class 00

01639035: black burnished column with Ø 8 mm clamping bore.

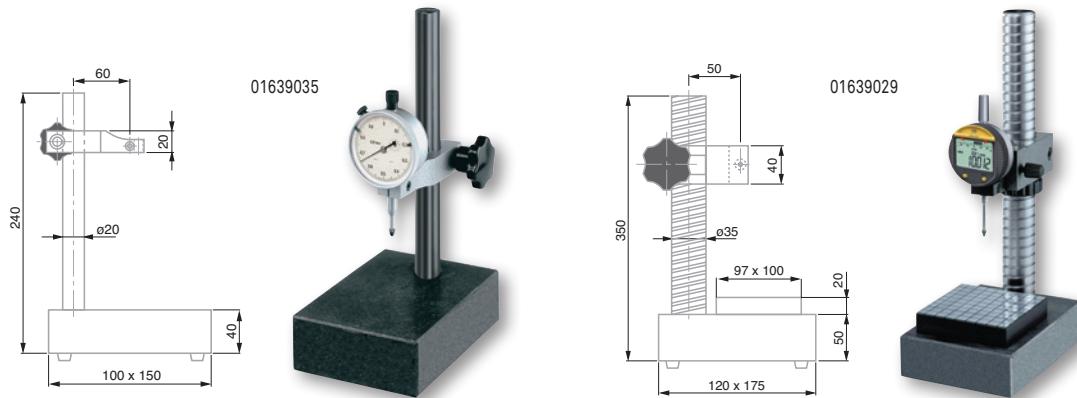

01639029: chrome plated column with thread and threaded ring for adjusting the height of the measuring arm. Ø 8 mm clamping bore. Grooved measuring face.

01639033: Chrome plated column. Horizontal sliding arm. Ø 4 mm or 8 mm bore for a dovetail clamp or lug.

Supplied without measuring instrument

## INTERAPID Table Measuring Stands with Granite Grade 00

	No	=	mm	mm	Measur- ing surface	Fine adjust- ment	Measuring table mm	Column height mm	Working surface mm	Span mm	kg

## SMALL MAGNETIC SUPPORTS

Ideal for lever type dial test indicators, and dial gauges up to 40 mm diameter  
 - With 2 articulation joints and fine adjustment.

### Small magnetic support UJ 15

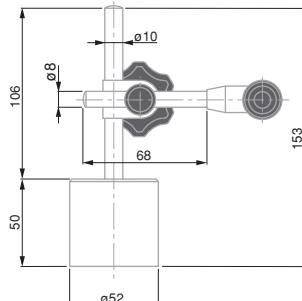

01639007 + 01640501  
 with dial test indicator

01639007    Magnetic support INTERAPID UJ15, dovetail clamp and Ø 8 mm cylindrical clamping

### Small magnetic support UJ 15G

01639016    UJ Magnetic support

- Holding force on a flat surface: ≈ 220 N
- Rounded base with permanent magnet
- 0,47 kg
- Supplied without measuring instrument

### Accessories for Small Magnetic Stands

01640501    Steel base plate for UJ15 or UJ15G that become movable

- Holding force on a flat surface: ≥ 350 N
- Rounded base with permanent magnet
- 0,93 kg
- Supplied without measuring instrument

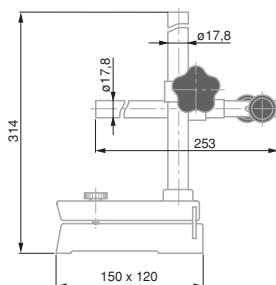

- 50 x 80 x 20 mm
- 0,60 kg

-  Cast iron table.  
Chrome plated steel column
-  Support base:  
Ground measuring face. 2 T-slots. Removable column.
-  Supplied without measuring instrument
-  Support base only:  
4,85 kg  
Measuring arm:  
0,85 kg  
Sliding arm: 1,75 kg

## UA 30 MEASURING STAND

Base for mounting special fixtures adapted for series inspection

### INTERAPID UA 30 Measuring Stand, Without Measuring Arm

				
01639009	INTERAPID UA 30 measuring support with table, without measuring arm	0 ÷ 175	0 ÷ 6.89	125 x 115

-  Measuring arm  
01610200: With fine adjustment. 1 mm travel. Ø 8 mm clamping bore.  
Sliding arm  
01610201: Sliding holder for TESA YA dial gauges.  
Adjustable swinging movement. Clamping bore Ø 13 mm.  
Length of travel 35, 57 or 80 mm.  
Measuring span 60 mm. Depth stop plate 01640000: Dimensions: 115 x 35 x 3,5 mm.  
120° vee recess for Ø ≤ 120 mm, 2 tightening screws.

### Accessories for UA 30

**EQUIPEMENT AUXILIAIRES****INTERAPID Depth Foot with a Flat Face**

01639046	Depth foot with flat face	80 x 16	8

**INTERAPID Depth Foot with Prismatic Measuring Face**

For measuring the depth of key slots on cylindrical shafts and determining circularity errors etc.

01639047	Depth foot with prismatic measuring face	10 ÷ 100	0.39 ÷ 3.9	16	0.64	8	0.315

**Brown & Sharpe CENTER FINDER Centering Tool**

Practical for aligning the centre of a bore with respect to the spindle axis of a machine tool

- Without the clamping shaft, it can also serve as small magnetic support
- Allows the clamping of a dial test indicator, either a standard or perpendicular model.

06769006 B&S CENTER FINDER centering tool	

- Hardened steel
- Lapped measuring faces. Clamp with lock for mounting a dial gauge or probe
- Supplied without measuring instrument

- Hardened steel
- Lapped measuring faces. Clamp with lock for mounting a dial gauge or probe
- Supplied without measuring instrument

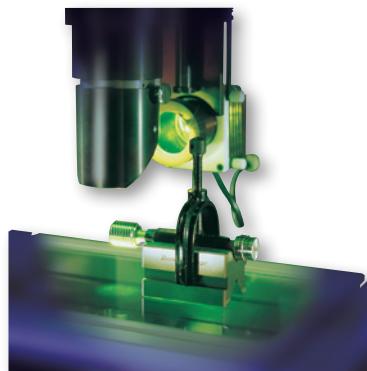

- Center Finder consisting of the following components:
  - cylindrical shank for clamping on the chuck of a machine tool.
  - powerful round magnetic base with strong holding capacity.
  - swivel joint and dovetail collar for clamping a lever-type dial test indicator.

-  Hardened steel
-  Ground finish for support and vee faces
-  Not available as individual components

## Brown & Sharpe V-Block Set with Clamping Bridge

V-blocks with frames for clamping cylindrical parts diameters ranging from 0,7 to 40 mm.

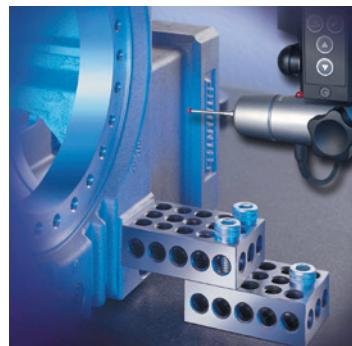

Can be used for machining or inspecting workpieces

			Clamping Range, mm		Clamping Range, in	Consisting of:
06769007	Set of B&S V-blocks		0,7 ÷ 40	0,3 ÷ 9/32		1 pair of V-blocks 1 extra V-block 1 extra V-block 5 extra V-blocks 2 in-between bridges 2 large frames 1 small frame

## Brown & Sharpe Positioning Block Set

Pair of matched blocks used for positioning and holding workpieces or for use as stops on granite surface plates, a coordinate measuring set-up, a machine-tool or other applications - Each block are precision ground.

			mm		in
06769004	Positioning block set, precision ground		75 x 50 x 25	2.95 x 1.95 x 0.98	

-  7 µm for each pair
-  2,5 µm for the 6 faces
-  Hardened steel, 55 to 60 HRC
-  Each block has 18 through bores Ø 9,53 mm and 5 bores with M10 threads
-  Supplied with five M10 socket head screws and one 8 mm socket wrench

## Brown & Sharpe Adjustable Parallels

Set consists of 6 adjustable parallels.

Used as parallel pads, setting standards for measuring instruments or gauges for checking internal dimensions on parallel surfaces.

Each parallel consists of two tapered parts dovetailed together. – Two tightening screws lock the parallels to the size required.

<b>No</b>	<b>=</b>	
06769010 Adjustable parallel set		
Consisting of:		
<b>=</b>		
Height mm	Length mm	
1 parallel 10 ÷ 13	44	7
1 parallel 13 ÷ 17	54	7
1 parallel 17 ÷ 24	68	7
1 parallel 24 ÷ 33	90	7
1 parallel 33 ÷ 44	106	7
1 parallel 44 ÷ 57	129	7

- Hardened steel
- Supplied with a PH 1 screwdriver

## ROCH Flexible Rules

In spring stainless steel - Divisions of 1 mm and 0.5 mm.

- Class CE II
- Stainless spring-loaded steel

<b>No</b>	<b>=</b>			
0951750181	ROCH flexible rule L = 200 mm	Length mm	Width mm	Thickness mm
0951750182	ROCH flexible rule L = 300 mm	200	13	0.5
0951750184	ROCH flexible rule L = 500 mm	300	13	0.5
0951750187	ROCH flexible rule L = 1000 mm	500	18	0.5

-  Length L = 100 mm,  
Width = 13 mm max.
-  Alloyed steel
-  Blades not supplied  
individually

## ROCH Thickness Gauges

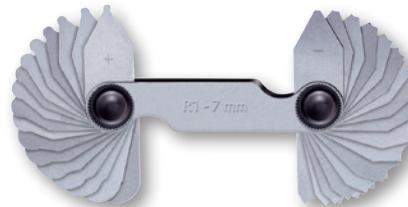

No	=	Thickness mm	Step mm	Thickness in	Number of blades
0951753013	ROCH thickness gauge with 13 blades, 0,05 to 1,0 mm	0,05 ÷ 0,3 / 0,4 ÷ 1,0	0,05 / 0,1	0,001968 ÷ 0,003937	6/7
0951753014	ROCH thickness gauge with 20 blades: 0,05 to 1,0 mm	0,05 ÷ 1,0	0,05	0,001968 ÷ 0,003937	20
0951753015	ROCH thickness gauge with 21 blades; 0,1 to 0,2 mm	0,1 ÷ 2,0	0,1 + 1 x 0,05	0,003937 ÷ 0,07874	21

-  Stainless steel
-  Blades are not supplied individually

## ROCH Radius Gauges

Set of radius gauges with concave and convex blades.

Designed for visual inspection of radii.

No	=	Radius mm	Radii mm	Step mm	Number of blades
0951753001	ROCH radius gauge 2 x 17 blades	0,1	1,0 ÷ 2,75 / 3,0 ÷ 7,0	0,25 / 0,5	2 x 17
0951753002	ROCH radius gauge 2 x 16 blades	0,15	7,5 ÷ 15,0	0,5	2 x 16
0951753003	ROCH radius gauge 2 x 15 blades	0,2	15,5 ÷ 19,5 / 20,0 ÷ 25,0	0,2	2 x 15

-  Alloyed steel
-  Blades are not supplied individually

## ROCH Screw Pitch Gauges

60° flank angles for ISO metric threads or 55° for Whitworth threads.

No	=	Thread pitch mm	Threads per in	Metric thread
0951753045	ROCH screw pitch gauge for ISO 60° threads	0,25 / 0,3 / 0,35 / 0,4 / 0,45 / 0,5 / 0,6 / 0,7 / 0,75 / 0,8 / 0,9 / 1,0 / 1,25 / 1,5 / 1,75 / 2,0 / 2,5 / 3,0 / 3,5 / 4,0 / 4,5 / 5,0 / 5,5 / 6,0	-	ISO 60° mm

**ROCH Portable Magnifier**

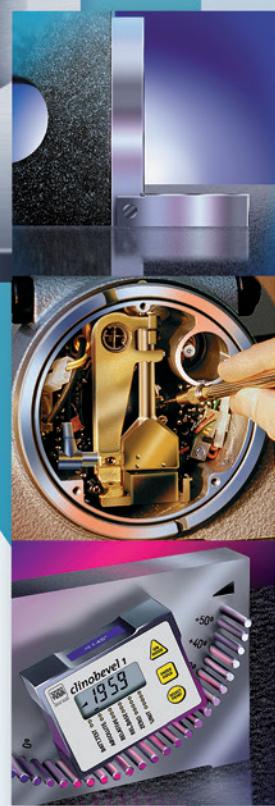

With a folding handle and additional magnifier. – Retractable support.

No	=	Large magnifier	Small magnifier	mm	Small magnifier, mm
0951754511	ROCH portable magnifier	3x	10x	80 x 45	13

# Straightness, Angle and Inclination Measurement

## INCLINOMETERS AND PRECISION LEVELS

Irrespective of whether they are spirit or electronic inclinometers, all precision levels are based on the same perfectly reliable reference but also cost-free: the centre of the earth's gravity.

Under the force of gravity, the gas bubble in the liquid or the pendulum inclines itself according to this natural physical principle.

The position of the pendulum with respect to the measuring faces of the instrument body can then be measured. Based on this perfect principle, these instruments offer a great number of measuring applications of high precision. The horizontal and vertical positioning of the measuring faces enable the detection of form errors in the geometrical elements on the workpiece to be measured.

These errors often result from deviations in straightness, flatness, position, parallelism and squareness.

Indication of values may vary depending on the type of level, the values typically displayed are:

- inclination (mm/m or in/10 in);
- radian in mrad;
- decimal angle (e.g. 12,37°);
- sexagesimal angle in degrees (°), minutes (') and seconds (") e.g. 15° 30' 45".

## INCLINOMETERS AND LEVELS

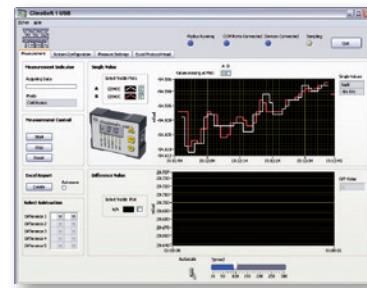

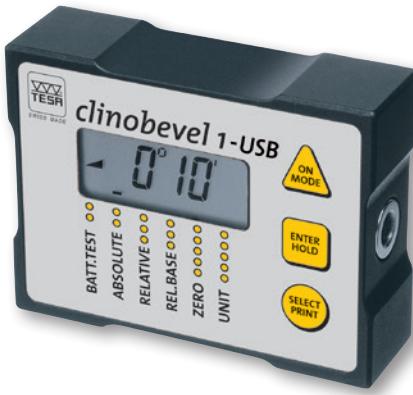

The TESA inclinometers and levels meet the most demanding applications not only in the machine building sector but also in the civil construction sector.

### Electronic Inclinometer - TESA CLINOBEVEL 1 USB

Compact universal instrument for direct and differential measurements – Measuring range  $\pm 45^\circ$  with display of measured angles or inclinations – Reinforced aluminium housing, eloxide surface – Large digital display for error free interpretation of readings.

Supplied with CLINOSOFT software permitting the visualisation and storage of measurements as well as the USB cable to host computer.

Multiple applications are possible, notably the measurement of 2 flat surfaces by comparing the measured values with the help of 2 instruments. Automatic generation of inspection reports using Microsoft EXCEL spreadsheet software.

CLINOSOFT Software

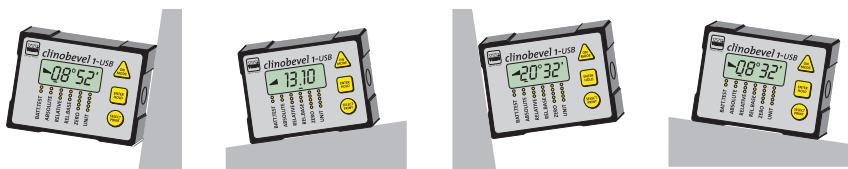

Measuring functions: A ; B ; A+B ; A-B

CLINOSOFT Software

CLINOBEVEL 1-USB, can be used on its 4 faces.

						Livré avec:
05330203	CLINOBEVEL 1 USB electronic inclinometer	$\pm 45^\circ$	mm/m	$\geq 0,02$	100 x 75 x 35	CLINOSOFT software plus USB cable to host computer

#### OPTIONAL ACCESSORIES:

- 04768002 4 batteries LRC 6 AA, 1,5 V for CLINOBEVEL 1 USB, CLINOBEVEL 2, MICROBEVEL,
- 05360006 External switch with cable, L = 2 m, for CLINOBEVEL 1 USB
- 05360014 External switch, wireless, for CLINOBEVEL 1 USB

## TESA CLINOBEVEL 2 Electronic Inclinometer

Portable precision inclinometer.

Measuring range  $\pm 45^\circ$  with indication of angle or inclination.

Integrated temperature compensation 2 prismatic measuring faces.

Spirit level integrated in transverse direction to eliminate "twist" error.

Simple and rapid calibration: correction of gain by the 3-point method and software integrated in the instrument.

Microprocessor-based features for display setting and instrument adjustment.

The CLINOBEVEL 2 can be used on its two reference faces.

It can also be connected to a second CLINOBEVEL 2 instrument for a differential measurement (Comparative): one of the two instruments operates as a reference without the need to connect to a computer.

The integrated RS 232 interface enables the connection of the instrument to a computer.

Magnetic inserts can be integrated on the measuring faces on request as a special execution.

When 2 CLINOBEVEL 2 are connected, one of the instruments becomes the reference

- DIN 2276 Part 2 (Form D)

## TESA MICROBEVEL 1 Inclinometer

TESA MICROBEVEL 1 is particularly suited for measuring slightly inclined surfaces such as the measuring of flatness of surfaces or the geometrical characteristics (deviation, rotation etc.) of a machine tool.

Suited for operation under the most rugged conditions., protected by an aluminium case.

Power supplied by a single standard battery AA 1,5 V for at least 100 hours of operation.

Horizontal model

Square model

Models with steps 0,05 to 0,005 mm/m available on request

No	=	Range 1 or Range 2, mm/m	Base width, mm	Base height, mm	kg (with transport case)

## TESA NIVELTRONIC Electronic Levels with Analogue Display and Integrated Galvanometer

Electronic levels with analogue display and integrated galvanometer.

These instruments are known for a remarkable stability at zero point. They are used for the inspection and alignment of horizontal and vertical surfaces. They are also suitable for the measurement of slight inclinations, specially for the inspection of flatness of granite surface plates.

The square model is particularly suited for the measurement of flat or cylindrical parts thanks to its prismatic base.

NIVELTRONIC square model with 2 prismatic bases

NIVELTRONIC horizontal model with flat base

## TESA Crossed Spirit Levels – for Assembly

For the inspection and alignment of flat surfaces.

The 2 vials permit a simultaneous alignment in the X and Y axes.

The level can be screwed on to a surface.

*Model B: Circular level with cross vials, 3-point mounting. Aluminium alloy protection case, anodised.*

*Model C: T-shaped level with cross vials, 2-point mounting. Manually lapped measuring base to ensure a much higher precision of the level.*

## TESA Precision Spirit Levels

For checking and aligning flat or cylindrical surfaces in the horizontal position.

With an adjustment system for zero point and "twist" error.

Prismatic measuring base, manually lapped finish, enabling a higher precision for the level.

Insulating grip in wood essential for reducing heat transfer due to manual handling.

Model B: horizontal precision level

Model C: horizontal precision level

## TESA Precision Spirit Levels with a Frame

For checking and aligning flat or cylindrical surfaces in horizontal and vertical positions.

Instrument features: 4 measuring faces, 2 prismatic faces (shafts Ø 17 to 135 mm) et 2 smooth flat faces.

With adjustment system for zero point and "twist" error.

Longitudinal vial with sensitivity of 0,02 to 0,1 mm/m, depending on the model.

Side viewing slots for an excellent visibility of the top and side of the main vial.

Cross vial with sensitivity of 2-5 mm/m for easy adjustment.

3 insulating grips to avoid any thermal transfer.

## TESA Precision Spirit Levels, Square Models with Magnetic Inserts

For inspecting and aligning flat or cylindrical surfaces in horizontal and vertical positions.

Instrument features: 2 prismatic faces (shafts Ø 19 to 108 mm) with the vertical measuring face having magnetic inserts.

Equipped with an adjustment system for zero point and "twist" error.

Longitudinal vial with a sensitivity from 0,02 to 0,05 mm/m, depending on the model.

Cross vial with a sensitivity of 2-5 mm/m for an easy adjustment.

A quality wooden grip reduces thermal transfer during manual handling.

## TESA Precision Spirit Level with Micrometric Adjustment

Precision spirit level with micrometer adjustment.

For the measurement of inclinations from -20 to +4 mm/m.

1 division = 0,02 mm/m

Instrument features:

+ 1 micrometer rotation = + 2 mm/m (100 divisions)

+ 2 micrometer rotations = + 4 mm/m

- 10 micrometer rotations = - 20 mm/m

Prismatic measuring face (shafts Ø 19 to 120 mm).

Longitudinal vial with sensitivity of 0,02 mm/m

Cross vial with sensitivity of 2-5 mm/m for easy horizontal adjustment.

With side thermal insulators to reduce heat transfers to the instrument during manual handling.

## TESA Spirit Inclinometer with Protractor and Micrometer Element

Enables the measurement of angular deviations in any position of a cylindrical or flat surface.

Instrument features: prismatic measuring face (shafts Ø 17 to 80 mm) (DIN 877 + DIN 2276/1). Scale range: 2x 180°.

The adjustment is executed by disengaging the micrometer element by pressing in the direction indicated by the arrow. Afterwards the vial is oriented manually before engaging the micrometer element and executing the fine adjustment with the latter.

1 scale division = 1 degree.

1 division of the micrometer element = 1 Arcmin

Vial with sensitivity of 0,3 mm/m (= 1 Arcmin).

Error limit = 1,5 Arcmin

## Brown & Sharpe Angle Protractor - Multiple Combinations

This angle protractor combination set can be used as a scale, depth gauge, try square, centering tool, marker or even as a spirit level.

With centering square

With spirit level

With angle protractor 2x 90° graduations

Consisting of:

**06719000** B&S angle protractor set with multiple combinations

- 1 Ruler graduated in millimetres, length 300 mm
- 1 Angle protractor with 2 x 90° graduations
- 1 Centering square
- 1 Square head with scribe

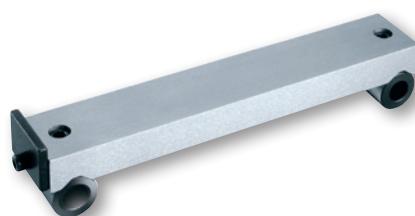

Hardened steel.  
Measuring faces  
specially treated  
against scratches

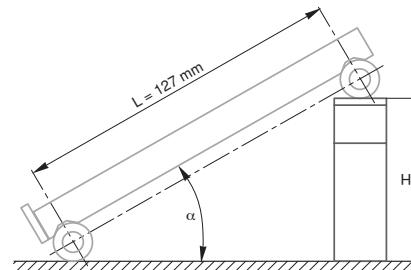

## Brown & Sharpe Sine Bar

Suited for setting ranges from 0 to 60°

Sine function for establishing the angle that needs to be set on the basis of the length dimensions obtained from parallel gauge blocks.

06769005

Example for the calculation of an angle  
Given:  $H$  = height of combination gauge blocks in mm  
 $L$  = length of B&S sine bar in mm

Formula:  $H = L * \sin(\alpha)$   
 $\sin(\alpha) = H/L$   
 angle =  $\arcsin(H/L)$

Calculation for determining angle knowing  $H$  et  $L$  values:  
 angle =  $\arcsin(89,803 / 127) = \arcsin(0,70711) = 45^\circ$

5 μm

Hardened alloy steel

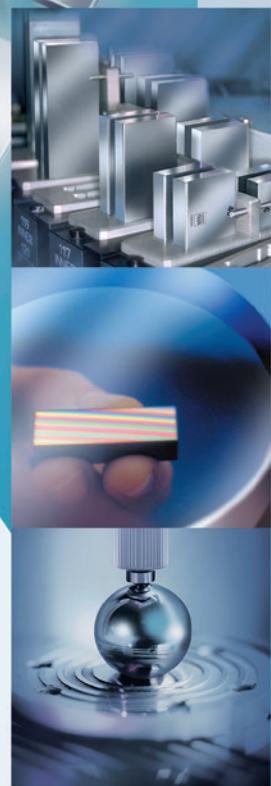

Removable front stop

L (centre  
distance),  
mm

127 ± 0,004 123 x 25

# Length and Angle Standards

# PURCHASING GAUGE BLOCKS CALLS FOR CONFIDENCE

The high accuracy of TESA's gauge blocks is the result of years of experience in producing and making use of these products.

- Use of high quality raw materials and appropriate heat treatment, thus guaranteeing a durable shape and dimensional stability of the gauge blocks over years.
- Very low deviations in flatness and parallelism of the measuring faces, resulting in highly accurate gauges.
- Unique flat lapping polish as well as edge rounding techniques, leading to superior wringability.
- Proper serial number marked on each gauge block.

## ISO 3650

Gauge blocks with metric nominal lengths conform to ISO 3650:1998. This international standard is based on the ones published either in a region, e.g. the European standard EN ISO 3650:1998 or in a country, e.g. the Swiss standard SN EN ISO 3650, German standard DIN EN ISO 3650 or French standard NF EN ISO 3650. Gauge blocks with imperial nominal lengths comply with BS 4311 - Part 1. Compared to earlier standards, ISO 3650:1998 includes the following main changes :

- Withdrawal of the accuracy grade 00 (see "Which grade do you need").
- Introduction of requirements as regards the uncertainty of measurement in relation to the declaration of conformity of the product according to ISO 14253-1:1998.
- Review of some definitions and shortened form of terms according to normative references that are currently applicable (see drawing).

## WHICH MATERIAL DO YOU NEED?

### Steel

Steel gauge blocks have proven their reliability for more than a hundred years. This raw material remains the most commonly accepted for length standards.

Steel gauge blocks provide high resistance to wear associated with a good property to adhere to other gauge blocks. However, steel must be protected against corrosion. Provided gauge blocks made from this material are properly handled, they will remain reliable for many years. TESA steel gauge blocks have the following key features:

- Highly alloyed steel
- Hardness guaranteed to 800 HV
- Artificially aged for optimum form and dimensional stability
- Coefficient of thermal expansion:  $(11,5 \pm 1,0) \times 10^{-6} \text{ K}^{-1}$

### Tungsten Carbide

Gauge blocks in tungsten carbide are 10 times as resistant to wear as steel gauges. They are intended for frequent use, also where superior wringing quality is required. TESA tungsten carbide gauge blocks provide:

- Hardness guaranteed to 1400 HV
- Coefficient of thermal expansion:  $(4,23 \pm 0,1) \times 10^{-6} \text{ K}^{-1}$

### Ceramic

Ceramic gauge blocks are extremely resistant to wear and scratches. Due to the properties of this material, any minor damage is unlikely to affect the wringability of their measuring faces. Being corrosion resistant, these gauge blocks are insensitive to "rusty hands", amongst other issues. Manufactured from stabilised zirconia, TESA ceramic gauge blocks have the following key features:

- Non-magnetizable
- Hardness guaranteed to 1400 HV
- Coefficient of thermal expansion:  $(9,7 \pm 0,8) \times 10^{-6} \text{ K}^{-1}$

## WHICH GRADE DO YOU NEED?

### Grade 2

These gauge blocks are commonly used as **Working Standards** in inspection rooms within a manufacturing area to set and calibrate measuring instruments and other equipment as well as to inspect tools, fixtures and machines.

### Grade 1

Gauge blocks of this class are mainly used as **Working Standards** to set and calibrate plug gauges and measuring instruments in measuring rooms or inspection areas within a manufacturing area.

### Tolerance Grade 0

These gauge blocks are designated for use as **Company Standards** in calibration laboratories or environmentally controlled inspection rooms to set and calibrate plug gauges as well as measuring equipment.

### Calibration grade K

Gauge blocks of this tolerance class are intended for use as **Reference Standards** in metrology oriented laboratories of National Institutes, precision measuring rooms and other laboratories of National Calibration Services, whether officially accredited or not.

They should be used as masters to calibrate gauge blocks, length standards of same accuracy and also measuring instruments.

### Precision Grade 00

The new standard ISO 3650 no longer takes this accuracy grade into consideration as the uncertainties of measurement achieved with the procedure applied for calibration usually lead to a disparity against specified tolerances.

The rules to the expression of uncertainty of measurement for proving the conformity or nonconformity of the product with the specification, as stated in the standard ISO 14253- 1:1998, have dictated the decision to withdraw the accuracy grade 00.

A wide experience in practical use of gauge blocks has proven that gauges of the calibration class K could easily replace those of the earlier accuracy grade 00.

As a result, gauge blocks of grade 00 are no longer available.

## CERTIFICATE OF CALIBRATION AND TRACEABILITY.

All set compositions from TESA are supplied with a certificate of calibration issued by the accredited calibration laboratory of a national calibration service.

This service can either be the Swiss calibration service (SCS), British calibration service (UKAS) or Deutsche Akkreditierungsstelle (DAkkS) depending on the manufacturer.

Accreditation is the authenticated assurance of the skills of the calibration laboratories as well as of the full traceability to national standards that conform with the International System of Units (SI).

This is for any reference standard or measuring equipment being used.

Owing to a multilateral agreement (MLA), any certificates of calibration issued by the members of the European Cooperation for Accreditation of Laboratories (EA) is internationally accepted.

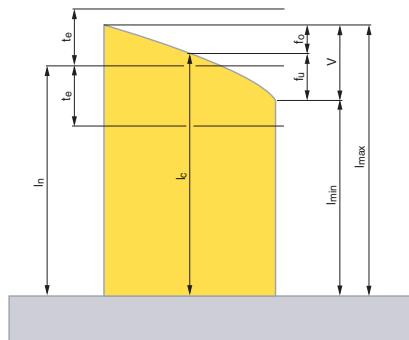

## DELIVERIES

TESA gauge blocks can be delivered individually or in full sets with nominal lengths as listed in this section. Additional gauge sets and lengths can be made available upon request. Since individual gauge blocks could not be listed in their whole here, any inquiry or purchase order should specify :

- Desired nominal length
- Chosen material
- Calibration grade or any other grade

## Limit Deviations and Tolerances

**Special Versions**

Available on request :

- Tungsten carbide gauge block set
- Ceramic gauge block set
- TESA maintenance kit

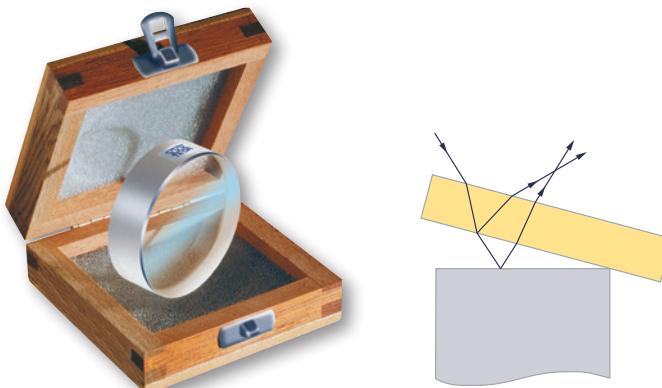

-  Diameter and thickness as shown in table
-  Optical flats with 2 flat measuring faces. No guaranty can be given for parallelism.

## ACCESSORIES FOR GAUGE BLOCKS

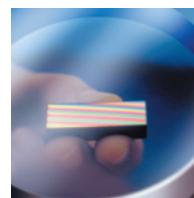

The interference lenses allow visual inspection of the surface of the gauge blocks.

### TESA Optical Flats

Used for examining flatness and adhesion of gauge blocks or any other test pieces having flat faces with same high grade of accuracy.

No	Ø	mm	Thickness, mm	µm
02530050	50	15	0,125	
02530075	75	20	0,125	

-  Light source:

-  406 x 406 x  
355 mm  
(W x D x H)

-  Surface plate in  
hardened steel

-  Case in  
lacquered wood

### TESA Monochromatic Light Unit

For use with optical flats or optical parallels to measure both the flatness and parallelism of the measuring faces by interferometry.

Monochromatic light source providing high-contrast interference fringes.

This light unit uses a single wavelength so that bright/light fringes only are visible.

The light source at the rear of the case also permits a visual examination, e.g. with the aid of a knife-edge or bevelled straight edge.

# Calibration Equipment

## CONFIDENCE IS NOT ENOUGH...

The control of inspection and measuring equipment is an element of quality management that is now more important than ever before. The introduction of the ISO 9000 family of international standards has also led to major changes in this field. Amongst other things, ISO 9001 specifies that : "all inspection and measuring equipment that can affect product quality must be identified, calibrated and adjusted at prescribed intervals, or prior to use, against certified equipment having a known valid traceable relationship to internationally or nationally recognised standards".

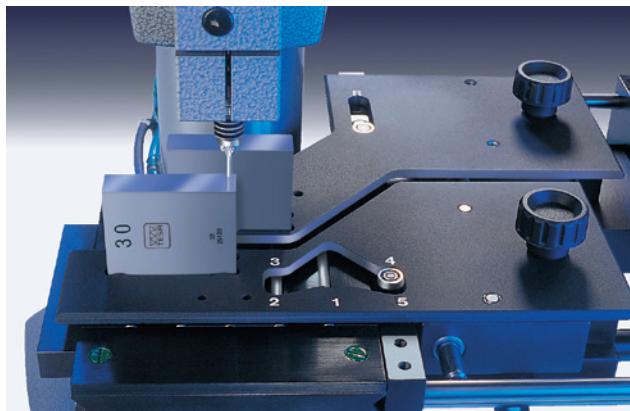

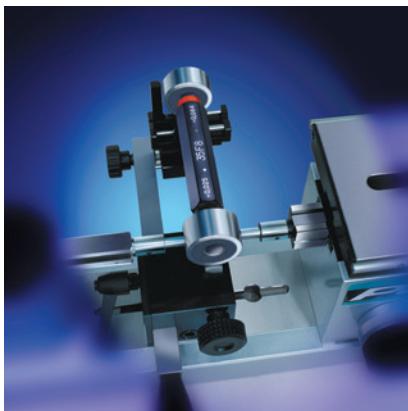

This standard also states that the supplier shall: "ensure that the inspection and measuring equipment is capable of the necessary accuracy and precision".

### A Vast Choice

TESA can offer you the most varied methods of measurement specifically suited for the inspection and calibration of standards, handtools and plug gauges. Some of these are described in the various sections of this catalogue, in particular:

- Gauge blocks
- Setting rings
- Cylindrical setting standards with outside diameters
- Optical flats
- Parallel optical flats
- Electronic levels for both straightness and flatness measurement
- Instruments for both squareness and perpendicularity measurement
- Calibration equipment for length measuring devices fitted with inductive probes.

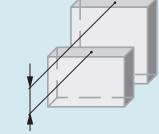

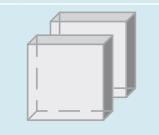

This section is devoted to measuring systems that serve to calibrate other inspection equipment, but they can also be used for high-accuracy measurement of precision parts.

## PRESENTATION OF TESA MEASURING GAGE BLOCKS

TESA offers two models, the operation of which is based on two different measurement procedures.

- TESA UPD directly measures gauge blocks within a measuring span of 25 mm/1 in.
- TESA UPC is used for comparative measurement of gauge blocks having a same nominal length.

TESA Gauge Block Comparators		UPD	UPC
	<b>Measuring procedures</b>

## GAUGE BLOCK COMPARATORS

In the hierarchical chain of dimensional measurements that can be traced back to the standard metre length unit, gauge blocks hold a key position. This makes them the most important material references used in metrology.

The application of the length unit, based on specific wavelengths of light, to gauge blocks is achieved in the first instance by fundamental interferential measurement. Using gauge blocks measured by interferometry, defined lengths are thus transferred to other gauge blocks in measurements further down the hierarchical chain.

### TESA UPD – for Direct and Comparative Measurements

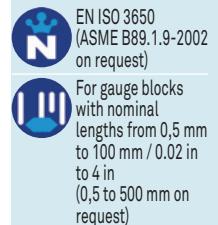

- Direct measurement of gauge blocks with a variation in nominal length of up to 25 mm or 1 in.
  - Enables the number of reference gauge blocks required to be reduced by nearly 80 %.
- Comparative measurement of gauge blocks having a same nominal length.
  - Enables lower measurement uncertainties to be achieved due to weaker influences of the systematic errors.
- Equipped with HEIDENHAIN high-precision incremental probes.
- Templates with a new concept for positioning the gauge blocks.
  - Single or dual template system to provide optimum ease of handling of the gauge blocks
- Integrated device for most accurate temperature acquisition.
- On-line transfer of both measured length and temperature values.
- Computer-aided data processing with all the corrections necessary included.

#### Dual template system for the maintenance of your reference gauge blocks (TESA patented)

- The simultaneous use of two templates allows you to "rest up" your gauge blocks until you need them.
- The application of this new concept turns into significant savings in both time and money.
- During measurement cycles carried out on a routine basis, the distance travelled over the measuring table is reduced by nearly 70 %.
  - This contributes to significant reductions of the risks of damaging and wearing the measurement faces.
- The double protection of your reference gauge blocks leads to significant cost savings through the reduction if the need for:
  - recalibration
  - restoration of the measuring faces
  - replacement of worn or damaged gauge blocks
  - increased downtime (whilst extending the life of your reference gauge blocks)

#### Single Template System

- Using this system your reference gauge blocks are moved together with those to be calibrated during the measurement cycles.

For gauge blocks

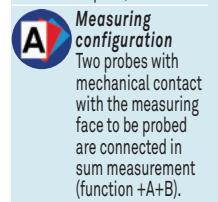

with nominal

lengths from 0,5 mm

to 100 mm / 0,02 in

to 4 in

(0,5 to 500 mm on  
request)

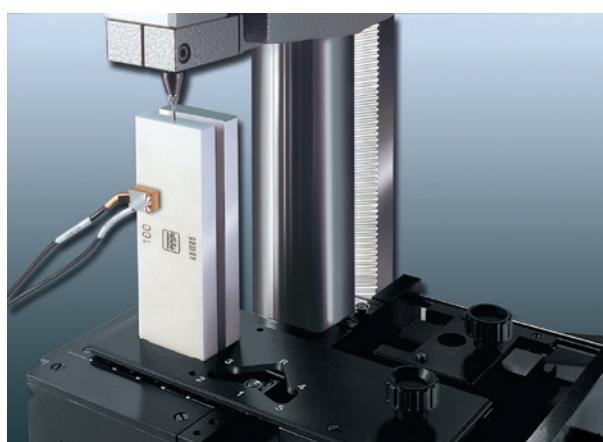

#### Measuring points

On the reference  
gauge block: at the  
centre of the meas-  
uring face (point R).  
On the gauge block  
to be measured: at  
the centre (point 1)  
as well as the four  
corners of the  
measuring face,  
each lying 2 mm  
away from the ad-  
jacent faces (points  
2 to 5).

The central length  
 $l_c$  is determined  
by probing both  
points R and 1. For  
establishing lengths  
at any point, the  
measurements shall  
be carried out at  
points R plus 1 to 5.

The variation in  
length  $v$  is obtained  
from measurements  
taken at points 1 to 5.

## 2 different delivery programs

05930005 TESA UPD gauge block comparator with temperature device\*

05930004 TESA UPD gauge block comparator without temperature device

## CONSISTENT OF:

05930011 TESA UPT temperature device, complete

Other delivery program available on request

\* Special execution for 110 VAC, 60 Hz also available on request (ref. S32070030 instead of 03260433)

## Errors of Measurement

Provided all metrological conditions are met, the reliability of the comparator used for direct measurement of steel gauge blocks is expressed as follows:

Repeatability limit (with no influence of external temperature):  $0,015 \mu\text{m}$ Uncertainty of measurement:  $U = \pm (0,05 + 0,5 \cdot L) \mu\text{m}$  ( $L$  in m)

Condition requires the use of reference standards whose measurement uncertainty is equal to:

 $U \leq \pm 0,015 \mu\text{m}$  for the comparator $U \leq \pm (0,02 + 0,2 \cdot L) \mu\text{m}$  ( $L$  in m) for the gauge blocks

## TESA UPC – for Comparative Measurement

TESA UPC Gauge Block Comparator for Comparative Measurement

- Measures gauge blocks of same nominal length by comparison.
- Comes with the new template system for positioning the gauge blocks.
- Single or dual template system for optimum ease of gauge handling.
- Features TESA high-precision inductive probes.
- Allows ultra-precise temperature measurement, integrated.
- Transfers on-line all measured length and temperature values.
- Executes computer-aided data processing with all required correction values included.
- Performs calibrations that meet the requirements of both ISO standards and EA guidelines (EAL – European cooperation for Accreditation of Laboratories).
- Includes an execution for greater accuracy along with a calibration certificate (optional).

TESA UPC is specially designed for the calibration – or dimensional inspection – of gauge blocks with nominal lengths ranging from 0,5 to 100 mm. The configuration, which consists of two probes aligned opposite one another, associated with both the concept and quality of the measuring system provides full guarantee for an extra low uncertainty of measurement. Although TESA UPC is mainly intended for manufacturers and end-users of gauge blocks, this comparator is also widely used in nationally accredited laboratories.

If specified, TESA can also provide the temperature device available as an option. This device has 4 PT100 platinum resistances, each capturing the temperature of the two gauge blocks along with that of both the measuring table and the support. Computer-aided data processing lets you carry out any calibration most reliably and rationally – for sure.

EN ISO 3650

For gauge blocks ranging from 0,5 mm to 100 mm or 0,02 in to 4 in (0,5 to 500 mm on request)

Comparative measurement procedure with transference of the length of a reference gauge block to the gauge block being measured.

### Measuring configuration

2 probes connected in sum measurement function +A+B) with mechanical contact with the measuring face.

### Measuring points

On the reference gauge block: at the centre of the measuring face (point R). On the gauge block to be measured: at the centre (point 1) as well as the 4 corners of the measuring face, each lying 2 mm away from the adjacent faces (points 2 to 5).

Central length  $l_c$  is defined by probing both points R and 1.

Establishing lengths at any point requires measurements to be taken at points R plus 1 to 5.

$\approx$  23 kg (comparator complete, but without computer).  
 $\approx$  4 kg (temperature device)

All instruments with the option for greater accuracy are delivered with serial numbers

In-house calibration certificate for the version with greater accuracy or declaration of conformity for the standard version. Temperature device with SCS certificate.

## Error of Measurement

Provided all the metrological conditions are met, the reliability of the two standard executions No. 05930000 and 05930003 is expressed as follows:

Repeatability limit (with no effect due to external temperature):  $0,025 \mu\text{m}$

Measurement uncertainty\*  
 $U = \pm (0,10 + 1,0 \cdot L) \mu\text{m}$  ( $L$  in m)

Condition involves the use of reference standards (see page L-14 and L-15) whose uncertainty is as follows:

$U \leq \pm 0,030 \mu\text{m}$   
 when calibrating the comparator  
 $U \leq \pm (0,05 + 0,5 \cdot L) \mu\text{m}$  ( $L$  in m)  
 when calibrating the gauge blocks

\* Applicable to steel gauge blocks

Provided all the metrological conditions are met, the reliability of both executions No. 05930001 and 05930003 along with the option for greater accuracy (No. 01690021) is expressed as follows:

Repeatability limit (with no effect due to external temperature):  $0,015 \mu\text{m}$

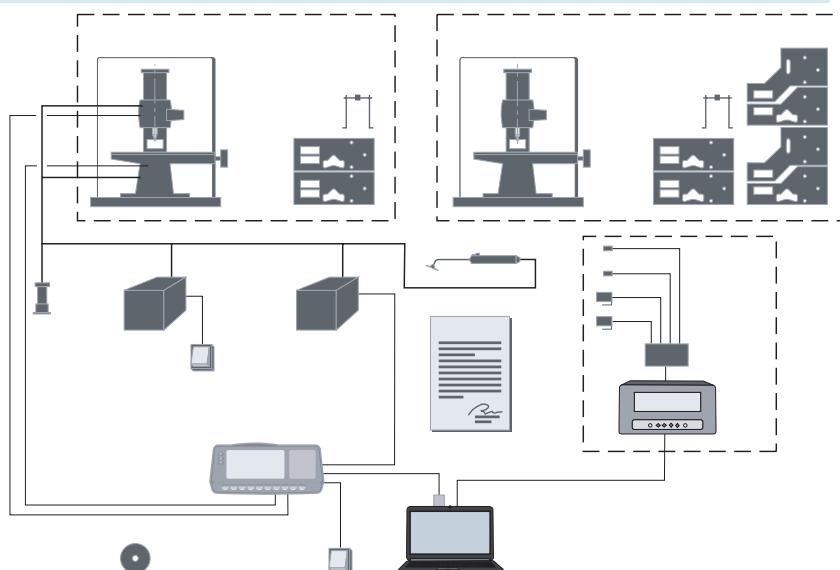

Measurement uncertainty\*  
 $U = \pm (0,05 + 0,5 \cdot L) \mu\text{m}$  ( $L$  in m)

Condition involves the use of reference standards (see page L-14 and L-15) whose uncertainty is as follows:

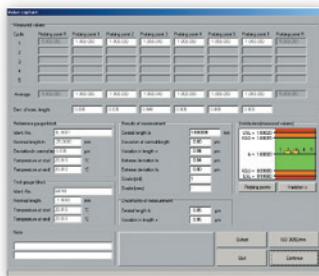

$U \leq \pm 0,015 \mu\text{m}$   
 when calibrating the comparator  
 $U \leq \pm (0,02 + 0,2 \cdot L) \mu\text{m}$  ( $L$  in m)  
 when calibrating the gauge blocks

## TESA UP – Software Programme for Value Processing

TESA UP programme for processing measured values suitable for both TESA gauge block comparators UPD and UPC as well as for comparators from other manufacturers.

- Choice of 10 languages.
- On-line processing of length and temperature values as transferred.
- Measurement cycles and result outputs according to EN ISO 3650.
- Flexible architecture for optimum adaptation to specific user's needs.
- Possible entry of limit values and accuracy grades peculiar to users.
- Surveillance of value dispersion or value drift throughout length and temperature measurements.
- Automatic execution of all relevant corrections. The programme makes allowances for actual sizes of the reference standards, flattening due to different materials used (steel, tungsten carbide, ceramic), compensation of temperature variations with reference to 20°C according to the varying coefficients of linear expansion – as typical examples.
- Assignment of gauge blocks to their relevant grade.
- Possible storage of gauge block set related data.
- Inch or metric value processing.
- Calibration certificate in several formats.

EN ISO 3650

Minimum profile requirements for the computer needed to run the TESA UP software programme Personal Computer

- Configuration without heat source to avoid disturbing the ambient temperature at the measurement spot
- Operating system: Windows 7 or earlier versions (32 bits)
- Processor: 650 MHz
- 1 Hard disc (6 GB)
- RAM capacity: 64 MB
- CD-ROM drive (24x)
- RS232 serial port 1 for length values 1 for temperature values
- 3 USB ports

**05960025** TESA UP software programme for gauge block calibration

1 CD-ROM plus 1 USB key of protection

## Gauge Blocks for the Calibration of Comparators

To calibrate both TESA gauge block comparators UPD and UPC, we recommend the use of the gauge block set described hereafter. The 9-piece set is also required for calibrating TESA UPD.

### Set composition including 11 steel gauge blocks, class K

Each pair is in full compliance with:

- EAL-G21 – Calibration of gauge block comparators – European cooperation for Accreditation of Laboratories
- DKD-R 4-1 – Guidelines of the German Calibration Service (DKD) for the calibration of gauge block comparators.

**S59110152** Set of 11 gauge blocks with PTB (Physikalisch Technische Bundesanstalt) certificate  $\pm 0,015 \mu\text{m}$

**S59110489** Set of 11 gauge blocks with DAkkS certificate  $\pm 0,030 \mu\text{m}$

Full tungsten carbide set also available on request

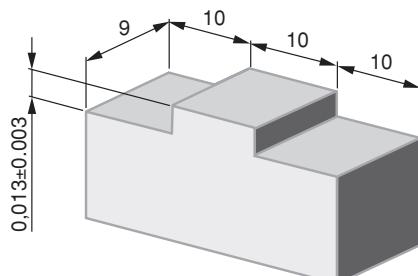

EN ISO 3650

Special high-alloy steel, wear resistant and stable. Exception: 6 mm special carbide gauge blocks.

The given expanded uncertainty  $k = 3$  refers to the difference of central length of both gauge blocks A and B forming the pairs 1 to 5 as well as to the deviations  $f_u$  and  $f_d$  from the central length of gauge blocks forming both pairs 2 and 3. No need to calibrate those of pair No. 6.

Pairs N°	Nominal length A mm	B mm
1	0,5	0,5
2	1,0	1,005
3	1,0	1,01
4	4,5	4,5
5	100,0	100,0
6	6,0	6,0 *

\* Special bridge-shaped gauge blocks (see drawing) used for establishing the measuring deviations of lower probe B.

and stableFor calibration  
certificates, see  
oppositeExpanded uncer-  
tainty  $k = 2$  is valid  
for that given

## Additional Gauge Block Set for Calibration of the TESA UPD System

In order to achieve the lowest uncertainty of measurement, we recommend the use of grade K gauge blocks which have been measured directly by interferometry and are supplied with a calibration certificate, irrespective of any other requirement such as the ambient conditions.

S59300103	Set 9 gauge blocks with METAS certificate (Swiss)	$\pm 0,02 + 0,2 \cdot L \mu\text{m}$ (L in m)
S59300107	Set 9 gauge blocks with PTB certificate (Germany)	$\pm 0,02 + 0,2 \cdot L \mu\text{m}$ (L in m)
S59300104	Set 9 gauge blocks with SCS certificate	$\pm 0,05 + 0,5 \cdot L \mu\text{m}$ (L in m)

	Set composition (mm) 1 / 5 / 10 / 15 / 20 / 25 / 50 / 75 / 100
	Steel
	Accuracy grade K

Other set composition or carbide gauge blocks also available on request.

## TESA UPT

Fully calibrated for the measuring ranges from 19°C up to 24°C with a numerical interval to 0,001°C.

Supplied with a calibration certificate issued by the Swiss Calibration Service (SCS). Uncertainty of measurement achieved during calibration  $U = \pm 0,03^\circ\text{C}$ .

# ETALON POLO HORIZONTAL MEASURING BENCH

A giant for small sizes – Specially designed for the control of measuring and test equipment in compliance with ISO 9000.

- Application range from 0 up to 100 mm for external dimensions of 2,5 up to 110 mm for internal dimensions – 50 mm measuring span.
- Resolution to 0,001 or 0,0001 mm – Metric/Inch conversion.
- Maximum permissible error of 0,5 µm.
- Measuring force from 0 to 4 N.
- Comes with a calibration certificate issued by the supplier.

#### Calibration of Standards:

- Cylindrical test pins
- Setting standards with cylindrical, plane-parallel measuring faces
- Threaded reference gauges (calibrated using the 3-wire method)
- Setting masters
- Setting rings

#### Calibration of Plus Gauges:

- Limit plug gauges
- Plug gauges "GO"
- Plug gauges "NO GO"
- Plain plug gauges
- Ring gauges "GO"
- Ring gauges "NO GO"
- Threaded plug gauges

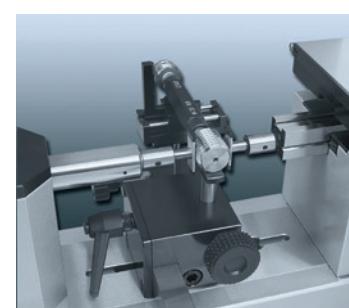

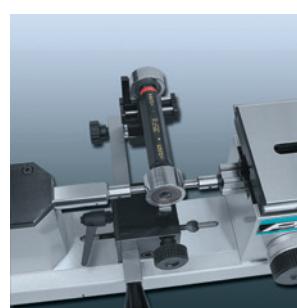

#### Workpiece Inspection:

##### *External dimensions*

- Stepped shafts
- Cutting tools
- Cylindrical pins
- Ball tips
- Grooves
- Short centring shoulders
- Threads (measured according to the 3-wires method)

##### *Internal dimensions*

- Through bores
- Blind bores
- Centring grooves
- Slots
- Sliding guides

	Max. perm. error within the measuring span: 0,5 µm with standard accessories
	0,1 µm
	Opto-electronic measuring system with incremental glass scale, type LIF - HEIDENHAIN

### Pair of Standard Measuring Inserts for External and Internal Dimensions from 10 mm

## Description

05969020	1 Pair of standard inserts for internal dimensions from 10 mm	To be used with floating table N° 05960015, H = 20 mm
05969024	1 pair of inserts for external dimensions	6,5mm Ø carbide inserts with a flat face

### Measuring Inserts for Internal Measurement used with the Floating Resting Table

Height H = 20 mm. M4 locking screw.

## Description

05969021	Internal measuring inserts from 2,5 mm	Barrel-shaped inserts with a 1,2 mm dia. carbide ball tip.
05969022	Internal measuring inserts from 13 mm	Fitted with a 6 mm dia. carbide ball tip.
05969023	Internal measuring inserts from 5 mm	Fitted with a 1,5 mm dia. carbide ball tip.

### Bench Stand with Swivelling Plate

For raising the measuring bench form horizontal to vertical position.  
Accomodates a clamp lever. Length (upright): 295 mm, mass ≈ 20 kg.

05969000 Bench stand with swivelling plate

### Base for the Computing Counter

Base for raising up the HEIDENHAIN ND 287 counting unit, height 380 mm, weight 5,2 kg.

05969001 Stand for computing counter

### Floating Resting Table

Used for external measurement on oblong parts up to 60 mm in diameter; centres, L=160 mm; movable positioning fixture for parts having varying lengths, 3 freedom degrees.

05969032	Resting table without vise
05969033	Vise for plug gauges
05969034	Floating table

### Stands for Checking External Dimensions

05969007	Ø 3 mm stand for external Ø
05969008	Ø 6 mm stand for external Ø

### Stand with Ø 10 mm Fixing Bores

For H-shaped table (05969003) and for control system for lever-type indicator (05969004)

05969002 Stand with Ø 10 mm bore for 05969003 and 05969004

### Centering Device

Allows the user to search for the transverse culmination point against the measuring direction. Used with either the fixed or floating table No. 05969014 or 05969015. Prismatic stop adjustable transversely, max. diameter 110 mm. Counter pressure piece finished with cylindrical stop pins.

05969012 Centering device for culmination point

### Fixing Shank

For clamping the instruments that need to be calibrated such as dial gauges or precision indicators etc.

05969010 For fixing shafts with a Ø 8 mm

05969011 For fixing shafts with a Ø 3/8 in

### Holder for a Dial Test Indicator (Lever-type)

Provided with 2 dovetail clamps, TESATAST-type or in compliance with BS 2795:1981

05969004 Holding device for test indicator

### Spindle for Calibrating Dial Gauges, Dial Test Indicators and such like

Setting range = 50 mm, Spindle rotation = 0,5 mm

05969009 Spindle for calibrating dial gauges, dial test indicators and such like

# Surface Roughness Testing

# THE ROUGHNESS PARAMETERS MOST COMMONLY USED ARE: RA, RZ AND RMAX

## TESA RUGOSOFT and MEASUREMENT STUDIO Software

These software tools allow the storage of surface roughness measurements along with roughness parameters and roughness profile. A measuring programme created in the software can be transferred to the instrument together with measuring parameters. The results are available at all times, complete with statistical analysis and can be exported for reports, for example.

## Mean roughness Ra (ISO 4287, DIN 4768)

The mean roughness Ra matches the arithmetical mean of the absolute values related to the profile deviation  $y$  within the reference length  $l$ .

## Max. profile valley depth Rmax (DIN 4768)

The max. profile valley depth Rmax is for the most significant single roughness depth  $Z_i$  within the total length  $l_m$ .

According to ISO 4288 and DIN 4287 - Part 1, this parameter is also specified as Ry max.

## Mean roughness depth Rz DIN (DIN 4768)

The mean roughness depth Rz is the arithmetical mean of single roughness depths of successive sampling lengths  $l_e$ . According to ISO 4287 and DIN 4762, the parameter Rz DIN is also specified as Ry5.

Since Rz changes its name in both DIN 4768 and ISO 4287, this parameter is also specified as Rz DIN or Rz ISO. If the parameter Rz is measured according to DIN, it is generally admitted that the extreme value specified by ISO is matched providing that Rz ISO does not exceed Rz DIN.

## Use of Roughness Comparison Specimens

These specimens are used for testing any surface finish quality and have long proven their value in practice.

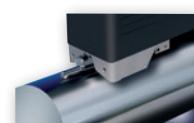

They are used for touch and/or sight comparisons against the surface of work pieces that are produced using the same manufacturing process.

The condition is that materials have to be comparable.

When comparing the workpiece surface against the specimen, roughness is not quantitatively expressed. The assessment of the extent to which the surface finish of both is alike can only be subjective.

Sight comparison requires optimum light source angle. For small surfaces, the use of a magnifying glass with up to 8x magnification is recommended.

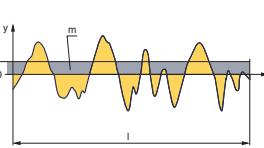

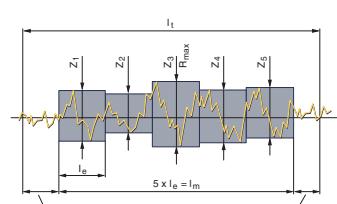

Touch comparison is made using the finger tip or a small copper piece such as a coin, for instance.

RUGOSURF 20

RUGOSURF 90G in profile measuring mode with PROFILE SET 2 mm

RUGOSURF 20 with dot matrix printer

RUGOSURF 90G

## RUGOSURF 20, RUGOSURF 10G, RUGOSURF 90G ROUGHNESS GAUGES

TESA offers a range of 3 portable RUGOSURF roughness gauges adapted for different levels of precision from the production floor to the test laboratory.

These devices are particularly appreciated by operators for their ease of use, robustness and reliability.

The range includes data management software to process measured values for an optimal overview of roughness profiles, statistical data and customizable measurement reports.

RUGOSURF 20

RUGOSURF 10G

RUGOSURF 90G

## TESA RUGOSURF 20

Portable roughness gauge, robust and versatile.  
Well suited for production environments or inspection of inward goods.

Measures roughness parameters according to:

- ISO 4287
- JIS B0601
- DIN and ISO 12085 (MOTIF or CNOMO).

	ISO 3274 (Cl. 1)
	122 x 60 x 62 mm (without probe)
	USB
	650 g

Measuring range in the Z-axis of 400 µm (6300 µin).

15 roughness parameters.

Each parameter can be activated individually or not.

Possible tolerancing of parameter values.

Scope of supply

With a measuring stand  
with suction base

Measurement of  
narrow hard to reach  
crevices thanks to  
the 100 mm probe  
extension

With vertical  
positioning support

Direct display:

- of all measured values, with tolerance levels display,
- of R roughness profile,
- the Bearing Area Curve (BAC),
- the Amplitude Distribution Curve (ADC).

2" Black&White LCD screen, high contrast for optimum visual representation.

Flexible autonomy through mains adapter or battery pack.

Storage of the measured parameters.

Multilingual menu options.

USB cable connection (optional).

Direct printing to a dot matrix printer (optional).

Measurement transfer, database creation and reporting available using TESA RUGOSOFT software tool (optional).

Access to narrow and hard to reach locations possible through 100 mm probe extension (optional).

- Description:
1. Start / Measure
  2. Probe protection
  3. LCD 2" screen
  4. Enter key
  5. Defilement key
  6. Return key / Measurement parameters
  7. ON/OFF Switch

## TESA RUGOSURF 10G

Portable, versatile gauge unit with compact design, well suited for use in goods inwards inspection, production or the measurement laboratory.

3 horizontal measuring positions of probe 0°, -90° et +90°.

Measures roughness parameters according to standards:

- ISO 4287
- JIS B0601
- DIN and ISO 12085 (MOTIF or CNOMO).

TFT 2" graphic display for optimum visual representation of any measured parameters and workpiece profiles.

Direct displaying of all measured values and computed profiles.

31 roughness parameters available.

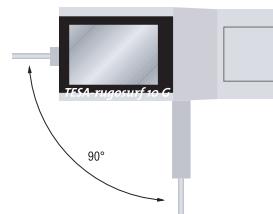

Flexible autonomy through mains adapter or battery pack.

Data storage, printing or transfer to a PC of a maximum of 999 measured results.

Possible tolerancing of all parameter values.

Multilingual menu options.

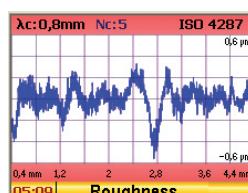

USB data output enabling a direct connection to a matrix printer unit or a PC equipped with RUGOSOFT 10 software (both are optional).

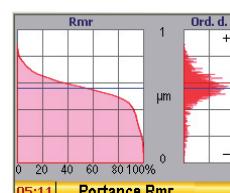

Probe measuring positions at -90°, 0°, +90°

Measurement with or without skid

## TESA RUGOSURF 90G

Small-size, versatile roughness gauge with tactile colour screen providing maximum ease of use. Ideally suited for high-precision measurements on the shop floor or in the inspection laboratory.

### Special features of RUGOSURF 90G:

- Supplied with SB60/10 probe with removable pad: one single probe can be used to measure roughness or undulation!
- RUGOSURF 90G can measure components with a height of up to 90mm, thanks to a vertical positioning screw without any additional accessory!
- With the PROFILE SET 2 mm (06960100) RUGOSURF 90G becomes a profile measurement instrument with a width of 2000 µm measuring in the Z axis (optional)!

Tactile TFT 3.5" colour screen.

Direct display of all measured values and computed profiles.

### Measuring span

$$Z = 1000 \mu\text{m} (0.039 \text{ in})$$

$$X = \text{up to } 50 \text{ mm}$$

Special 2 in 1 probe can measure with contact skid (roughness measurement) or without contact skid (measure of undulation).

Vertical adjusting screw for probe positioning up to a height of 90 mm without the need of an accessory.

Tolerancing of all parameters possible.

USB digital output for transfer of measured values to a PC with TESA MEASUREMENT STUDIO software (optional).

Unique in its category, this instrument can also do profile measurement ( $Z = 2 \text{ mm}$ ) if used with PROFILE SET 2 mm (optional).

Measures roughness parameters according to standards:

- ISO 4287
- 12085 (CNOMO)
- ISO 13565
- DIN 4776
- JIS B0601:2001
- ASME B46-2002

	ISO 3274 (cl. 1)
	270 x 140 x 90 mm (without probe)
	USB
	3 kg

**OPTIONAL ACCESSORIES:**

06960062	Cable RUGOSURF 10G and RUGOSURF 90G to PC (connector v3)
06960033	Printer for RUGOSURF + cables
06960048	MEASUREMENT STUDIO software + dongle for RUGOSURF 90G
06960055	Granite 630 x 400 mm with vertical support H250mm, 60 kg, Grade 0 for RUGOSURF 90G
06960064	Roughness standard Ra = 0,1 µm (4 µin)
06960065	Roughness standard Ra = 0,5 µm (20 µin)
06960066	Roughness standard Ra = 1,0 µm (40 µin)
06960100	PROFILE SET 2 mm for profile measurement with RUGOSURF 90G
06960056	100 mm extension for probe with skid for RUGOSURF 20, 10G, 90G
06960067	SB60/10 2µm probe for RUGOSURF 90G as SB60/10 but R = 2 µm
06960050	SB20P probe for RUGOSURF 90G for grooves of depth < 5 mm
06960051	SB30P probe for RUGOSURF 90G for small bores with Ø > 4 mm
06960052	SB40P probe for RUGOSURF 90G V-shape for cylinders with Ø > 1 mm
06960053	SB50P probe for RUGOSURF 90G for concave surfaces and for measuring at 90° with RUGOSURF 90G
06960054	SB120P probe for RUGOSURF 90G for grooves of depth < 20 mm
06960058	SB120S probe without skid for RUGOSURF 90G for grooves of depth < 15 mm
06960061	SB60-D2-L30 probe, L = 30 mm for RUGOSURF 90G for small bores of Ø > 2 mm

**STANDARD ACCESSORIES:**

06960049	SB60/10 standard probe for RUGOSURF 90G R = 5 µm, 90° detachable skid
06960041	Roughness standard Ra = 2,97 µm (117 µin)
056645	Transport case with internal protective foam for RUGOSURF 90G

Roughness parameters according to: ISO 4287, ISO 13565-1, ISO 13565-2, ISO 12085, VDA 2007

Z = 2 mm  
X = 50 mm

Z = 0,1 µm  
X = 0,4 to 4,0 µm according to the length being measured

Z = 3,5 + 0,75\*H microns, (H in the Z axis, in mm) X = 3,5 + L/10 microns (L in the X axis, in mm)

0,3 mg (0,003 mN) with the SB2000 probe

1 mm/s

Maximum angle of 70° (upward position); maximum angle of 85° (downward position)

## TESA PROFILE SET 2 mm

PROFILE SET 2 mm for profile measurement (compatible with RUGOSURF 90G).

When equipped with the SB2000 probe and used with the PROFILE STUDIO software dedicated for profile measurement STUDIO PROFILE, the RUGOSURF 90G roughness gauge converts into a profile-measuring tool.

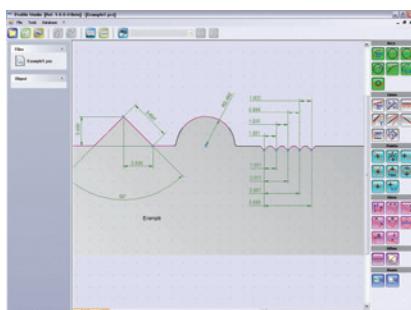

A simple, ingenious and accurate solution, this optional accessory measures lengths, radii and angles of parts which are sometimes impossible to verify by other means.

The setting up and the evaluation of measurements is simple and fast. Dimensions can be inserted into the measured profile after defining geometric elements (point, line, arc or intersection between two lines, for example). The tolerance values allow verification of the results at a glance. Rotation and symmetry of the profile also allows its orientation.

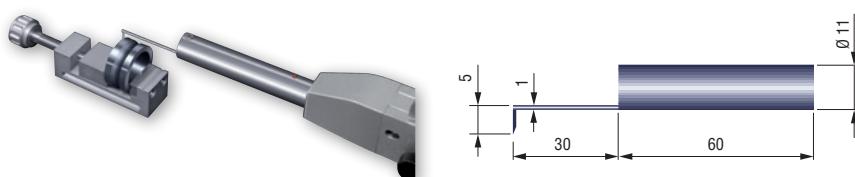

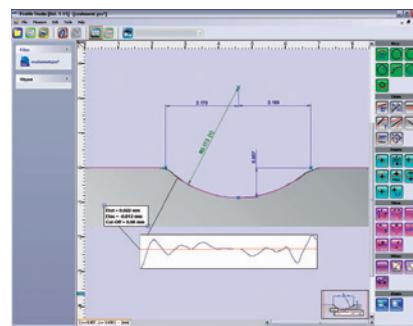

A previous measurement can be used as model for the repeated measurement of a part of identical geometry. This saves valuable time and facilitates operations as important manual measurements can be replicated automatically.

A standard profile with a measurement report is included in the PROFILE SET 2 mm set.

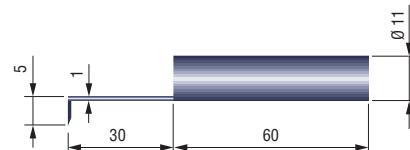

A detailed measurement report with customizable header can be generated from the PROFILE STUDIO software.

PROFILE STUDIO software

SB2000 probe

**06960100** PROFILE SET 2 mm  
for profile measurement with RUGOSURF 90G

**DELIVERED WITH THE FOLLOWING ACCESSORIES:**

**06960101** PROFILE STUDIO Software

**06960102** SB2000 probe for PROFILE SET 2 mm,  
R = 15 µm, 20°

**06960103** Setting master for PROFILE SET 2 mm

**06960062** Cable RUGOSURF 10G and RUGOSURF 90G to PC (connector v3)

## RUGOSOFT Software

Software for RUGOSURF 20 and RUGOSURF 10G.

Enables the user to import stored measurement values from the device to the computer for the management of a database.

Optimal and detailed visualization of the results: parameters, profiles (R roughness and P primary profile) or a combination of both.

Calculation of roughness parameters.

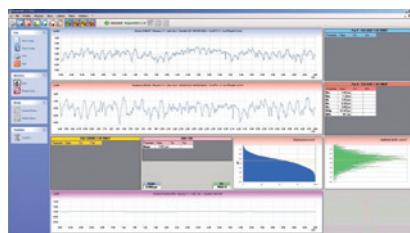

Statistical analysis of a set of measurements.

Creation and storage of measuring programs (instrument parameters and parameters to be measured) in the software, which can then be loaded onto the instrument.

Customizable measurement report.

Output from the PC

- measuring results with measuring parameters
- profiles as coordinates
- measuring report in format: .xls .pdf .doc .rpt (Crystal Report) or also .rtf (Rich Text Format)

Included in delivery

- USB protection key (dongle)
- Installation CD, 6 languages
- User instructions (included on the installation CD)
- USB connection cable to the PC for RUGOSURF 10G and RUGOSURF 90G, length 1,80 m

06960048 MEASUREMENT STUDIO software + dongle for RUGOSURF 90G

## PROFILE STUDIO Software

For profile measurement using the RUGOSURF 90G.

Allows evaluation of micro and macro geometric characteristics of a surface.

Measurement programme creation that can be saved for the same measurements on a batch of identical parts from the same set or for subsequent batch measurements: it is possible to use all the dimensions and tolerances of a reference profile for a measurement of a batch of the same part.

Measurement instructions and help assistance for calibration controlled from the PC.

Import and export of measurement parameters from and to the device.

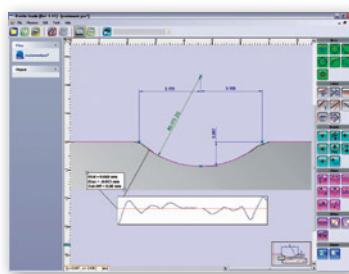

Storage of measurement results and of the measured parameters as database.

Database search with filters (date, operator, batch, etc.).

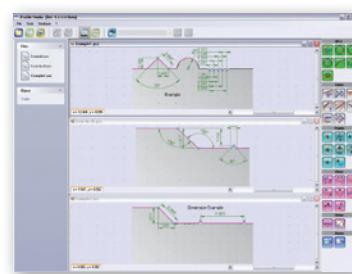

Detailed visualization of the measured profile and geometric construction tools (arc, line, point, intersection, angle, etc.).

Measurements reports with customizable header.

Languages: English, German, French, Spanish, Italian, Portuguese, Slovenian.

PROFILE STUDIO software

Measurement of geometric elements

06960101

PROFILE STUDIO Software

Included in delivery

CD with PROFILE STUDIO software

OPTIONAL ACCESSORIES:

06960102 SB2000 probe for PROFILE SET 2 mm, R = 15 µm, 20°

06960103 Setting master for PROFILE SET 2 mm

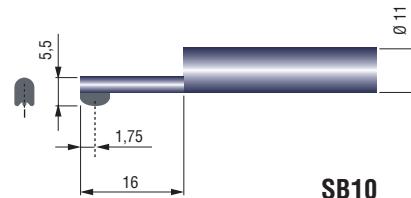

06960062 Cable RUGOSURF 10G and RUGOSURF 90G to PC (connector v3)

## PROBES FOR TESA RUGOSURF

Standard probes for TESA RUGOSURF roughness gauges, available with different geometries and sizes according to the nature and type of surface being measured.

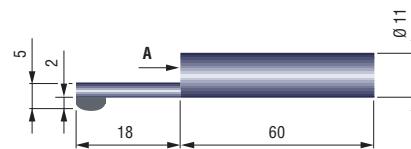

### Standard Probes

Standard probes supplied with TESA surface roughness gauges and SB2000 probes for profile measurement

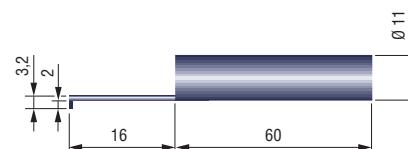

SB10

SB10 probe

SB60/10 probe with removable skid for RUGOSURF 90G

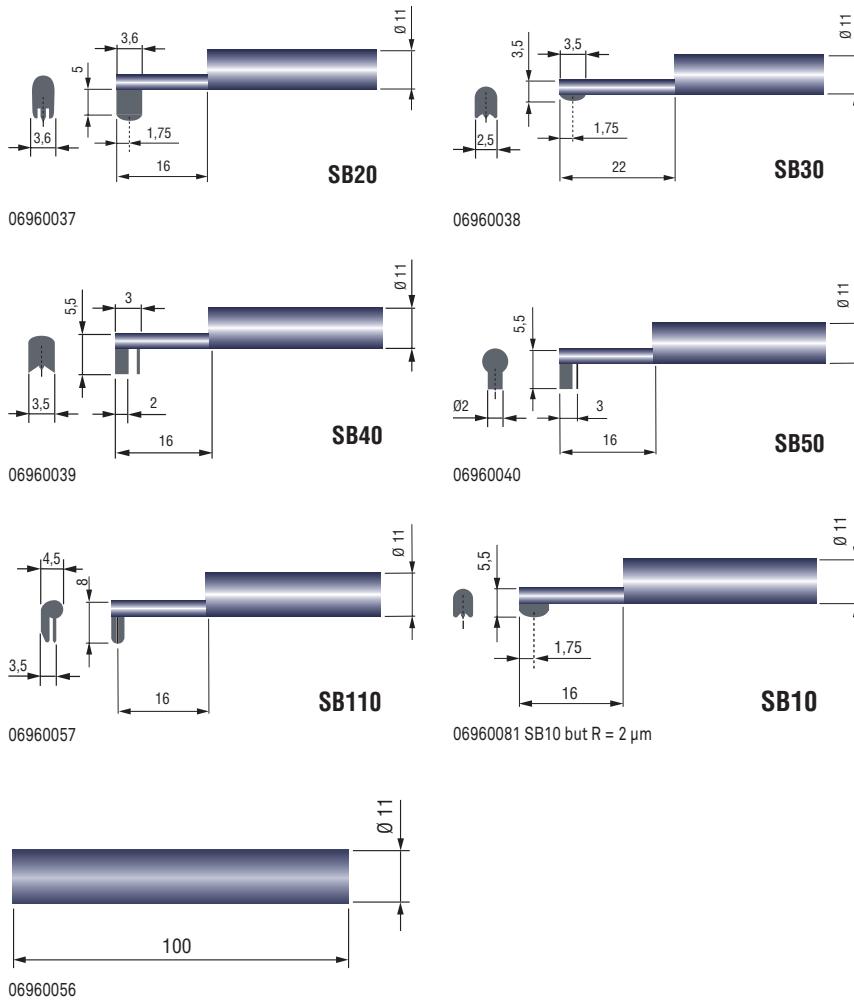

SB2000 probe without skid

	
06960036	SB10 standard probe for RUGOSURF 20 and 10G R = 5 µm, 90°
06960049	SB60/10 standard probe for RUGOSURF 90G R = 5 µm, 90° detachable skid

Unless otherwise stated, 90° diamond tip, radius R = 5 µm

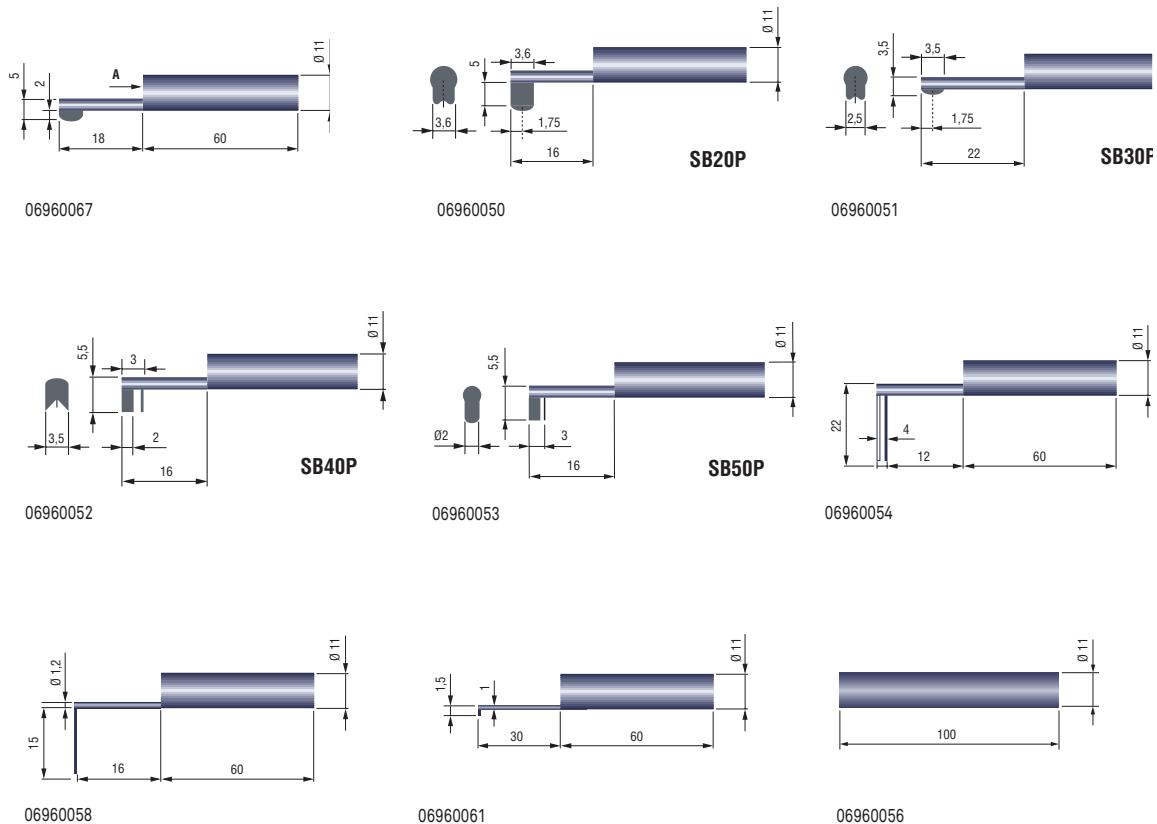

**Optional Probes for RUGOSURF 20 and 10G**

	<b>NO</b>	<b>=</b>
06960037	SB20 probe for RUGOSURF 20 et 10G for grooves of depth < 5 mm	
06960038	SB30 probe for RUGOSURF 20 and 10G for small bores of Ø > 4 mm	
06960039	SB40 Probe for RUGOSURF 20 and 10G V-shape for cylinders of Ø > 1 mm	
06960040	SB50 probe for RUGOSURF 20 and 10G for concave surfaces and for measuring at 90° with RUGOSURF 10G	
06960057	SB110 probe for RUGOSURF 20 and 10G for concave or convex surfaces, R > 5 mm	
06960081	Probe SB10 2µm for RUGOSURF 20 and 10G as SB10 but R = 2 µm	
06960056	100 mm extension for probe with skid for RUGOSURF 20, 10G, 90G	

Unless otherwise stated, 90° diamond tip, radius R = 5 µm

## Optional Probes for RUGOSURF 90G

No	
06960067	SB60/10 2µm probe for RUGOSURF 90G as SB60/10 but R = 2 µm
06960050	SB20P probe for RUGOSURF 90G for grooves of depth < 5 mm
06960051	SB30P probe for RUGOSURF 90G for small bores with Ø > 4 mm
06960052	SB40P probe for RUGOSURF 90G V-shape for cylinders with Ø > 1 mm
06960053	SB50P probe for RUGOSURF 90G for concave surfaces and for measuring at 90° with RUGOSURF 90G
06960054	SB120P probe for RUGOSURF 90G for grooves of depth < 20 mm
06960058	SB120S probe without skid for RUGOSURF 90G for grooves of depth < 15 mm
06960061	SB60-D2-L30 probe, L = 30 mm for RUGOSURF 90G for small bores of Ø > 2 mm
06960056	100 mm extension for probe with skid for RUGOSURF 20, 10G, 90G

Unless otherwise stated, 90° diamond tip, R = 5 µm

## DOT MATRIX PRINTER FOR RUGOSURF

Dot matrix printer for TESA RUGOSURF portable roughness gauges and with built-in batteries, which enable the printing of measured parameters and roughness profiles regardless of the environment and the conditions.

It is also possible to print stored measurements data from the instrument memory.

### PR Dot Matrix Printer

Dot matrix printer for TESA RUGOSOFT roughness gauges.  
For printing measured parameters, and roughness profiles.  
Also for printing measurement data saved in the instrument memory.

PR dot matrix portable printer for RUGOSURF

06960043	Set of 3x ink ribbons for dot matrix printer
06960044	Set of 10 paper rolls size 57 mm for dot matrix printer
056133	Power supply 100 ÷ 240 V, 50 ÷ 60 Hz, 0,5 Ah, Output 9 V DC, max. 18 W, 5,5 mm connector with EU and US adapter, for PR dot matrix printer
056223	Transport case with foam for internal protection of PR dot matrix printer

## ACCESSORIES FOR TESA RUGOSURF, PROFILE SET 2 MM

Accessories for TESA RUGOSURF surface roughness testers, including Ra roughness specimens, granite bases with measuring supports, vertical supports for positioning, etc.

### Other Accessories for RUGOSURF

External control for RUGOSURF 10G or 90G

Fixing pin Ø 8mm for universal support for RUGOSURF 20 ou 10G

Vertical positioning supports for RUGOSURF 20 or 10G

Probe holder for RUGOSURF 90G

06960042

<b>056631</b>	Adjustable vertical positioning supports (2 parts) V-form for cylinder Ø > 100 mm for RUGOSURF 10G
<b>057655</b>	Vertical and adjustable positioning supports (2 parts) V-form for cylinder Ø > 100 mm for RUGOSURF 20
<b>056633</b>	Fixing pin Ø 8 mm for universal support for RUGOSURF 20 and 10G
<b>056641</b>	Probe holder with two positions – blocked position for measuring with a probe without skid – free position for measuring with a probe with skid for RUGOSURF 90G
<b>06960042</b>	External control for RUGOSURF 10G and 90G
<b>06960059</b>	External control with PR dot matrix printer cable for RUGOSURF 10G and 90G

## Chargers and Rechargeable Batteries

06960045

<b>06960045</b>	Battery NiMH 7,2 V, 300 mAh, format PP3, for RUGOSURF 20 et 10G
<b>056224</b>	Battery NiMH 12 V, 1800 mAh, for RUGOSURF 90G
<b>06960046</b>	Charger and power supply 100 ÷ 240 VAC, 50 ÷ 60 Hz, 12 V, 400 ÷ 600 mAh with EU and US adapter for RUGOSURF 20 and 10G
<b>056639</b>	Charger and power supply 100 ÷ 240 VAC, 50 ÷ 60 Hz, 18 V, 2,2 Ah with EU and US adapter for RUGOSURF 90G

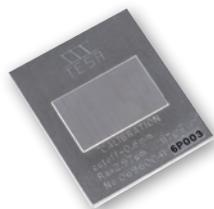

**Granite Bases with Measuring Support for RUGOSURF***Granite base with measuring support for RUGOSURF 20 or 10G**Granite base with measuring support for RUGOSURF 90G with manual vertical positioning device*

No	=
06960035	Granite 400 x 250 mm with vertical support H 150 mm, 25 kg, Grade 0 for Rugosurf 20 and 10G
06960055	Granite 630 x 400 mm with measuring support and manual vertical positioning device H250mm, 60 kg, Grade 0 for RUGOSURF 90G

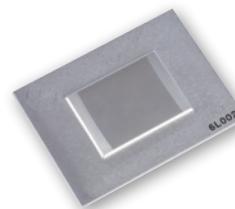

## Ra Roughness Standards

As per EN ISO 5436-1 standard

Standard Ra = 2,97  $\mu\text{m}$

Standard Ra = 1,00  $\mu\text{m}$

Standard Ra = 0,50  $\mu\text{m}$

Standard Ra = 0,10  $\mu\text{m}$

**No****=**

06960041	Roughness standard Ra = 2,97 $\mu\text{m}$ (117 $\mu\text{in}$ )
06960066	Roughness standard Ra = 1,0 $\mu\text{m}$ (40 $\mu\text{in}$ )
06960065	Roughness standard Ra = 0,5 $\mu\text{m}$ (20 $\mu\text{in}$ )
06960064	Roughness standard Ra = 0,1 $\mu\text{m}$ (4 $\mu\text{in}$ )

## Setting Standard for PROFILE SET

# Height Gauges

# INSPECTION DURING THE COURSE OF THE MANUFACTURING PROCESS

Height gauges are single-axis handtools made to measure on a surface plate, preferably on granite. The TESA- $\mu$ HITE version being offered in this section clearly shows that combining a surface plate with any height gauge can create a complete measuring system.

Providing the necessary versatility, they are well suited for dimensional inspection directly on a machine or a group of machines, usually during the various setting and sampling operations throughout the whole manufacturing process.

They are specially made for checking parts that are difficult to machine due to their critical sizes.

TESA-HITE or TESA MICRO-HITE, whether manually operated or motor-driven, do not require any special skills. Nearly everyone working in the workshop can use them easily.

## SCS Calibration Certificate

The newly implemented TESA-HITE and TESA MICRO-HITE production line now also includes its own temperature-controlled laboratory recently certified by the Swiss Accreditation Service (SCS), so that each height gauge comes with a SCS calibration certificate provided free of charge.

The negligible temperature variation along with the use of high-precision step gauges allow the lowest uncertainty of measurement to be achieved during the calibration process.

As a first step, all values needed for automatic compensation for the systematic errors of the finished height gauge through Computer Aided Accuracy (CAA) are captured.

Once conveniently calculated, each single compensation value is then stored in the tool memory so as to allow the automatic calculation of the measured values during calibration.

Finally, the relevant calibration certificate is issued based on the values obtained during a new series of measurements taken at another measuring station, also equipped with step gauges. The applied calibration procedure together with the SCS based certification ensure that every TESA height gauge is traceable to national standards.

## Height Gauges – One of TESA's Strengths

TESA offers the largest range of height gauges for reliable one or two-dimensional measurements. End users can choose the most suitable model not only according to the requirements of their metrology applications, but also according to their financial resources.

This wide range goes from the simple height and scriber gauge to the motorised vertical column suitable for high-precision measurements in two coordinate directions.

## TESA-HITE Magna 400 and 700

Conceived using well-proven TESA technology, both the TESA-HITE magna 400 and 700 models are equipped with the TESA patented magna  $\mu$  measuring system and can be used in the harshest workshop conditions, especially where the gauges are exposed to splashing liquids of any kind and the penetration of dust particles. Their unique characteristics means that the gauges offer the most favourable price/performance ratio found in the market and constitute an essential tool in the workshop. Robust and reliable, their futuristic design guarantees maximum strength when used near production machines. Each height gauge is provided with a rechargeable battery and can be used to measure height or step dimensions as well as diameters, centre to centre distance of bores or grooves, the size of grooves and much more.

- Wide application range, two sizes available with measuring span to 415 mm/ 16 in or 715 mm/28 in, respectively.
- Electronics totally protected against oil and water splashing or dust particles (IP65).
- Control panel with numerical display to 0,001 / 0,005/0,01 mm or 0,0001/0.0002/ 0.001 in.
- Dynamic probing of the workpiece with a constant measuring force.
- Easiness, high reliability when checking bores or shafts using TESA's unique device for automatic detection of the culmination point – patented.
- Acoustic signal to acknowledge value capture, also conveniently programmable.
- Ability to measure parallelism errors.
- TESA's magnetic system, guaranteeing correct operating even in harsh workshop conditions – patented.
- Large LC display, also with symbols for the measuring functions.
- Zero-setting anywhere within the measuring range.
- PRESET function for entering any given value.
- Metric/inch conversion.
- RS 232 data output.
- SCS calibration certificate provided with each height gauge.

## TESA-HITE 400 / 700

By their robustness and reliability, the TESA-HITE 400 and 700 provided with its optoelectronic incremental rule (TESA patented) measurement system are ideally suited for applications in the workshop.

Their battery power gives them full autonomy.

Each version allows, among other things, the entry height dimensions or staged, the diameter, the distance between two grooves or two holes and groove width.

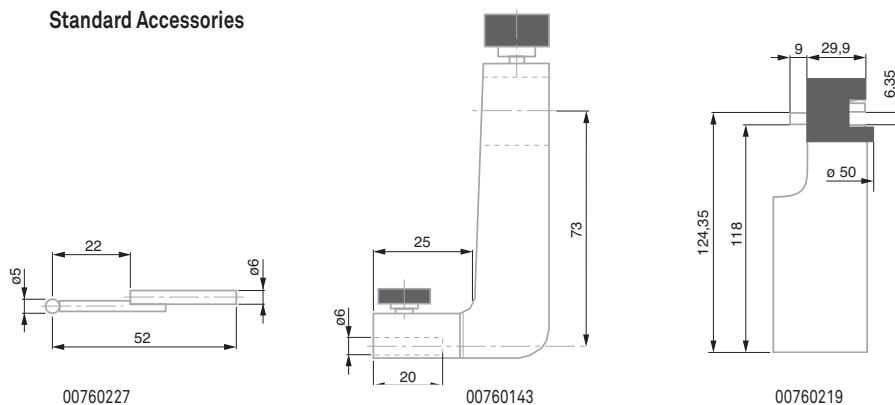

- Integrated air-bearing for easy displacement across the granite plate.
- Electronics totally protected against oil and water splashing, dust particles (IP65).
- Control panel with numerical display to 0,0001 / 0,001 / 0,01 mm or 0,00001 / 0,0001 / 0,001 in.
- Dynamic probing of the workpiece with a constant measuring force.
- Easiness, high reliability when checking bores or shafts using TESA's unique device for automatic detection of the culmination point – patented.
- Acoustic signal to acknowledge value capture, also conveniently programmable.
- Ability to measure any deviation in parallelism.
- Possible use of a digital sensor for determining perpendicularity errors with stated angle of the linear regression line.
- Patented TESA's opto-electronic system. Long-lasting stability of the glass scale for unbroken high accuracy.
- Large LC display with symbols for the measuring functions.
- Zero-setting anywhere within the measuring range.
- PRESET function for entering any given value.
- Metric/inch conversion.
- RS 232 data output.
- SCS calibration certificate provided with each height gauge.

## TESA-HITE Plus M 400 / 700

The added value of the motorised TESA-HITE plus M 400 / 700 is not only noticeable in their technical features, but also in their ease of use. Combine with the programming function, this solution is ideal for recurrent measurements in the shop floor environment.

Advanced functions allow for complex calculations such as those required for two-axis or perpendicularity measurement. These height gauges with outstanding features offer the most attractive price/performance relationship, making them indispensable for the workshop.

- Wide application range.
- Electronics entirely protected from the penetration of liquids and dust particles.
- Integrated air cushion, mounted control panel.
- Easy, intuitive use of the rotary power control.
- Provide all the measuring functions of a dedicated motorised column, including height, diameter, distance, parallelism, perpendicularity, straightness, angle and 2D measurement besides programming, automatic probing cycles, statistical value processing.
- TESA's patented measuring system, opto-electronic.
- Probe insert holder and inserts compatible with those of TESA MICRO-HITE.
- SCS calibration certificate attached to each height gauge.

	Factory standard
	Dual LC display, 128 x 63 mm in size. • Upper display field for length values (7 segments/sign) also with symbols for the functions. • Lower full dot display field for perpendicularity and straightness along with symbols for all operator-controlled function keys. • 7 segment display plus minus sign for the measured values

## TESA MICRO-HITE 350 / 600 / 900

Autonomous instruments for measurement in one or two coordinate directions of inside dimensions, outside, step, height, depth and distance on geometric elements with flat, parallel or cylindrical surfaces.

The culmination point is automatically entered on the bores and shafts - With memory function "max.", "min." and "max.-min." as dynamic measurement. The use of digital probe TESA IG-13 can also capture perpendicularity, rectitude and parallelism differences, as well as errors of radial and axial runout. Operating results in accordance with ISO 1101.

- State-of-the-art concept associated with a high-quality design is the fruit of years of experience in the manufacture of electronic height gauges.
- Ideal for dimensional inspection close to the manufacturing cell. No cumbersome cables to clutter up the working area.
- Fast, simple and reliable probing of the workpiece or holes, especially.
- 3 main gauges available with either a 365, 615 or 920 mm measuring span.
- Numerical display to 0,0005, 0,001, 0,01 and 0,1 mm, or equivalent inch units.
- Extremely accurate measuring of deviations from length, straightness and perpendicularity due to the automatic correction of the bias errors through CAA (Computer Aided Accuracy).
- Coefficient of linear expansion identical to steel ( $11,5 \times 10^{-6} \text{ K}^{-1}$ ).
- POWER PANEL for value processing and output with interactive display to guide the operator.
- No manual calculation.
- 99 workpiece oriented measurement cycles, programmable. Each cycle includes a number of 64 features with related limits of size.
- Built-in printer for result output or possible use of an external printer unit to get a hard copy in A4 format.
- RS232 data output.
- Every height gauge comes with a SCS calibration certificate.

TESA IG-13

	Factory standard
	Incremental glass scale with reference point, dividing period of $20 \mu\text{m}$ . Opto-electronic value capture (TESA patent).
	Fixed zero
	$1,6 \pm 0,25 \text{ N}$
	300 mm/s 12 in/s
	Air cushion usable for easy move of the height gauge over the surface plate.
	RS232, opto-electronic
	Rechargeable batteries, 6 V, 3,0 Ah or mains adapter
	$\approx 12$ hours for one battery pack; $\approx 2$ hours for the pump used to form the air cushion
	Linear expansion $11,5 \times 10^{-6} \text{ K}^{-1}$
	IP40 (IEC 60529)
	Net weight (w/o panel nor battery pack) Main gauges 350: 33 kg 600: 38 kg 900: 45 kg

## TESA MICRO-HITE Plus M 350 / 600 / 900

All TESA MICRO-HITE plus M height gauges are unique in that they have exceptional metrological capabilities and can be used intuitively with ease.

This method allows form and position error to be easily and quickly detected by means of a lever-type dial indicator – Check deviations from straightness or parallelism according to ISO 1101 when used in conjunction with TESA IG-13 linked to the Power panel plus M.

- Modular design descending from the successful TESA MICRO-HITE dynasty.
- Also equipped with the unique rotary power control located close to the rugged base. This feature serves for guiding the column that moves on an air cushion, commanding fast motion of the probe insert and triggering all main measuring functions. Its intuitive use allows accurate, easy handling of the column. A simple rotation causes the measuring head to move rapidly, approach the contact point quickly or slowly, probe up- or downward or execute bore measurement.
- Available in three different sizes with a measuring span of 365, 615 or 920 mm.
- Choice between two control panels for value processing and output.
- Metric and inch LC display with a resolution to 0,0001 and 0,001 mm, or inch equivalent.
- Autonomous run through batteries. No cumbersome cable.
- Built-in air bearing for easy displacement over the surface plate.
- Motorised measuring head for fast, accurate probing at each contact point with a constant measuring force.
- TESA  $\mu$  system for matchless reliability and simplicity.
- High precision through CAA (Computer Aided Accuracy). All correction values stored in the memory still add to the mechanical precision.
- Coefficient of linear expansion matching that of steel ( $11,5 \times 10^{-6} \text{ K}^{-1}$ ).
- RS232 data output.
- SCS calibration certificate delivered with every height gauge.

	Factory standard

04761047 Connecting cable IG-13/Power Panel plus M 1 m (mini-DIN)

-  Factory standard
-  100 mm / 4 in
-  0 to 160 mm 0 to 6.3 in
-  0,0001 mm or 0.00001 in
-  Incremental glass scale with opto-electronic data acquisition. Grating period: 20 µm.
-  Accuracy class according to DIN 876, Part 1
-  finely lapped
-  Measuring table (Lx P x H) 200 x 300 x 50 mm, Ø column 50 x 300 mm.
-  Granite measuring table; dull-chrome plated steel column, hardened and ground.
-  0,63 ± 0,1 N and 1 ± 0,1 N, switchable. Electromotorised activation.
-  Numerical interval to 0,001 mm / 0,0001 in = 10 mm/s; to 0,0001 mm / 0,00001 in = 5 mm/s; fast displacement = 30 mm/s
-  Electro-motorised gauge head displacement; can also be moved manually.
-  Via the control panel
-  Linear expansion  $11,5 \times 10^{-6} \text{ K}^{-1}$
-  Fixed zero

## TESA-*µ*HITE

Compact design with measuring stand included – Sensor equipped with a system for coaxial measuring according to the Abbe principle or using an offset probe relative to the gauge axis. Measures internal, external, height, depth, step and distance dimensions on geometric elements having either a flat, parallel or cylindrical surface – Automatic detection of the culminating point on bores or shafts – Dynamic probing with memory functions "max.", "min." and "max.-min.". The whole system provides the best solution for measuring straightness, flatness and parallelism or inspecting axial and radial runouts depending on the chosen tool configuration.

- Ideal for workpiece inspection close to the production area.
- 100 mm measuring span.
- 0,001 mm and 0,0001 mm or 0.00001 in and 0.000001 in scales intervals.
- Max. perm. error as low as 2 µm (or 1 µm when checking coaxiality).
- Integrated temperature sensor so that the coefficient of linear expansion of each gauge unit matches that of steel ( $11,5 \times 10^{-6} \text{ K}^{-1}$ ).
- Motorised measuring head for fast probing at each point.
- Automatic value capture, controlled over the stability of the measuring force, but also all measured values.
- Constant measuring force through the motor-driven actuator. Switchable.
- No manual calculation needed.
- RS232 data output with direct connection to TESA PRINTER SPC.
- Memory capacity for 99 single values.

**00760186** Set of probe inserts for TESA- $\mu$ HITE

CONSISTING OF:

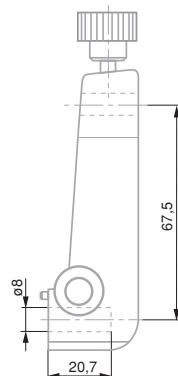

- 00760178** Hardened steel rod for grooves, centring shoulders, blind bores etc, angled through 8°
- 00760179** Tungsten carbide cylindrical rod for depth measurement
- 00760180** Probe inserts with a 0,9 mm dia. hardened steel ball tip
- 00760181** Probe inserts with a 1,9 mm dia. hardened steel ball tip
- 00760182** Probe inserts with a 2,9 mm dia. hardened steel ball tip
- 00760183** Hardened steel probe insert with a cone-shaped measuring face, 8 mm dia.
- 00760184** Extension, 20 mm, with a M3 thread for inserts with M3 thread
- 00760185** Extension, 20 mm, with a M3 thread for inserts with M2,5 thread
- 00760187** Probe insert holder

## Probe Holder No. 00760223 for Inserts with 8 mm Diameter

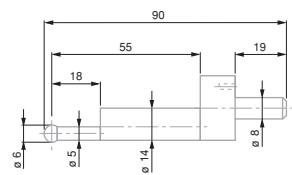

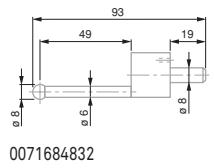

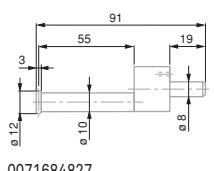

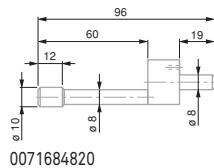

00760223 Probe holder for inserts with 8 mm diameter

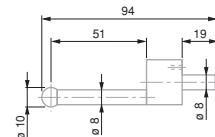

## Optional Accessories for Use with Insert Holder No. 00760223

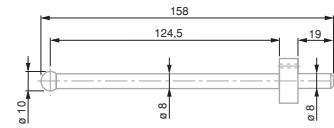

- 0071684815 Probe insert with a 4 mm dia. tungsten carbide ball tip
- 0071684816 Probe insert with a 6 mm dia. tungsten carbide ball tip
- 0071684817 Long probe insert with a 10 mm dia. tungsten carbide ball tip
- 0071684818 Probe insert with a 1 mm dia. steel tip, hardened. Also with adjustable shank for depth measurement.
- 0071684819 Probe insert with cone-shaped measuring face in hardened steel for  $\varnothing 5 \div 20$  mm
- 0071684820 Probe insert with cylindrical measuring face in hardened steel,  $\varnothing 10$  mm, 12 mm long
- 0071684822 Probe insert with cone-shaped measuring face in hardened steel,  $\varnothing 0.5 \div 5.5$  mm
- 0071684825 Probe insert with a 6 mm dia. tungsten carbide ball tip
- 0071684826 Attachment for interchangeable inserts with M1,4 thread. Supplied with 1 insert No. 01860201 having a 1 mm dia. carbide ball tip.
- 0071684827 Probe insert with disc-shaped face  $\varnothing 12$  mm, 3 mm wide
- 0071684828 Attachment for interchangeable insert with M1,4 thread. Supplied with 2 probe inserts No. 0186020 having a 2 mm dia. carbide ball tip
- 0071684829 Probe insert with a 10 mm dia. tungsten carbide ball tip
- 0071684832 Probe insert with a 8 mm dia. tungsten carbide ball tip

## Accessories for Measuring Perpendicularity by Means of a Dial Test Indicator

Used with TESA MICRO-HITE plus M, TESA MICRO-HITE, TESA-HITE 400/ 700 and TESA-HITE plus M 400/ 700.

00760222 Probe insert holder for a dial test indicator (lever-type)

-  Factory standard
-  Floating zero
-  DIN 862  
For lengths up to  
600 mm = 30 µm  
1000 mm = 40 µm
-  Steel base,  
hardened
-  Slider with inter-  
changeable scriber.  
Also with back  
mounted clamping  
holder having  
a 8 mm diameter.  
Slider with locking  
screw and fine  
adjust device.  
Base has a ground  
face with dust  
grooves. Top face  
also ground.
-  Preset and Hold  
functions

## ETALON Height and Scribing Gauges with Digital Display

Electronic height and scribing gauges

- Resolution to 0,01 mm/0.005 in
- RS232 interface

No.	mm	in	Column, mm	Base (L x H x W) mm
07739001	0 ÷ 300	0 ÷ 12	25 x 6	60 x 40 x 100
07739002	0 ÷ 600	0 ÷ 24	30 x 12	110 x 50 x 160
07739003	0 ÷ 1000	0 ÷ 40	30 x 12	110 x 50 x 160

## Accessories for ETALON Height and Scribing Gauges with Digital Display

07769005

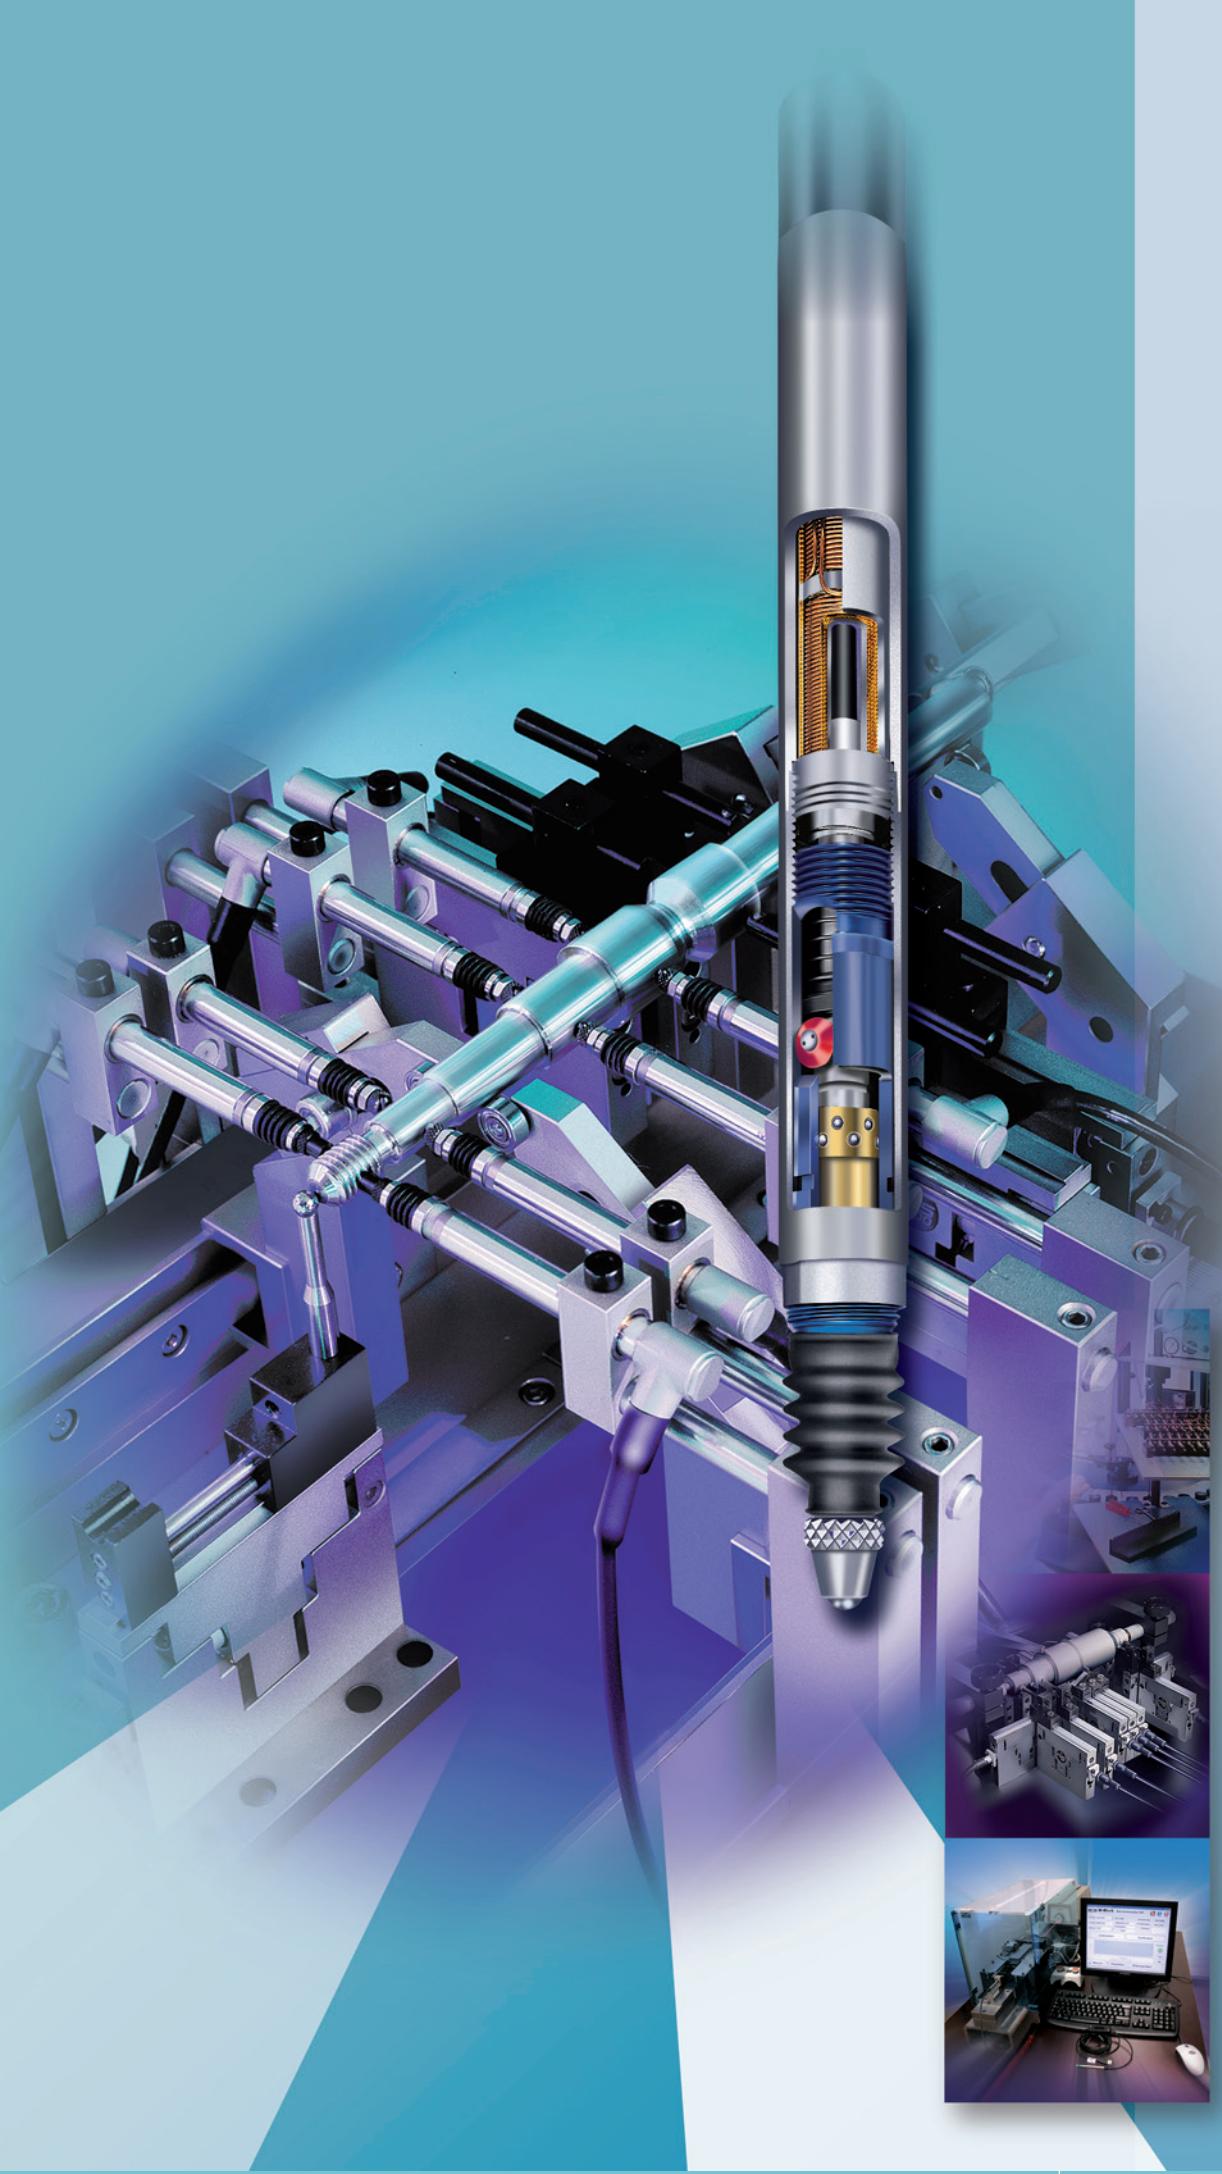

07769006

No.	=	Scriber for 300 mm length 65 mm	300	65
07769003	=	Scriber for 6 to 1000 mm, length 75 mm	600, 1000	75
07769005	=	Holder to replace the scriber		
07769006	=	Rotating and tilting version with a 8 mm dia. shank. To be used with No. 07769005		

# Electronic Length Measuring Equipment

# TESA INDUCTIVE PROBES AND ELECTRONIC EQUIPMENT

## TESA probes: At the cutting edge of technology

TESA develops, manufactures and remains a leader in the inductive probe sector with an experience of more than 40 years. It offers a complete and unique line of probes designed to meet the requirements of varied as well as demanding applications.

Dimensional inspection of medium and large batches of parts in multigauging fixtures represents a major application area where measuring speed coupled with a high level of accuracy is needed.

High precision inductive probes (type GTL-21 HP) are, for example, also suited for the measurement of gauge blocks. The display resolution can reach a digital step of 0,01 µm!

On request, TESA probes can be supplied in versions compatible with the electronic equipment of other suppliers.

## Typical qualities of TESA inductive probes : excellent repeatability, durability and longevity

All TESA inductive axial movement are mounted on a ball bearing with the exception of miniature models.

The ball bearing guidance system is insensitive to any radial force exerted on the probe housing. An anti-rotation guiding system ensures perfect movement of the mechanical guide.

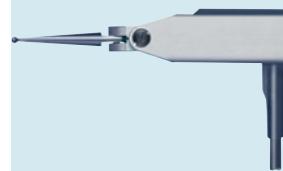

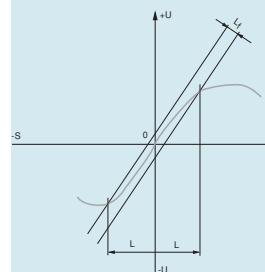

The axial probe guide system is effectively protected against penetration of liquids (oils) or solids (dust) by sealing bellows of high elastic quality. Under normal conditions, the standard nitrile elastomer bellows provide sufficient protection against oils and solvents. For applications where the probes remain in prolonged contact with coolants or lubricants and aggressive chemicals, Viton bellows are recommended. Viton is a fluorelastomer resistant to the heat of oils and aggressive chemicals.

The retraction (lifting) of the measuring bolt rod can be made by the suction of air (vacuum) accumulated within the probe thanks to the airtightness provided by the sealing bellows. This method of working principle does not use any mechanical device ensures the operation of the guidance system in an optimal manner. Similarly, the probe can be moved into its measuring position by a pneumatic activation (pressure), depending on the probe model.

Inserts (measuring inserts) can be replaced or exchanged. A wide choice of geometrical forms and sizes are available

The measuring force can be adjusted by changing the spring, depending on the probe model.

The probes integrate an electronic amplifier of the signal without relying on any mechanical conversion device. Thus, these probes are distinguished by their high repeatability and very low hysteresis errors.

Wireless probe

### Application examples of measuring functions

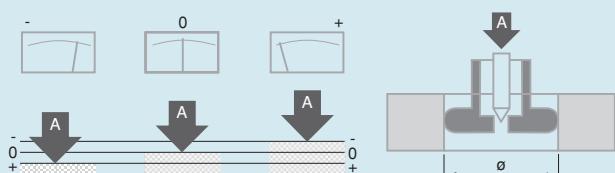

Single measurements with positive polarity sign (+A)

Measuring external dimensions with use of a measuring stand, snap gauge etc.

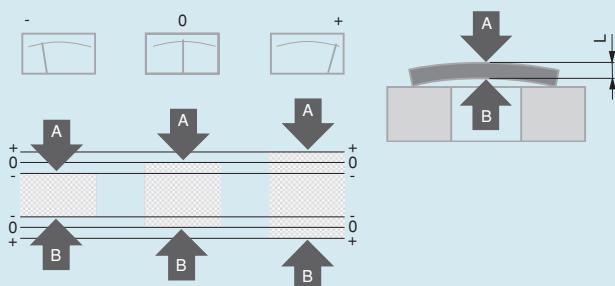

Single measurements with negative polarity sign (-A)

Inversion of polarity with displayed value equal to bore or diameter

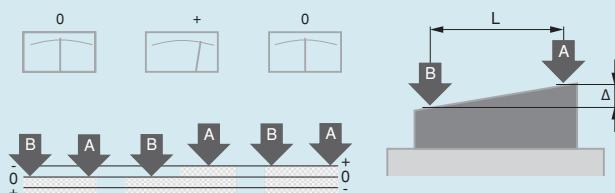

Sum measurements with positive polarity signs (+A +B)

Measuring external dimensions regardless of form and position errors

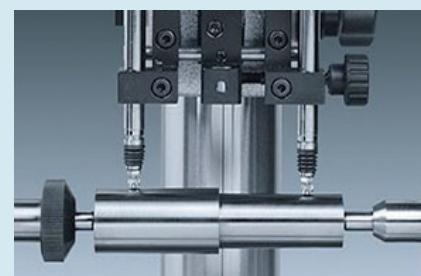

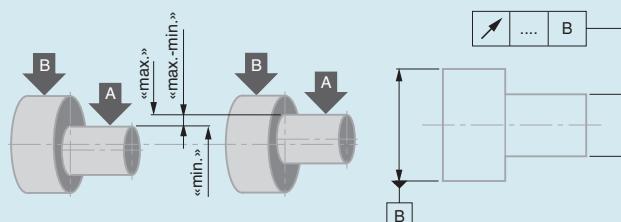

Difference measurements with opposite polarity signs (+A -B)

Cone, inclination and step measurements.

Establishing form and position errors with "max - min" memory function as in the example for runout errors

For the acquisition of measured values, TESA offers a complete family of probes and measuring instruments for the most demanding applications. The probes, supplied in standard execution, do not need any form of adaptation. They function on the inductive half-bridge principle.

The market offers other equipment using probes that partly operate on the principle of a differential transformer and these are known as LVDT (Linear Variable Differential Transformer) probes.

TESA also offers a range of probes compatible with other electronic equipment, using an adaptor and a connector depending on the origin of the equipment. A description of TESA standard half-bridge and LVDT probes is provided below.

### Standard half-bridge probes for TESA equipment

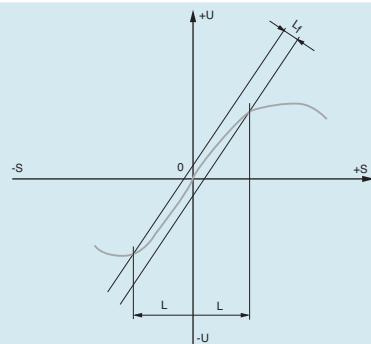

#### OPERATING PRINCIPLE

All TESA electronic probes (value sensors) work based on the inductive principle with mechanical contact of the workpiece.

They are fitted with a coil system inducing an alternating output voltage that depends on the position of the ferro magnetic core. When symmetrically positioned – i.e. at electrical zero – no voltage is impressed.

A move of the core, which may be attached to the measuring bolt while the measurand is being taken, causes the inductance to change. This change generates a signal that is amplified and rectified before being displayed and further output. Depending on the instrument type, the analogue signal will be shown on a voltmeter or a numerical display after a digital transformation.

Unambiguous assessment of the measurand (at bolt position) to the signal (displayed value) is the main characteristic of analogue value acquisition. One of its distinct advantages lies in the value primarily displayed, which will be reproduced in the event of a power cut (switch-off or power failure).

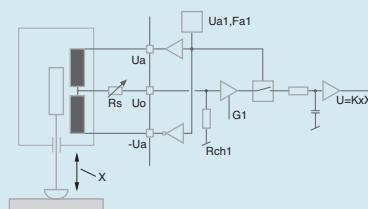

Inductive measuring

S: Travel  
U: Output current  
0: Electrical zero  
L: Linearity range  
Lf: Linearity error

### TESA Standard Half-Bridge Probes for TESA Electronic Equipment

These probes have two serial coils with middle output mounted side by side, which are energized by a sinusoidal alternation signal at 13 kHz. Both are linked together to a Wheatstone bridge over an additional half-bridge.

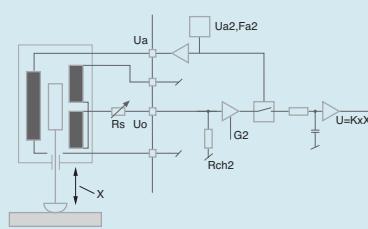

Wiring plan of half-bridge probes

### TESA LVDT Probes

These probes are based on a Linear Variable Differential Transformer (LVDT). They have three coils, i.e. one primary coil being energized by a sinusoidal alternation at 5 kHz, and two secondary coils connected in opposite phase, which generate the output current proportional to the measuring travel.

Available upon request.

Wiring plan of LVDT probes

### Multiple application possibilities

TESA probes have been designed for applications for use with instruments for internal and external measurements, measuring supports or special measuring systems. For such applications, different probe executions can be supplied such as probes with an axial measuring bolt or parallel guides, refer also to angle lever probes. In addition, there are also special executions developed for multi-gauging inspection fixtures or 'in-process' inspection stations, which enable an economy in the number of components needed. Apart from a few exceptions, the measuring operations executed are always comparative measurements with reference to a standard such as a gauge block, a setting ring or any other component that can be used as a master.

The measurements are extremely accurate. Bias error influence is negligible compared to the budget for measuring uncertainty given the fact that the comparison is being established between two almost practically equal values

Random errors also lose their influence in a procedure where the display setting is made under the same conditions as the subsequent probing measurements

TESA measuring instruments are equipped with an analogue and/or digital display, depending on the model.

### Internal processing of measured values

Depending on the application, the electrical signals are processed in different ways within the instrument.

### Mathematical Data Processing

The signals can be processed with positive polarity sign as well as negative polarity sign. The use of a single probe enables single measurement of internal or external dimensions while the combination of the signals of two probes produces either a "sum measurement" or a "difference measurement".

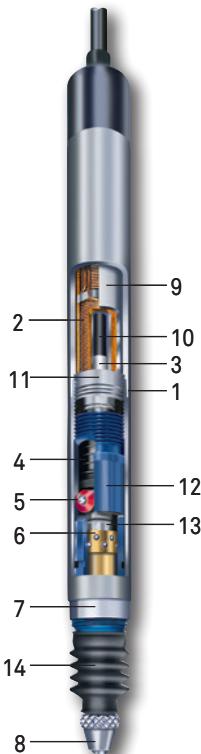

### Value Storage

The storage of measured values in the memory ensures the reliability of dynamic measuring cycles. The characteristic values are the two minimum and maximum values or the difference between the smallest and largest value acquired while measuring form or position errors.

### Classification of Values

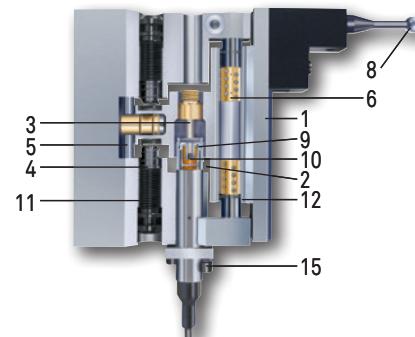

The measured values can be classified after the entering of limit deviations. In this case, the control signals can be used by an external peripheral unit.

### Components of a TESA inductive probe

- 1 Mounting stem or probe housing
- 2 Coil system
- 3 Element mounted between the ferromagnetic core and the measuring bolt for the correction of varying coefficients of thermal expansion
- 4 Force compression spring
- 5 Anti-rotation guiding system
- 6 Ball cage
- 7 Setting element for limiting the measuring bolt travel
- 8 Probe insert
- 9 In-between tube being part of the coil system
- 10 Ferro-magnetic core
- 11 Force spring stop
- 12 Ball-bearing guiding tube
- 13 Measuring bolt
- 14 Sealing bellow
- 15 Mechanical device for zero-setting

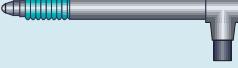

### Sensitivity of TESA half-bridge probes for TESA electronic interfaces and electronic displays

Sensitivity	73,75 mV/V/mm
	29,50 mV/V/mm (GT 61, GT 62)
	7,375 mV/V/mm (GT 61S, GT 62S)
	49,17 mV/V/mm (FMS 130, FMS 132)
All given values are valid for the following reference conditions :	
Drive voltage	3 V
Drive frequency	13 kHz
Adjustment load	2 kΩ

## Standard Probes, ± 1 mm, 4,3 mm Travel (GT21)

Universal probes for standard and continuous use applications.

- 8 mm diameter probe housing. Can be clamped over its entire length.
- Measuring bolt mounted on a ball bearing.
- Both the probe housing and ball-bearing guide are separate from one another, so that the measuring bolt moves easily even if the probe is not clamped appropriately.
- Degree of protection IP65 according to IEC 60529.
- Wide range of accessories including measuring inserts, spring sets, etc.
- LVDT probes compatible with measuring equipment from other makers available on request.

## Standard Probes, ± 2 mm, 10,3 mm Travel, with Long Retraction Travel

Universal inductive probes for various applications, especially for use with multi-gauging inspection fixtures.

- Long retraction travel to prevent the probe from being damaged.
- Protection level IP65 as per IEC 60529.
- Large choice of accessories: measuring inserts, spring sets, etc.
- LVDT probes compatible with measuring equipment from other suppliers also available on request.

## Standard Probes ± 5 mm, 10,3 mm Bolt Travel, Extended Range

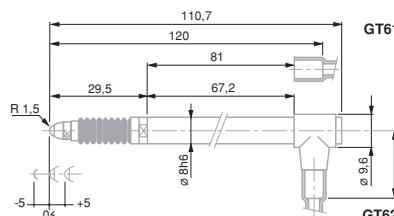

- Designed for long measuring travels and low resolution of values
- Specially suited for use on multigauging inspection fixtures.
- Correction factor applied to get the true value is 2,5x (10x for the S probe version).
- Protection level IP 65 as per IEC 60529.
- Large choice of accessories: Measuring inserts, spring sets, etc.
- LVDT probes compatible with measuring equipment from other suppliers also available on request.

\* Electrical zero (N)  $\pm 25\%$  deviation limit. Valid in vertical mounting position, measuring bolt lowered and in static measuring.

\*\* For an amplitude of 10 % to the last value of the measuring range.

## Pneumatic Probes ± 2 mm, 10,3 mm Bolt Travel, with Long Retraction Travel

These probes are intended for use with measuring fixtures or machines integrating automated and semi-automated measuring routines.

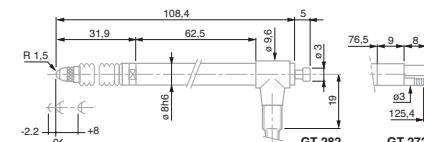

- 8 mm diameter probe housing. Can be clamped over its entire length.
- Measuring bolt mounted on a ball bearing.
- Both the probe housing and ball-bearing guide are separate from one another, so that the measuring bolt moves easily even if the probe is not clamped appropriately.
- Degree of protection IP65 according to IEC 60529.
- Wide range of accessories including measuring inserts, etc.
- LVDT probes compatible with measuring equipment from other makers available on request.

## Pneumatic Probes ± 5 mm, 10,3 mm Bolt Travel, Long Travel

These probes are designed for use with measuring fixtures and machines with integrated automatic or semi-automatic measuring routines.

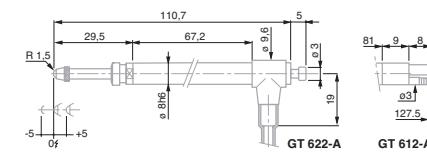

- Probes with long measuring travel and low resolution of values 8 mm dia. fixing shank.
- Suitable for multi-gauging inspection fixtures.
- Protection level IP65 ou IP50 as per IEC 60529.
- Wide range of accessories including measuring inserts, etc.
- LVDT probes compatible with measuring equipment from other suppliers available on request.

\*\* For an amplitude of 10 % to the last value of the measuring range.

## Wireless Probe ± 2 mm

Probes developed for devices requiring a greater freedom of movement during the measurement or for parts with large dimensions.

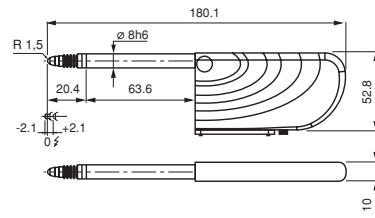

Bidirectional and wireless communication synchronized with the TWIN-STATION Receiver.

- Resolution 0,1 µm.
- Range of 8 m, depending on environment.
- TESA wireless communication protocol independent of WiFi or Bluetooth.
- Autonomy 40 hours (rechargeable battery).
- Mounting stem Ø 8 mm with clamping possible over entire length.
- Measuring bolt mounted on ball bearing.
- Ball bearing guide separated from mounting stem in order not to negatively influence the movement of the measuring bolt in the event of improper clamping of the probe body.
- Level of protection IP54 according to IEC 60529.
- Wide range of measurement inserts.
- The TWIN-STATION (part number 05030012) manages and synchronizes up to 8 wireless probes.
- Interface Software TIS included in delivery content of the TWIN-STATION (part number 05030012): display of measured values, possibility to indicate tolerances, simple functions +A, -A, +A+B, +A-B, and export of values as a .csv file.

Note: The sales is limited to EU countries, Switzerland, USA, Canada and China.

## **Probes, Unbranded Execution, Series 410 ± 1 mm, 2,5 mm Range, Short Body**

Universal probes for common but constraining applications.

- 8 mm diameter probe body that can be clamped over its entire length.
  - Ball bearing measuring bolt.
  - Hardened steel body, hard-chrome plated.
  - Degree of protection to IP62.
  - Flexible axial cable exit fitted with a steel spring to prevent the cable from breaking.
  - Other probes compatible with measuring equipment from other makers also available on request.

410

## Probes, Unbranded Execution, Series 160 ± 1 mm, 3,3 mm Bolt Travel, Short Body, Ø 6 mm

Compact size and robust construction makes these probes ideal for continuous use.

- Probe body Ø 6 mm.
- Clamping possible over entire length.
- Measuring bolt guided on ball bearing.
- Hard-chrome plated probe body, hardened steel.
- Protection level: IP62 as per IEC 60529.
- Executions compatible with measuring equipment from other suppliers available on request.

## GT31 Lever Probes $\pm 0,3 \text{ mm}$ , $0,3 \text{ mm}$ Measuring Travel, Inclinable Lever

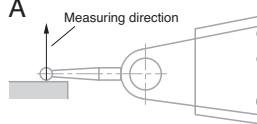

GT 31 with lever in perpendicular position

Well suited for use where probes with axial movement measuring bolts are inconvenient for measurements.

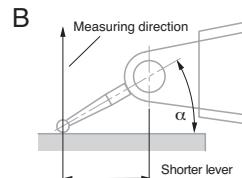

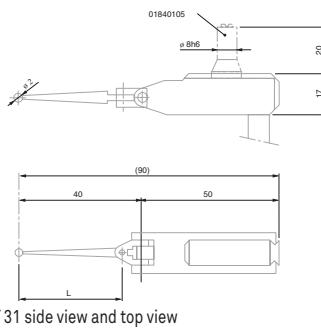

- Inclinable lever for measuring in two directions.
- Balanced lever system on ball-bearing.
- Interchangeable measuring insert, with carbide ball tip, inclinable through to  $180^\circ$ .
- Automatic reversal of the probing direction while the indication remains unchanged.
- Protected against shocks by 2 safety clutches.
- One-piece housing provided with 2 dovetails.
- Level of protection: IP40 as per IEC 60529.

GT 31

GT 31  
Figure A - the leverage matches 1:1, no correction of the measured value needed

GT 31  
Figure B - the leverage is no longer 1:1, correction of the measured value is needed.

Note

(Fig. A) With the insert lying parallel to the workpiece surface, the leverage matches 1:1. Therefore, no correction of the measured values is needed.

(Fig. B, angle  $\alpha$ ) Any other position will change the effective lever length, so that read values must be corrected. In this connection, please consult the instruction manual.

## Probes with Parallel Guidance, $\pm 2 \text{ mm}$ or $\pm 2,9 \text{ mm}$ , 5,8 mm Measuring Travel

Modular construction enables the combination of elements, for example, such as springs, pneumatic cylinders and stops.

These universal probes are suited for multigauging fixtures as well as machines equipped with integrated inspection routines.

### Versatility of applications:

- Probe can be used in any position for measuring.
- Measuring direction is adjustable.
- Retraction of the measuring insert is adjustable.
- Measuring force is adjustable depending on the accessory used.
- Possibility of using off-centre measuring inserts.

### Unique design:

- Compact assembly noted for its robustness.
- Ball bearing guided movement.
- Wide variety of measuring inserts, holders and other accessories for measuring applications.
- LVDT execution versions compatible with melectronic equipment from other suppliers available on request.

FMS 100

FMS 102

### Configuration and Application of TESA FMS Probes

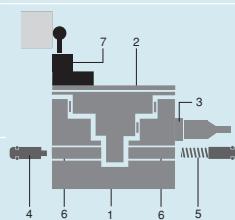

Shown below are the different possibilities for the activation and retraction of the probe insert during measurement cycles.

#### APPLICATION EXAMPLE A

- Activation of the probe insert in the direction of the part to be inspected using the measuring force produced by the spring set.
- Without retraction of the insert.

##### Result A

During the placing of a new part to be measured, the measuring insert remains in its contact position thanks to the measuring force produced by the spring set.

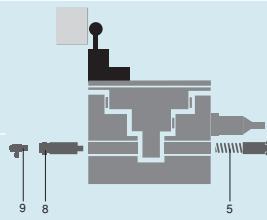

- 1 Static probe body
- 2 Mobile probe body
- 3 Measuring element with fine adjust
- 4 Adjustable stop
- 5 Spring set for producing measuring force
- 6 M6 mounting thread
- 7 Holder

#### APPLICATION EXAMPLE B

- Activation of the probe insert in the direction of the part to be measured using the measuring force of the spring set.
- Retraction of the insert by pneumatic pressure through a pneumatic connection.

##### Result B

During the placing of a new part to be measured, the measuring insert is retracted through activation of pressure via the pneumatic actuator.

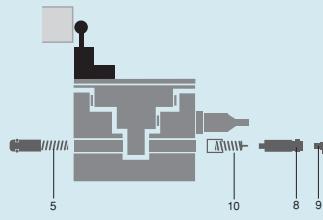

- 5 Spring set for producing measuring force
- 8 Pneumatique actuator (Part No. 03260440)
- 9 Connector (Part No. 024388))

#### APPLICATION EXAMPLE C

- Activation of the probe insert in the direction of the part to be inspected by pneumatic pressure and the measuring force of the spring set.
- Retraction of the insert by disabling the pneumatic pressure.

##### ATTENTION !

The force of the spring set (5) must be equal to that of the auxiliary spring element (10).

- 5 Spring set for producing measuring force
- 8 Pneumatic actuator (Part No. 03260440)
- 9 Connector (Part No. 024388)
- 10 Auxiliary spring element (Part No. 03260445)

##### Result C

During the placing of a new part to be measured, the measuring insert is automatically retracted due to the disabling of the pneumatic pressure, which guarantees about security during the measuring cycle.

This configuration is typically preferred when there is lack of space for connecting a pneumatic actuator (left side of example B).

## Probes with Parallel Guidance, $\pm 2 \text{ mm}$ or $\pm 2,9 \text{ mm}$ , 5,8 mm Measuring Travel – Protected Version

- FMS 100-P, 102 -P, 130-P, 132-P provide dust protection of the 2 side faces.

Modular concept for combining elements, for example, such as springs, pneumatic actuators and stops.

These universal probes are suitable for multi-gauging inspection fixtures as well as machines with integrated automated inspection routines.

### Versatility of applications:

- Probe can be used in any position for measuring
- Measuring direction can be changed
- Retraction of the measuring insert is adjustable
- Measuring force is adjustable, depending on the accessory used
- Possibility of using off-centre measuring inserts

### Unique design:

- Compact assembly noted for its robustness
- Ball bearing guided movement
- Wide variety of measuring inserts, holders and other accessories for measuring applications
- LVDT execution versions compatible with melectronic equipment from other suppliers available on request.

\* Electrical zero (N)  $\pm 25\%$  deviation limit. Valid in vertical mounting position, measuring bolt lowered and in static measuring.

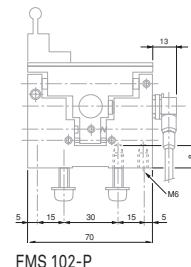

\*\* For an amplitude of 10 % to the last value of the measuring range.

\*\*\* Distance from electrical zero.

FMS 100-P

FMS 102-P

### Configuration and Application of TESA FMS Probes

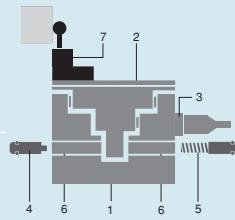

Shown below are the different possibilities for the activation and retraction of the probe insert during measurement cycles.

#### APPLICATION EXAMPLE A

- Activation of the probe insert in the direction of the part to be inspected using the measuring force produced by the spring set.
- Without retraction of the insert.

##### Result A

During the placing of a new part to be measured, the measuring insert remains in its contact position thanks to the measuring force produced by the spring set.

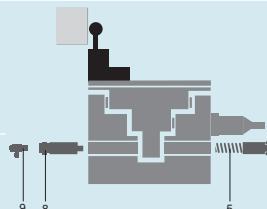

- 1 Static probe body
- 2 Mobile probe body
- 3 Measuring element with fine adjust
- 4 Adjustable stop
- 5 Spring set for producing measuring force
- 6 M6 mounting thread
- 7 Holder

#### APPLICATION EXAMPLE B

- Activation of the probe insert in the direction of the part to be measured using the measuring force of the spring set.
- Retraction of the insert by pneumatic pressure through a pneumatic connection.

##### Result B

During the placing of a new part to be measured, the measuring insert is retracted through activation of pressure via the pneumatic actuator.

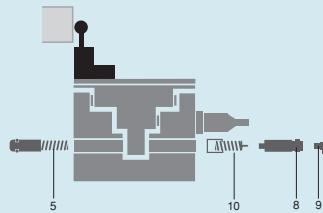

- 5 Spring set for producing measuring force
- 8 Pneumatique actuator (Part No. 03260440)
- 9 Connector (Part No. 024388))

#### APPLICATION EXAMPLE C

- Activation of the probe insert in the direction of the part to be inspected by pneumatic pressure and the measuring force of the spring set.
- Retraction of the insert by disabling the pneumatic pressure.

##### ATTENTION !

The force of the spring set (5) must be equal to that of the auxiliary spring element (10).

- 5 Spring set for producing measuring force
- 8 Pneumatic actuator (Part No. 03260440)
- 9 Connector (Part No. 024388)
- 10 Auxiliary spring element (Part No. 03260445)

##### Result C

During the placing of a new part to be measured, the measuring insert is automatically retracted due to the disabling of the pneumatic pressure, which guarantees about security during the measuring cycle.

This configuration is typically preferred when there is lack of space for connecting a pneumatic actuator (left side of example B).

## TESATRONIC TWIN-T10 probe display unit

- Portable display TESATRONIC TWIN-T10 for TESA inductive probe.
- Autonomous instrument used during assembly, on an inspection workstation of a production line, for final inspection or directly on a machine on the shop floor.
- Frequently used with a GT 31 lever probe for geometry measurements: form tolerances (straightness, flatness etc.) or orientation tolerances (parallelism, perpendicularity, etc.).
- Function TOL for measurements with tolerances.
- Memory function for values MAX, MIN or MAX-MIN for dynamic measurements.
- Function for zero-setting of the display, for easy comparative measurements with a reference part.
- Special ZOOM mode for a more detailed visualization of the analogue scale. This mode simplifies the alignment and fine adjustment during assembly.

### Other features:

- 4 or 7 measuring ranges from ± 5 µm to ± 5 mm, or switchable automatically depending on the measured value.
- Access to functions by direct keys.
- Millimetre/inch conversion.
- 1 probe signal input.
- Power supply by standard AA batteries.
- RS232 digital output (TLC connector).

## TESATRONIC TT20 and TT60 Probe Display Units

- Functional reliability.
- User-friendly.
- Essential for inspection in production or metrology laboratory.

### TESATRONIC TT20

Combined digital and analogue indication

2 probe inputs for single measurements, sum and difference measurements

- Large LC display for comfortable and error-free reading.
- Pseudo-analogue bargraph indication for a better repeatability and negligible hysteresis.
- Choice between pointer or bargraph indication.
- LCD display for all functions.
- 7 measuring ranges, switchable manually or automatically according to the measured value.
- Direct conversion from metric to inch units.
- Touch button for the indication setting of each measuring channel.
- Keys for introducing limit values.
- Classification of values (3 classes) and display through colour LEDs with signal outputs.
- Locking of displayed values for step by step measurement routines.
- Automatic recognition of the type of connected TESA probe with adaptation of the measurement signals to the value of output connected (valid only for TESA probes produced from 1997 onwards).
- Opto-coupled RS232 output, bidirectional.
- Power supply through mains adapter.

### TESATRONIC TT60

Same features as TESATRONIC TT20, but with following added functions:

- Memory for retaining extreme values "max.", "min.", "max.-min." along with mean value obtained from "max." minus "min."
- Dynamic measurement with acquisition of >100 single values.
- Value classification with output signals through contact relay for 5, 10, 20 or 40 acceptable classes.
- Analogue output for exterior processing of signals.

## TESATRONIC TT 80 and TT 90 Probe Display Units

High resolution display units

Combined analogue/digital display

Two probe inputs for single, sum and difference measurements.

In addition to TESATRONIC TT60 functions, TT 80 has the following additional functions:

- 9 measuring ranges with digital steps of 0,01 µm or 0.000001 in.
- Memorisation of extreme values "max.", "min.", "max. minus min." as well as the mean of the two values "max." and "min."
- Dynamic measurement with acquisition of more than 10 single values per second.
- Classification of measured values with a contact relay providing output signals for 5, 10, 20 or 40 acceptable classes.
- Analogue output for external processing of signals.

In addition to TESATRONIC TT60 functions, TT 90 has the following additional functions:

- 9 measuring ranges with digital step of 0,01 µm or 0.000001 in.
- Memorisation of extreme values "max.", "min.", "max. minus min." plus the mean of both values "max." and "min."
- Dynamic measurement with acquisition of more than 10 single values per second.
- Classification of measured values with output signals through contact relay for 5, 10, 20 or 40 acceptable classes.
- Analogue output for external signal processing.
- Output for bolt retraction control.
- Selection of stabilisation time for measuring cycles.
- RS digital output for values to the micron.

## TESATRONIC TTA20 Probe Display Unit

Compact design with analogue indication and value classification of measured values.

Aluminium housing, designed for shop floor applications, user-friendly.

- Easy-to-read analogue display with mirror strip in order to avoid parallax error.
- 6 measuring ranges.
- Metric/inch conversion.
- Zero setting potentiometer for display.
- 2 probe inputs for single, sum or difference measurements.
- 1 auxiliary signal input, e.g. for all correction values.
- Colour LEDs of green for "Good", yellow for "Rework" and red for "Scrap".
- Potentiometer for setting limit tolerances.
- Polarity reverse switch for classification signals (internal or external dimensions).
- Switch for locking or unlocking a displayed value.
- Analogue output for a display unit or external recording.

## ELECTRONIC INTERFACE UNITS

Electronic interfaces to manage, synchronize inductive probes and allow data transfer to a computer or an automatic inspection machine.

### TESA Probe Interface Boxes - BPX Series

Modular system available in 2 versions (BPX and TWIN-STATION) for the conversion of measured signals to digital values and transmission of these values to a computer. These units are key components for multigauging inspection fixtures for centralised process control systems.

Signal inputs – 1 to 4 TESA standard half-bridge probes.

Signal output – digital, RS232 through USB port.

- Direct connection to the computer's USB port.
- Stand Alone operating mode: program routine via the computer, enabling the BPX box to execute a simple measuring function with classification signal relay via connector Sub-D 15P.
- Optimal adaptation for various measuring applications, for example, connection of 16 probes thanks to serial USB connections on 4 BPX boxes.
- Increased functional reliability and high precision.
- Increased immunity to negative environmental effects, whether of electrical origin or provoked by liquid and solid contaminants.
- BPX is compatible and can be used with TWIN-STATION.
- TIS interface software is included in the BPX (part number 05030012) for display of measured values. Possibility of indicating tolerance values, and simple functions +A, -A, +A+B, +A-B, export of values to a .csv file.

Signal inputs – TESA standard execution probes (Half-bridge)

Signal outputs – analogue (in ± V/mm)

- Connection of up to 32 TESA standard half-bridge probes.
- Connection possible to a PC through the A/D transducer.

Rack with 3 M4P-2 interfaces

Multi-gauging fixture with 1, 2 or 4 M4P-2 interfaces

No	=	Sensitivity (mV / V/mm)	Number of probe inputs	Dimensions (mm)	Analogue outputs	Weight (kg)
S48001721	M4P-2 interface 4 probe inputs with demodulator and analogue output in V/mm	73,75	4, including a demodulator	36 x 100 x 120	± 1 V/mm, ± 2,5 V/mm, ± 5 V/mm, ± 10V/mm	0,6
S48001722	R2M-1 rack for 2x M4P-2	–	8 (with 2x M4P-2)	55 x 212 x 144	–	0,9
S48001723	R4M-1 rack for 4x M4P-2	–	16 (with 4x M4P-2)	160 x 212 x 144	–	1,2
S48001724	Supply module MA4-2, 230V	–	Voltage: 230 ±10 % Vac, 50 Hz	85 x 222 x 146	Output voltage: ± 15V for 32 probes	1,1
S48001731	Power supply MA4-2, 110V	–	Voltage: 110 ±10 % Vac, 60 Hz	85 x 222 x 146	Output voltage: ± 15V for 32 probes	1,1

### Accessories for M4P-2 probe interface

No	=
S48001725	M4P-2 connecting cable to PC, 2m DB-37 pins m/f

## Adaptor Cable: DIN 5p Connector to USB Type A Connector

Allows for quick and easy connection of any TESA standard half bridge probe to a PC USB port.

Signal inputs – TESA standard probes (Half-bridge)  
 Signal outputs – digital RS 323 through USB port

				Measuring range, mm		Deviation span		Zero drift of indication
03260500	Cable adapter DIN 5p for USB. enables connection of TESA probes sensitivity 73,75 mV/V/ mm directly to a USB port	$\pm 2 \text{ mm}$			$0,3\% \pm 0,1 \mu\text{m}$	$\pm 0,01\%/\text{°C}$		
03260501	Cable adapter DIN 5p for USB. enables connection of TESA probes sensitivity 29,50 mV/V/ mm directly to a USB port	$\pm 5 \text{ mm}$			$0,3\% \pm 0,1 \mu\text{m}$	$\pm 0,01\%/\text{°C}$		

Cable adapter: DIN 5-pin connector to USB connector type A

- DIN 32876 Part 1
- 0.1  $\mu\text{m}$
- 2 V effectively 13 kHz  $\pm 0,5\%$
- At 20°C and relative humidity  $\leq 50\%$ : error of indication =  $0,3\% \pm 0,1 \mu\text{m}$  zero drift  $\pm 0,01\%/\text{°C}$ . Standard refresh speed = 80 ms. Maximum refresh speed = 42 ms. Distance between the stops and the electrical zero cannot be adjusted. Length of cable: 1,2 m. Note: the total error should take into account the error of the probe and the error of the adapter.

- USB 2.0 RS232, virtual COM port
- 20  $\pm 0,5\text{°C}$
- IP51 (IEC 60529)

Input impedance  
 $970 \pm 50\Omega$  (13 kHz)  
 or  $2150 \pm 50\Omega$   
 (standard 0 µm)  
 Phase (13 kHz):  
 $71 \pm 2^\circ$ . Input  
 resistance:  
 $100 \pm 5\Omega$ . Output  
 impedance at  
 13 kHz:  $1000 \pm 2\Omega$ ,  
 Phase (13 kHz):  $0,2^\circ$   
 Dummy probe (half-  
 bridge), sensitivity  
 $73,75 \text{ mV/mm}$ .

Suitable for  
 instruments with  
 following features:  
 Frequency: 13  
 $\pm 0,65$  kHz, Voltage:  
 $3 \pm 0,015$  Veff (2  
 symmetrical voltages  
 of 1,5 Veff) Input and  
 output impedance:  
 $\leq 0,2\Omega$  et  $2000\Omega$ ,  
 respectively

Calibration: 40 % to  
 60 %. Operating:  
 20 % to 80 %.  
 Storage: 5 % to  
 95 %. Without  
 condensation.

IP40 (IEC 60529)

## Calibration Standards – Dummy Probes

Calibration standards – also known as "dummy probes" – are resistance dividers. Each calibration standard simulates a given length dimension with high accuracy. Each calibration standard has 2 values (positive and negative). The values indicated below are the nominal values.

These products are calibrated and supplied with an inspection report that shows the values (actual values) measured during calibration and the related measuring uncertainty.

The calibration standards are connected to the instrument in place of regular probes. For the calibration and all required setting operations of the instrument, certain criteria and conditions need to be respected. Consult the user manual or get in touch with our specialists for further information.

Set of 3 calibration standards (S41077249)

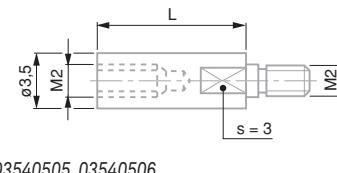

No	=	Value of the calibration stan- dard (microns)
S41078077	Dummy probe	$\pm 0$
S41078079	Dummy probe	$\pm 3$
S41078228	Dummy probe	$\pm 100$
S41078230	Dummy probe	$\pm 190$
S41078087	Dummy probe	$\pm 300$
S41078332	Dummy probe	$\pm 500$
S41078751	Dummy probe	$\pm 1000$
S41078752	Dummy probe	$\pm 1900$
S41077249	Set of 3 dummy probes	$\pm 0 / \pm 100 / \pm 1000$
S41078654	Set of 2 dummy probes	$\pm 190 / \pm 1900$

## INSERTS FOR AXIAL PROBES, WITH M2 THREAD

## INSERTS FOR AXIAL PROBES, WITH M2,5 THREAD

*Insert with a Flat Measuring Face, Ø 2,5 mm, Adjustable Parallelism, Counter-nut for Radial Alignment*

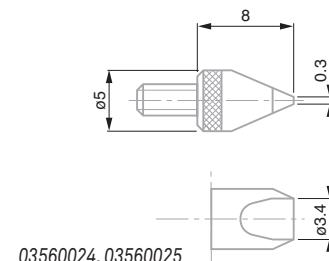

*Insert with Offset (12 mm) Contact Point, Lock Nut for Radial Alignment*

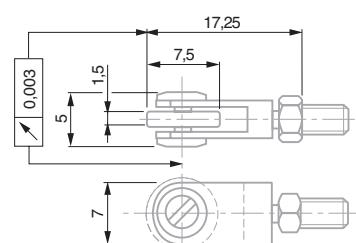

*Insert with Narrow Measuring Face, Adjustable Parallelism, Counter-nut for Radial Alignment*

*Inserts with Blade-shaped Measuring Face, Lock Nut for Radial Alignment*

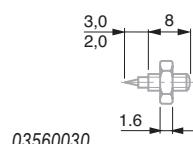

*Measuring Inserts with Ball-bearing Rollers, Lock Nut for Radial Alignment*

03560010, 03560011

*Insert with Needle Contact Point*

## SPRING SETS, BELLOWS, CLAMPING ELEMENTS, MANUAL RETRACTION FOR AXIAL PROBES

### Spring Sets for Axial Probes

			Measuring force (N)
03260419	Spring sets for GT22	0,16	
03260420	Spring sets for GT22	0,25	
03260457	Spring sets for GT21/22	0,63	
03260422	Spring sets for GT21/22	1,0	
03260423	Spring sets for GT21/22	1,6	
03260424	Spring sets for GT21/22	2,5	

All values given in the table for the measuring force equal nominal values at electrical zero; max. deviation  $\pm 25\%$ . Valid for upright assembly position with downward oriented measuring bolt, and used in static measurement.

### Bellows for Axial Probes

03260468	For 4,3 mm bolt travel GT 21, 22, GTL 21, 211, 22	Nitrile	
03260470	For 4,3 mm bolt travel GT 21, 22, GTL 21, 211, 22	Viton	
03260489	For pressure probe 4,3 mm bolt travel GTL 212, 222	Viton	
03260491	For 10,3 mm bolt travel GT 27, 271, 28, 61, 611, 62	Viton	
03260490	For pressure probe 10,3 mm bolt travel GT 272, 282, 612, 622	Viton	

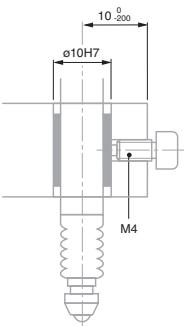

Protection bellow

Nitrile: resistant synthetic sealing for normal use. Viton: high-resistance synthetic sealing. Used in conditions where probes are permanently exposed to coolants and lubricants.

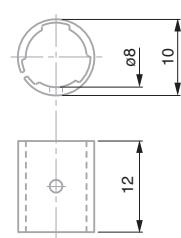

### Clamping Elements for Axial Probes

Elements with 3 clamping faces – Prevents any deformation of the measuring bolt guiding system, thus preserving all the metrological properties of the probe.

				A mm
02611013	VKD clamping screw			M4
02611014	VKE clamping sleeve	$\varnothing 8\text{ mm}$		
01860401	Y61 fixing clamp	$\varnothing 5,6\text{ mm}$ and $\varnothing 9,5$ with dovetail		
02660048	VDE 28 probe holder	$\varnothing 8\text{ mm}$		

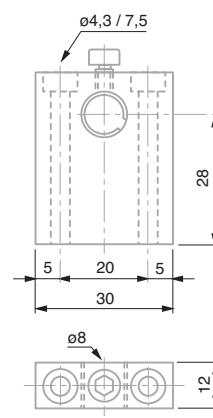

Fixing clamp for axial probe

VKE - clamping sleeve

VKD - clamping screw

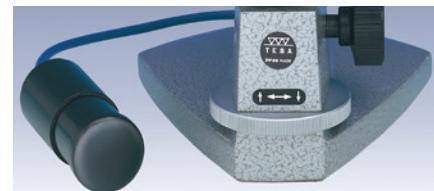

VDE - clamping élément with sleeve and clamping screw

## Manual Measuring Bolt Retraction for Axial Probes

03540104	TB 11 retraction device components	Consisting of:
		- 1 Washer TB102 (03540102) - 1 Lifting Lever TB101 (03540101)
03260401	Manual pneumatic retraction device.	Suitable for GT 22, 271, 28, 42, 44, 611, 62 – GTL211, 22 probes Consisting of:
		- 1 hand-operated vacuum pump - 1 tube of 1m, Ø 4,7 mm (ref. 03540405)

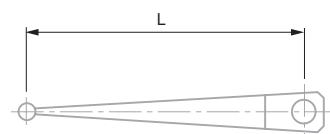

## ACCESSORIES FOR GT 31 LEVER PROBES

### Probe Inserts for GT 31 Lever Probes

No	Ø	Lever – amplification	L, mm	
03260402	1	1:1	32	One-piece shaft

### Auxiliary Springs and Pneumatic Retraction Jack, for FMS Probe

Auxiliary spring element for FMS probe

<b>No</b>	<b>=</b>	<b>N</b>
03260440	Pneumatic jack	11 (for 4 bars)
03260441	Spring element	0,4
03260442	Spring element	0,63
03260443	Spring element	1,0
03260444	Spring element	1,6
03260445	Spring element	2,0
03260446	Spring element	2,5
03260447	Spring element	4,0

Pneumatic cylinder (jack) for FMS probe

All values given in the table for the measuring force equal nominal values at electrical zero; max. deviation  $\pm 25\%$ . Valid for probing movements executed horizontally as well as in static measuring.

### Spring Set with Specific Measuring Force, for FMS Probe

<b>No</b>	<b>=</b>	<b>N</b>
03260448	Spring set red	0,4
03260449	Spring set yellow	0,63
03260450	Spring set green	1,0
03260451	Spring set blue	1,6
03260452	Spring set brown	2,5
03260453	Spring set black	4,0

Spring set for measuring force for FMS probe

All values given in the table for the measuring force equal nominal values at electrical zero; max. deviation  $\pm 25\%$ . Valid for probing movements executed horizontally as well as in static measuring mode.

230 V 50 Hz

Maximum 20 probes type GT 22, GT 42 and GT 44, maximum force 0,63 N.  
Maximum 10 probes type GT 28 and GT 62, Maximum force 0,63 N.

## Electro-pneumatic Pump for Measuring Bolt Retraction

Electro-pneumatic vacuum pump, controlled by external switch (03260433): requires an automatic external command (e.g. instrument display).

03260432	Electro-pneumatic vacuum pump with activation by connected foot switch	Electro-pneumatic vacuum pump. For the simultaneous retraction of a maximum number of 20 measuring bolts with a force up to 0,63 N	Activation by connected foot switch
03260433	Electro-pneumatic vacuum pump with activation by external control	Electro-pneumatic vacuum pump. For the simultaneous retraction of a maximum number of 20 measuring bolts with a force up to 0,63 N	Activation by external control

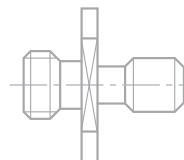

Electro-pneumatic vacuum pump

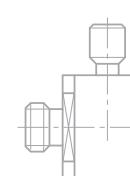

## Connectors for Electro-pneumatic Pump for Measuring Bolt Retraction

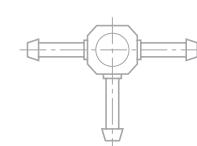

03540403	T-connector for tube Ø 4,7 / Ø 2 mm (03540405)
03560000	Straight connector, M4 thread for tube Ø 4,7 / Ø 2 mm (03540405)
03560002	Angled connector, M4 thread for tube Ø 4,7 / Ø 2 mm (03540405)

Straight connectors

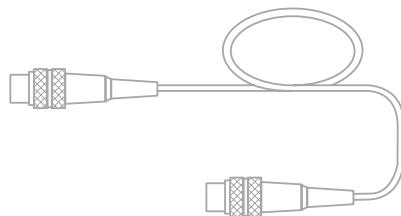

Angled connector

T-connector

## Extension Cable for Probes, Lengths = 1 – 20m

Cable extensions for TESA probes  
DIN 453225, 5 pin connector

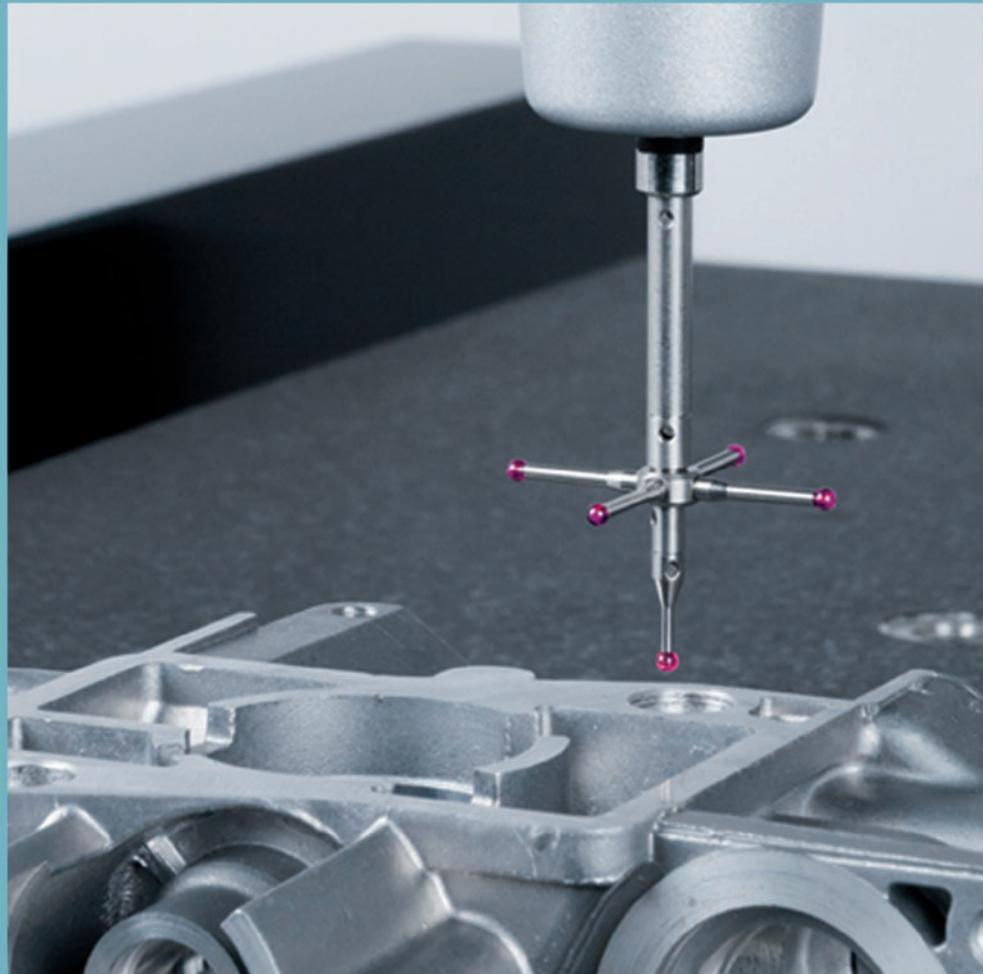

It is recommended to calibrate equipment (probe + extension) connected together to ensure the highest accuracy.

No	=	Length, m (feet)
03240201		1 m (3 ft)
03240202		2 m (6 ft)
03240203		3 m (9 ft)
03240205		5 m (16 ft)
03240210		10 m (32 ft)
03240215		15 m (49 ft)
03240220		20 m (65 ft)

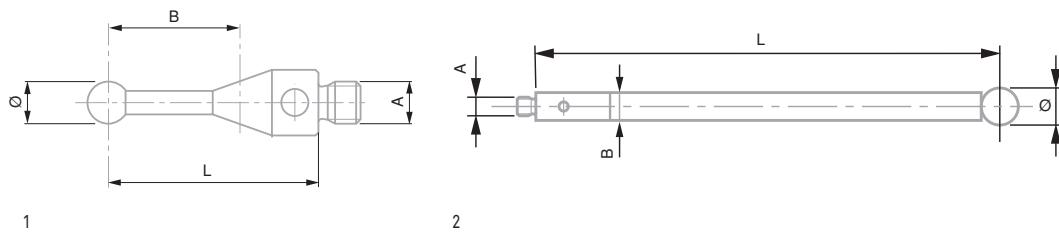

# Accessories

## Ruby Ball Stylus, M2 Thread

These styli are used for the majority of probing applications.  
Highly robust, thanks to their manufacture from industrial rubies, they are however very sensitive, thus avoiding any capture of unwanted points during the movements of a 3D machine.

## Ruby Ball Stylus, M3 Thread

These styli are used for the majority of probing applications.  
Highly robust, thanks to their manufacture from industrial rubies, they are however very sensitive, thus avoiding any capture of unwanted points during the movements of a 3D machine.

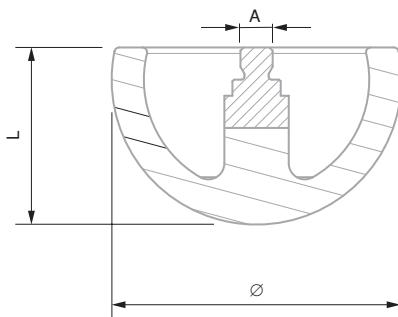

No	Rod	A mm	Ø mm	L mm	B mm	g
03969301	Inox	M3	1	21	4	1,1
03969302	Inox	M3	2	21	8	1,1
03969303	Inox	M3	3	21	12	1,1
03969304	Inox	M3	4	21	17	1,4
03969305	Inox	M3	5	21	21	1,55
03969310	Tungsten carbide	M3	0,5	21	3	1,1
03969312	Tungsten carbide	M3	2	21	15	0,8

03969353	Tungsten carbide	M3	3	50	42,5	2,78

## Hemispherical Styli, M2 Thread

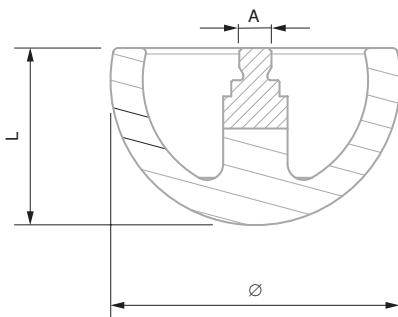

Styli usually made of ceramic are generally used to measure deep bores or to avoid taking into account the unwanted irregularities when measuring.

		Rod	A mm	Ø mm	L mm	B mm	g
03969218	Hemispherical stylus, Ø 18 mm	Ceramic	M2	18	11	-	3,3

## Hemispherical Styli, M3 Thread

Styli usually made of ceramic are generally used to measure deep bores or to avoid taking into account the unwanted irregularities when measuring.

		Rod	A mm	Ø mm	L mm	B mm	g
03969330	Hemispherical stylus, Ø 30 mm	Ceramic	M3	30	17	-	13

## Star Styli, M2 Thread

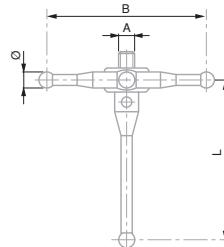

These styli are supplied with several ruby ball tips fixed in different directions. This feature allows a much faster measurement when inspecting internal features without time being wasted by changing the position of a probe.

No	=	Rod	Drawing N°	A mm	Ø mm	L mm	B mm	g
03969055	Star stylus, 5 directions	Inox	1	M2	2	20	20	1,5

03969210	Star stylus, 4 directions	Inox	2	M2	0,5	20	M2	0,7

## Star Styli, M3 Thread

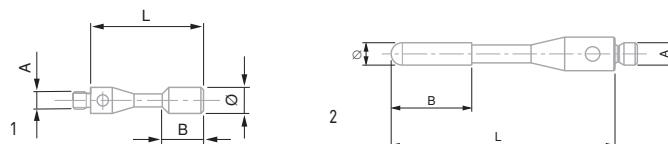

These styli are supplied with several ruby ball tips fixed in different directions. This feature allows a much faster measurement when inspecting internal features without time being wasted by changing the position of a probe.

No	=	Rod	A mm	Ø mm	L mm	B mm	g
03969057	Star stylus, 5 directions	Inox	M3	2	20	20	2,2
03969058	Star stylus, 5 directions	Inox	M3	2	20	30	2,5
03969083	Star stylus, 5 directions	Inox	M3	2	18	20	2,2
03969084	Star stylus, 5 directions	Inox	M3	2	18	30	2,5

## Cylindrical Styli, M2 Thread

These styli are principally used for the measurement of threads.

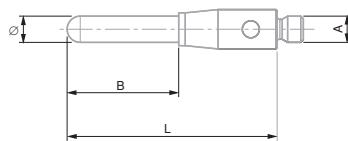

No	Rod	Drawing N°	A mm	Ø mm	L mm	B mm	g
03969251	Inox	1	M2	1,5	11	1,5	0,3
03969252	Inox	1	M2	3	13	3,8	0,6
03969253	Inox	1	M2	3	13	4	0,5
03969292	Tungsten carbide	2	M2	2	20	7,2	0,5

## Parallel Styli, M2 Thread

These styli are principally used for the measurement of threads.

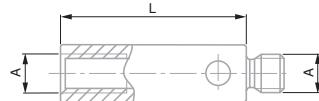

No	Rod	A mm	$\emptyset$ mm	L mm	B mm	g
03969277	Carbide	M2	0,5	15,3	7,8	0,3
03969278	Carbide	M2	1	35,5	29,8	0,7
03969279	Carbide	M2	2	16	8,5	0,8
03969280	Carbide	M2	2	40	32	2
03969281	Carbide	M2	3	22,5	-	2

## Extension M2

The extension allows to enlarge the distance between the probe and the tip of the stylus in order to avoid collision in the depth measurement (e.g. bore).

The use of extensions can greatly reduce the accuracy of the measuring system.

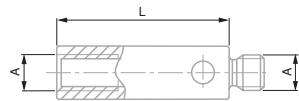

No	=	Rod	A mm	$\emptyset$ mm	L mm	B mm	g
03969230	Extension, L5 mm	Inox	M2	3	5	-	-
03969231	Extension, L10 mm	Inox	M2	-	10	-	0,5
03969232	Extension, L20 mm	Inox	M2	-	20	-	1
03969233	Extension, L30 mm	Inox	M2	-	30	-	1,6
03969234	Extension, L40 mm	Inox	M2	3	40	-	1,8
03969238	Extension, L50 mm	Carbon	M2	3	50	-	1
03969239	Extension, L70 mm	Carbon	M2	3	70	-	1,3
03969240	Extension, L90 mm	Carbon	M2	3	90	-	1,5
03969246	Extension, L40 mm	Ceramic	M2	3	40	-	1,22
03969247	Extension, L50 mm	Ceramic	M2	3	50	-	1,51
03969270	Extension, L40 mm	Carbon	M2	3	40	-	0,9

## Extension M3

The extension allows to enlarge the distance between the probe and the tip of the stylus in order to avoid collision in the depth measurement (e.g. bore).

The use of extensions can greatly reduce the accuracy of the measuring system.

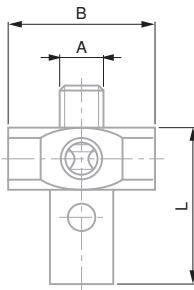

No	=	Rod	A mm	$\emptyset$ mm	L mm	B mm	g
03969044	Extension, L10 mm	Inox	M3	-	10	-	0,8
03969045	Extension, L20 mm	Inox	M3	-	20	-	1,8
03969320	Extension, L35 mm	Inox	M3	-	35	-	2,9

## Cross-pieces, M2

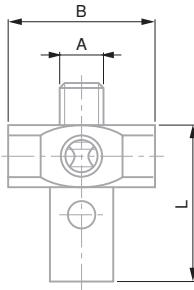

Base on which one or several identical or different kind of styli can be mounted.  
It can be converted into a star stylus or any other desirable configuration.

			A mm	Ø mm	L mm	B mm	g
03969054	5 way cross shaped stylus M2	Inox	M2	-	7,5	7	1,1

## Cross-pieces, M3

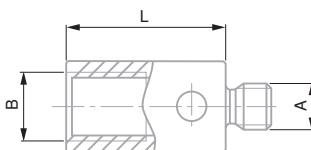

Base on which one or several identical or different kind of styli can be mounted.  
It can be converted into a star stylus or any other desirable configuration.

			A mm	Ø mm	L mm	B mm	g
03969046	5 way cross shaped stylus M3	Inox	M3	-	13	10	3,7

## M2 Adapters

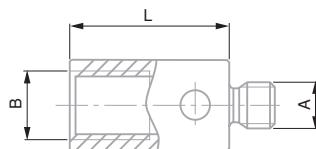

In some cases, accessories that are directly compatible with a probe are not suitable for specific applications. Therefore, it is possible to use an adaptor in order to mount other styli with different threads on it.

			A mm	Ø mm	L mm	B mm	g
03969061	Adapter M2-M3	Inox	M2	-	7	M3	0,5

## M3 Adapters

In some cases, accessories that are directly compatible with a probe are not suitable for specific applications. Therefore, it is possible to use an adaptor in order to mount other styli with different threads on it.

			A mm		Ø mm		L mm		B mm		g
03969062	ADAPTER M3-M2	Inox	M3	-		5	M2		0,5		

## Stylus Tightening Keys

Probes and styli are fragile and sensitive items.

A special key is provided for fixing a stylus on the probe in order to prevent any damages caused by over-tightening.

	
047866	Stylus key M2 or M3

## Stylus Kit

In order to perform several types of measurement, it is often necessary to keep several models of styli. This is why TESA has created standard kits, comprising styli for a variety of dimensions as well as extensions to suit.

No		Kit N° 1, M2 03969086	Kit N° 2, M2 03969087	Kit N° 3, M2 + rigid probe 03969089	Kit N° 1, M3 03969101	Kit N° 2, M3 + rigid probe 03969040
03969085	Case for accessories	1				
047866	Stylus key M2 or M3	2				
049652	Key	2				
050697	Tightening key for carbon fibre stylus	2				
03969231	Extension, inox, M2, L = 10 mm	1	1	1		
03969232	Extension, inox, M2, L = 20 mm	1	1	1		
03969233	Extension, inox, M2, L = 30 mm			1		
03969270	Extension, carbone, M2, L = 40 mm	1				
03969044	Extension, inox, M3, L = 10 mm				1	1
03969045	Extension, inox, M3, L = 20 mm				1	1
03969054	5 way cross shaped stylus, inox, M2	1		1		
03969046	5 way cross shaped stylus, inox, M3				1	1
03969082	5 way cross shaped stylus, inox, M2	1				
03969201	Stylus, inox, ruby ball tip, M2, Ø 1 mm, L = 10 mm		1			
03969202	Stylus, inox, ruby ball tip, M2, Ø 2 mm, L = 10 mm	1	1			
03969203	Stylus, inox, ruby ball tip, M2, Ø 3 mm, L = 10 mm		1			
03969204	Stylus, inox, ruby ball tip, M2, Ø 4 mm, L = 10 mm	1	1			
03969212	Stylus, inox, ruby ball tip, M2, Ø 2 mm, L = 20 mm	2		1		
03969213	Stylus, inox, ruby ball tip, M2, Ø 3 mm, L = 20 mm	2		1		
03969221	Stylus, carbide, ruby ball tip, M2, Ø 1 mm, L = 20 mm	1				
03969260	Stylus,carbone ruby ball tip, M2, Ø 4 mm, L = 50 mm	1				
03969302	Stylus, inox, ruby ball tip, M3, Ø 2 mm, L = 21 mm				1	1
03969303	Stylus, inox, ruby ball tip, M3, Ø 3 mm, L = 21 mm				1	1
03969304	Stylus, inox, ruby ball tip, M3, Ø 4mm, L = 21 mm				1	1
03969214	Stylus, inox, ruby ball tip, Ø 4 mm, L = 20 mm			1		
03969047	Rigid probe, Ø 6.35 mm			1		1

## PLASTIFORM

PLASTIFORM moulding pastes allow print molding of complex internal machined parts, which can then be viewed and checked using optical, non-contact measuring equipment. PLASTIFORM mixing pastes consist of two components, which have to be mixed in equal proportion to ensure proper polymerization. The test object to be reproduced by print molding must be perfectly clean and grease-free before applying Plastiform.

### BAD

Fluid consistency best suited for moulding internal and full prints of small and medium sizes. Medium elasticity (10 % of the core) allows prints to be removed in most cases. Reproduces the finest details and can be used for indirect inspection of the surface finish by sight comparison with use of master roughness specimens. Easily cut with the special cutter.

### DAV

DAV of fluid consistency best suited for moulding internal and full prints of small and medium sizes. High elasticity (20 % of the core) allows hard prints to be removed such as large re-entrant angle, groove, complex internal shape. Reproduces fine details. Difficult to cut with the special cutter. Print will be preferably checked as a whole.

### RGX80

RGX80 is the hardest product of the cartridge range. Pasty consistency best suited for moulding whole internal prints having varying sizes. Weak stretching property and elasticity make it appropriate for easily removable moulding prints.

### LKAD

Malleable consistency best suited for moulding internal, external and sectorial prints of small and medium sizes. Applied by hand. Low elasticity (from 1 to 2% of the core) makes it convenient for moulding prints that are removed with ease. Also appropriate for prints held mechanically if desired. Easily cut with the cutter.

 Shrinking: less than 1 µm/mm after removal of the mould Stability: physical properties allow to produce prints which do not deteriorate with time. They will neither be affected by surroundings – hence usable as master standards.

 Components with additives free from chlorine, fluorine or sulfur. Being non-toxic and on-polluting can be used with no special restriction

 Temperature 20°C

 < 10°C: no more polymerization

## PLASTIFORM Set

PLASTIFORM full case Consisting of:

- 1 DS50 injection handle
- 1 Cutter, special with two parallel blades
- 1 PLASTIN (200 g)
- 50 Mixer-Injectors
- 10 Injector end pieces
- 1 DN1 spot remover, 400 ml 21 Rings for mould removal
- 3 PLASTIFORM BAD 50 ml
- 3 PLASTIFORM DAV 50 ml
- 2 PLASTIFORM RGX80 50 ml

### Properties

TECHNOLOGY

## NOTES

 Order number	 Magnetic measuring system "MAGNA µ SYSTEM", patented	 Material hardness	 Maximum relative humidity
 Standard	 Mm/in conversion	 Measuring force	 Degree of protection
 Measuring range Measuring span	 Maximum permissible errors Limit deviations	 Shockproof design	 Electromagnetic compatibility
 Range of indication Max. plunger travel	 Deviation span of indication	 Maximum displacement speed	 Mass
 Displacement range	 Repeatability limit	 Product designation	 Included in scope of supply
 Application range	 Hysteresis	 Execution	 Packaging
 Analogue indication Longitudinal scale	 Maximum permissible straightness error	 Special features	 Identification number
 Upper vernier	 Maximum permissible flatness error	 Notes	 Declaration of conformity
 Lower vernier	 Maximum permissible roundness error	 Function mode	 Inspection report
 Circular scale	 Maximum permissible parallelism error	 Floating zero	 Inspection report with a declaration of conformity
 Dial	 Maximum permissible cylindricity error	 Fixed zero	 SCS calibration certificate
 mm or in/revolution	 Maximum permissible perpendicularity error	 Blocking of display	 Certificate of another type
 Scale interval	 Maximum permissible runout error	 Digital interface	 Reverse numbering or +left
 Resolution magnification	 Quality grade	 Analogue interface	 Dial locking knob
 Numerical scale	 Uncertainty of measurement accuracy	 Power supply	 Connectivity
 Numerical interval	 Frame	 Autonomy	 TWIN
 Height of signs/digits	 Measuring face or faces	 Coefficient of linear expansion	 ABS
 Analogue/numerical indication	 Dimensions	 Working temperature range	 Height of signs/digits 11 mm
 Material measure Measuring system	 Diameter	 Operating temperature range	
 Capacitive measuring system "CAPA µ SYSTEM", patented	 Thread pitch	 Storage temperature range	

### About Hexagon Manufacturing Intelligence

Hexagon Manufacturing Intelligence helps industrial manufacturers develop the disruptive technologies of today and the life-changing products of tomorrow. As a leading metrology and manufacturing solution specialist, our expertise in sensing, thinking and acting – the collection, analysis and active use of measurement data – gives our customers the confidence to increase production speed and accelerate productivity while enhancing product quality.

Through a network of local service centres, production facilities and commercial operations across five continents, we are shaping smart change in manufacturing to build a world where quality drives productivity. For more information, visit [HexagonMI.com](http://HexagonMI.com).

Hexagon Manufacturing Intelligence is part of Hexagon (Nasdaq Stockholm: HEXA B; hexagon.com), a leading global provider of information technologies that drive quality and productivity improvements across geospatial and industrial enterprise applications.

### About Brown & Sharpe

Brown & Sharpe, pioneering brand of the first modern vernier caliper to read to thousandths of an inch, has continuously developed and produced high-quality devices, earning a prestigious reputation during the American industrial revolution.

Today, Brown & Sharpe precision hand tools are integrated under the TESA umbrella by the Hexagon Manufacturing Intelligence division, the world's largest metrology product provider, becoming TESA's first choice for products with imperial scale.

### About TESA

Established in 1941 and headquartered in Renens, Switzerland, TESA SA manufactures and markets precision measuring instruments that stand for quality, reliability and longevity.

For 75 years, TESA has distinguished itself in the market through its excellent products, its unique expertise in micromechanics and precision machining as well as its proven experience in dimensional metrology.

The TESA brand is the global market leader in the field of height gauges and a pioneer thanks to its wide range of instruments, including callipers, micrometers, dial gauges, lever-type dial test indicators and inductive probes. TESA is a true benchmark for the inspection of incoming goods, as well as for production workshops and quality assurance laboratories.

Through its worldwide distribution network the company focuses on the mechanical engineering, micromechanical, automotive, aerospace, watchmaking and medical industries.

In 2001, TESA became part of Hexagon, a leading global provider of information technologies.
